Telset Khalid 1989 Domestic Section

- SE
- Trenches ✓
- 206/4 - roadway ADC
 - 207/1 - house continuation ATC
 - 207/2 - courtyard? ADC
 - 207/4 - Kitchen of house? ATC
 - 207/5 - courtyard? ATC

206/4 - Was started because we wished to excavate a roadway and also define the corner of the housing block being worked on. This site was chosen because it contained part of the modern track. Roadway found to be approximately 3m east of the modern track. A wall was found on the Eastern side of the trench that goes down to bedrock - probably the original occupation. There is also a wall on the western that seems to be of a later occupation as the stones are resting on soil. We have taken the roadway to be a cambered lens of soil that has a uniform composition. The pottery from this trench was mainly small worn fragments that are consistent with a roadway.

207/4 - This trench was started because we were trying to find the south east west corner of the SE main house. A NS wall was found that seems to have been broken at the northern end. This room contained 2 ovens and a series of water pipes - which were further revealed when the bank was removed. We decided to excavate further to the north because a doorway seemed evident between the two rooms. (207/5)

207/5 - This trench was originally thought to contain a courtyard due to the level ground surface and its location - 1 room back from the roadway. This was wrong on the assumption that the room would open onto a central courtyard. Not much success as we excavated to bedrock without definitely finding a floor. We suspect the floor to be of a comparable height to the floor level in 207/4 - i.e. just above the bedrock in the NW of the trench.

17

207/5 cont - A substantial doorpost was found and one bank removed ~~the~~ to complete the excavation and reveal the doorway.

207/2 - opened because it appeared there was a doorway in the bank between 207/2 and 207/5 and we wanted to find the relationship. Further excavation of 207/5 showed there to be a continuous wall along the East bank thus no doorway possible. Excavated to bedrock with walls lining the East and South sides of the trench. No clear floor level found but the floor suspected of lying above the regolith in the North of the trench.

207/1 - Decided to excavate this trench to complete one square and to find a relationship between these 4 rooms and the doorway evident in trench D7. Again we excavated to bedrock and didn't find a floor. although a very nice pottery layer which we think would probably have been just on top of a floor layer. A doorway was found in the NS wall which was filled in or possibly filled in because of tumble. This doorway was above the pottery layer and also above the fill layer, it was also higher than the doorway in D7 $\Rightarrow$ perhaps different occupation levels.

To complete trenches we began removing banks in the last 5 days.

- 3 banks were backfilled D7/207-1

207/4-5

207/2-5

D7/207-1 - mainly done because a wall was suspected in the bank. The floor in D7 is a distinct compacted limestone which was not present in 207/1. assumed a wall. No wall was revealed when the floor level of D7 was reached.

Densitas ρ ^{diagram} $\text{kg/m}^3 = \frac{23}{\text{volume}} = 19.2 \text{ kg/m}^3$

207/4-5 This bank was taken out to fully reveal the doorway, south side of the wall and the water pipes. Also to reveal the break in the wall (vs 207/4) to see if there was a doorway.

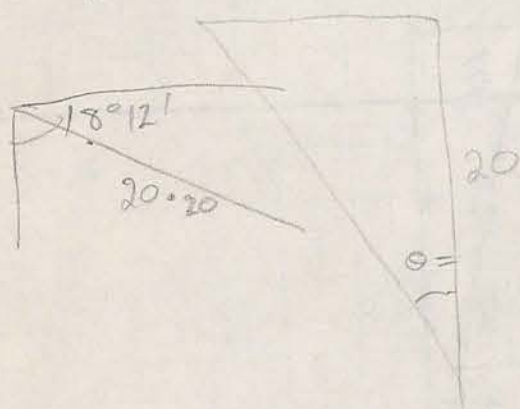

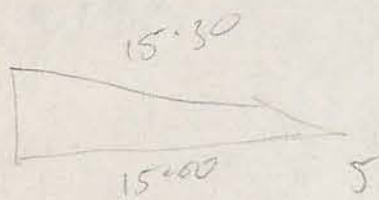

207/2-5 - This bank removed simply to open up the area as it has to be removed at some stage. Bank lies to the East of a wall so we may get some vessels lying adjacent to the wall but not expecting anything else. This bank was uncompletely removed due to lack of time and unfortunately the digging became a bit unbalanced.

We also wanted to remove banks 207/1-2 and 207/1-4 but not possible because of time and access. These will need to be done next season if possible.

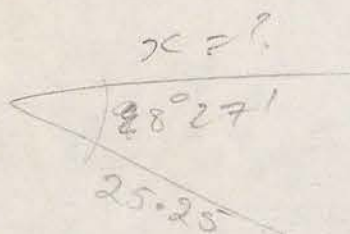

Next Season suggestions

- D8 - Hopefully this would give us the East-West wall of the house. Already the layer of D7 is large and no pillar bases have been found so a wall must be close.
- 207/3 - This trench would contain a sizeable doorway which would most likely lead into the room of 207/2. It would also delineate the northern wall of the room in 207/2.

2/4/89 DAY 1

Two bags ~ bones & pottery sherds.

Bones labelled: 2/4/89, D4/D7 Baulk, Bone.

Sherds : 2/4/89, D4/D7 Baulk, Pottery Pieces.

In D7, $\frac{3}{4}$ of trench is excavated to a limestone floor (?) level. $\frac{1}{4}$ is excavated to B/R next to lane wall & baulk: (S.E. corner).

From just below ground/floor at 'A' above were dislodged 2 pieces of stone with mortar.

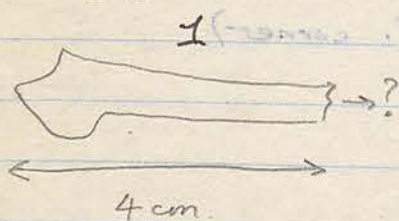

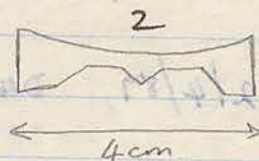

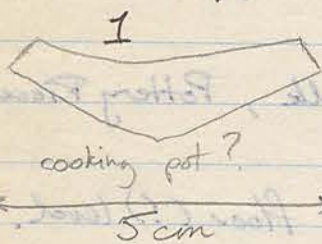

Small pieces of unstratified charcoal from baulk.

General Desc: Work today is aimed at clearing tumble and revealing the strata at which excavation ceased last year. Most trenches have suffered partial collapse. At end '88, A3 was excavated to bedrock in N. corner & to an oven is S. end. At start '89 oven has been lost & excavat. has continued to bedrock (B/R) ($\approx 40\text{ cm}$). Trenches D1, 4 & 7 had minimal tumble. An unstratified lamp fragment ^{89.026} was recovered from baulk being excavat. between D1 & D4. Once cleaning-up of D1, 4 & 7 was complete (noon), it was decided to excavate baulk between D4 & 7 for a length of 2m to ascertain presence of a door or wall & also continuity of 'lane wall'. Digging from D7 to D4.

Monday 2nd April 1989

21/4/89

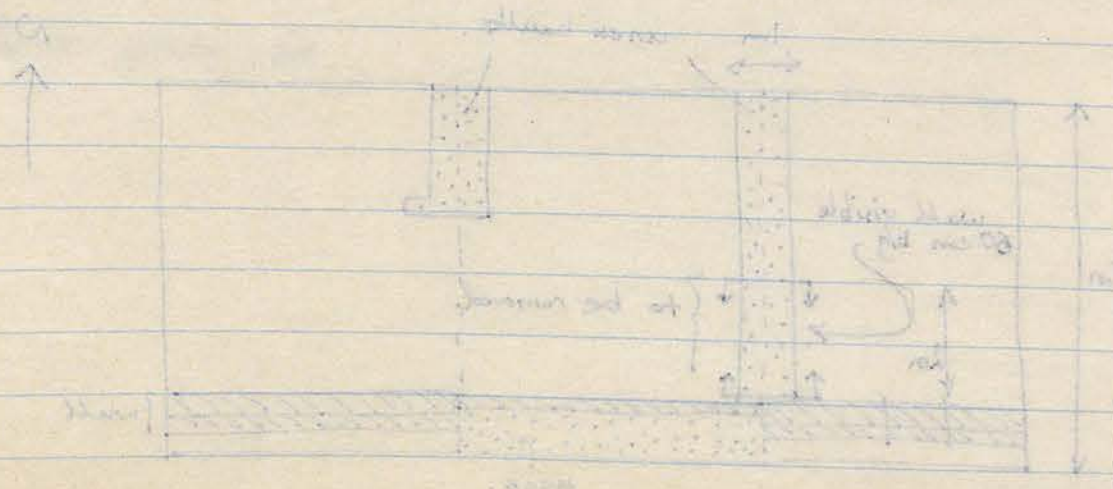

Weather: Clear & sunny, 18°C. Light S.E. breeze.

Notes: Track 42:

Track 42: D1 - D4:

Robert Black

D5:
Miss Brown
Miss White

General Note: Work today is aimed at clearing rubble and restoring the structure of which excavation showed that four West London were suffered partial collapse. At end '88, H2 was excavated to bedrock in corner to an area 2m x 2m. At start '89 work has been lost a corner was continued to bedrock (8/10) (2.40m). Therefore D1, 2 & 3 had rubble. An excavated large fragment was removed from rubble being excavated. D1 - D4: Once clearing up of D1, 2 & 3 was complete (approx) it was decided to excavate rubble between D4 & 5 for a length of 2m to establish presence of a door or wall & also continuity of lane wall. Digging from D4 to D5.

3/4/89 DAY

The gap

Wed

Work Yesterday a stone was uncovered with a grey paste material on it which looked like mortar. It is now apparent that it came from the grey soil layer 30 cm below 'floor' level in D7 & is in fact soil.

Gene A small piece of metal 2cm long & 2mm x 2mm (a nail?) was uncovered. It is in the 'Objects' bag.

is The bank shows several strata when viewed from D4. The various levels dep will be separated & pottery etc. annotated appropriately.

Strata 1 & 2 is tumble & rocks - cobbles

Stratum 2 is not present.

6. Stratum 3 is the main unit & has been combined with 1 for speed.

Stratum 4 is 5cm 'floor' band of crushed limestone - floor.

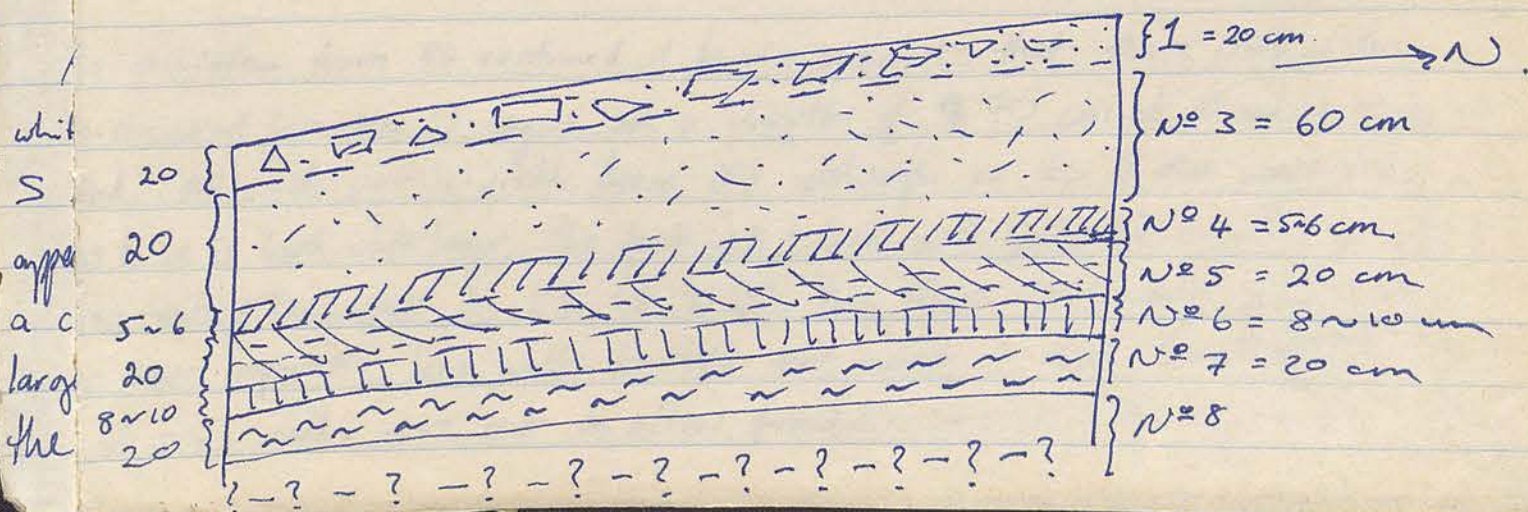

Stratum 5 is 20cm band of brown soil

Stratum 6 is a grey layer between 8 & 10 cm thickness

Stratum 7 is gritty beige soil with chips of limestone ≈ 15 cm

Stratum 8 is unidentified and extends beneath the trench floor.

View of Bank from D4

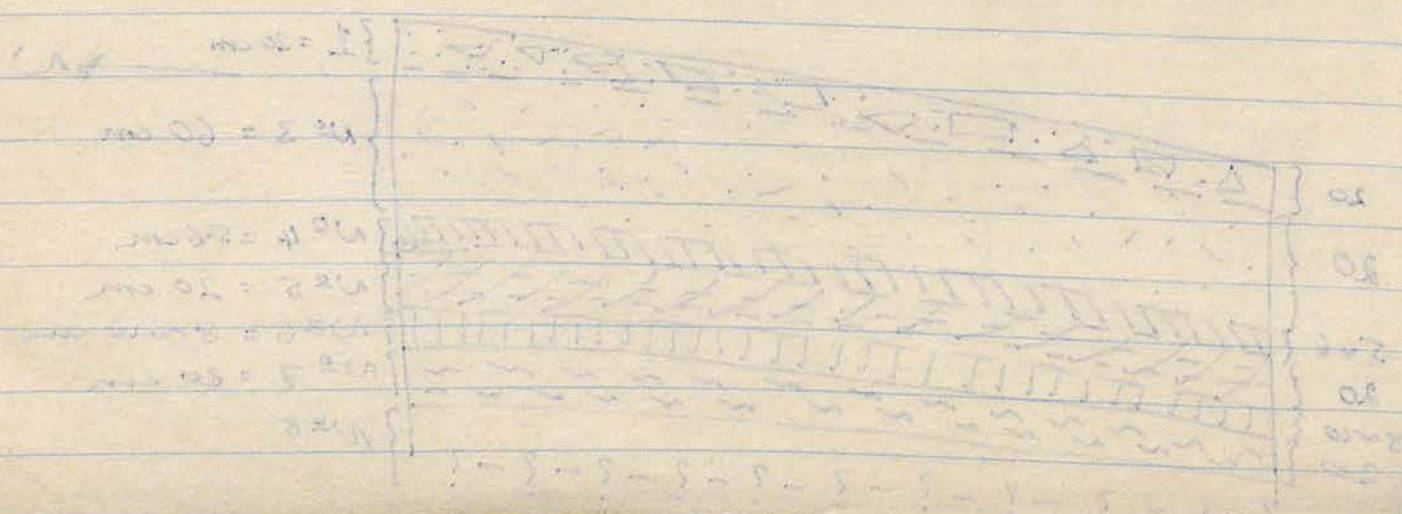

Looking a stone was removed with a gray rock material on it which is the color of the soil. It is now apparent that it came from the gray soil layer. The 'floor' level is 1.5 ft. - it is level soil.

A small piece of metal was found a 2m distance (in soil?) in the 'object' bag. It is a 1.5 ft. - it is level soil.

The bank shows several strata from the various levels. It is separated a distance of 100 ft. - it is level soil.

- Stratum 1 is a layer of rubble & stones - 100 ft.
- Stratum 2 is not present.
- Stratum 3 is the main unit & has been combined with 1 & 2.
- Stratum 4 is 2m 'floor' level of compacted limestone.
- Stratum 5 is 80cm band of brown soil.
- Stratum 6 is a gray layer between 2 & 5 - 10 cm thickness.
- Stratum 7 is a gray layer with chips of limestone - 12 cm.
- Stratum 8 is unidentified and extends beneath the floor.

View of Bank from 27

DAY 2

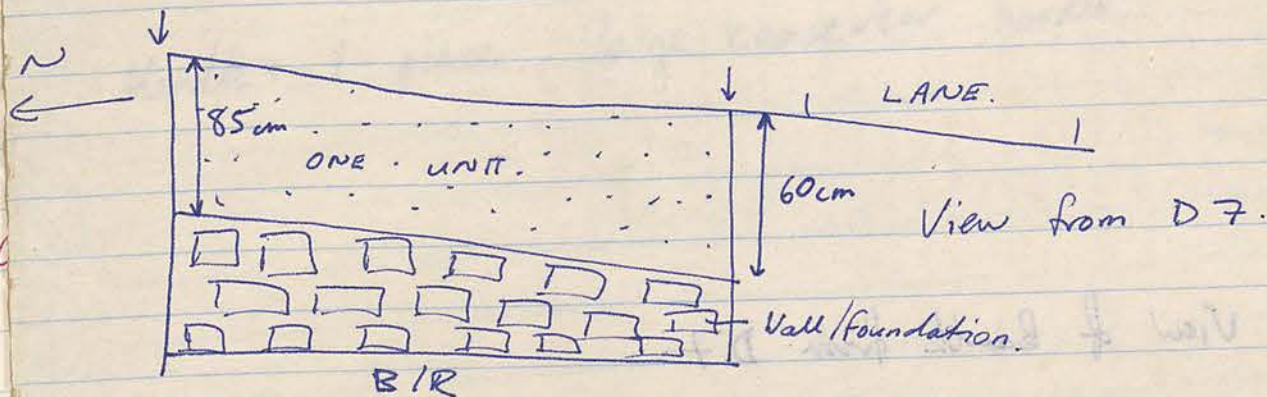

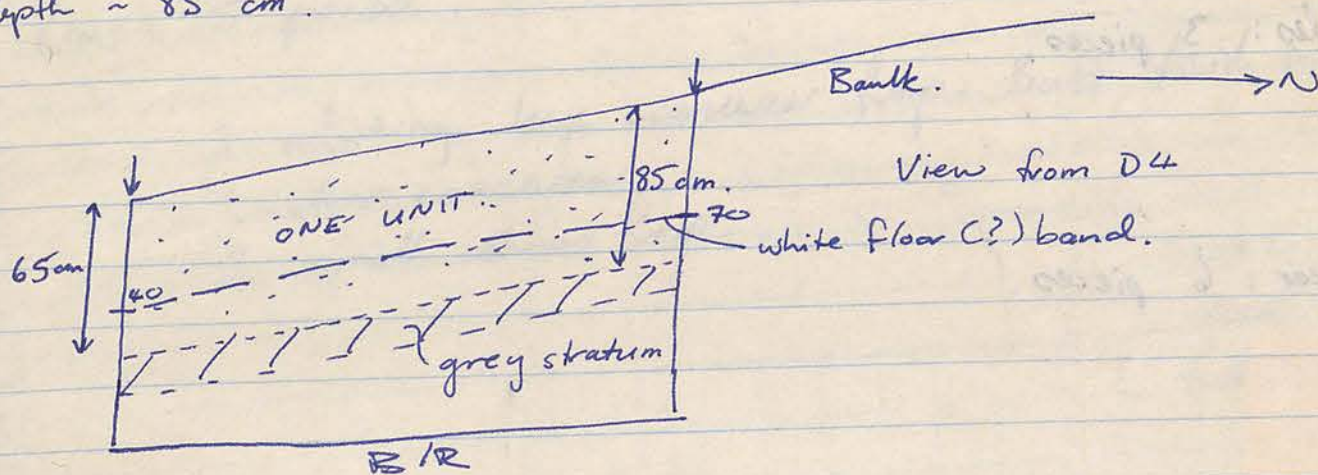

Monday 3/4/87.

Weather: Clear & sunny. Cool morning with light N.E. breeze.

Workers: A3: as yesterday.

D4/D7: as yesterday.

General Desc.: This morning work is continuing on the bank between D4 & D7. Excavation from both sides. On D4 side, the low foundation/wall is not visible but a grey stratum of soil is at the same approximate depth ~ 85 cm.

As excavation from D4 continued, it became apparent that there was a thin white (crushed limestone?) layer at a depth of 70 cm at N end & 40 cm at S end. No such unit is visible from D7. although on top of the wall there appears to be a hard white layer. The bank wall & lane wall appear not to join ~ similar to a cross wall & lane wall in D1 (E side). Are these lower walls older & the larger, more impressive 'lane' walls (outer) more recent & that during ^{their} const. the old cross walls were cut to allow foundation access? The gap in D1 is 20cm.

$$\text{Density} = \frac{24}{(2 \times 0.2)} = 60 \text{ p/m}^2$$

Pottery from stratum 5, collected 3/4/89
Baulk D4/D7.

Bases: 3 pieces.

1 plate, 1 bowl, 1 unidentified.

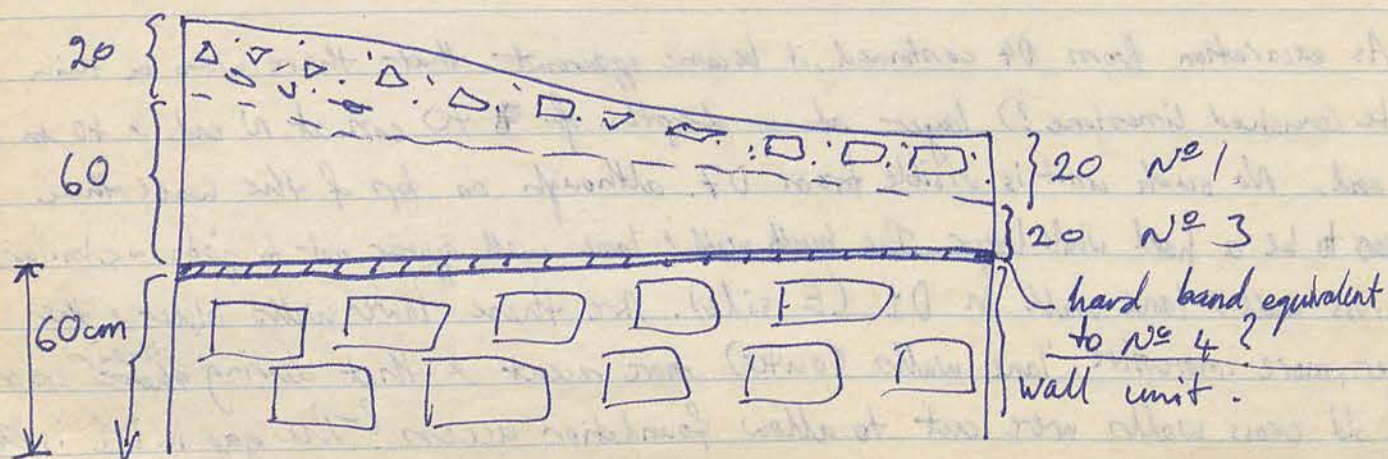

Rims: 12 pieces.

6 echinus, 2 jars/amphorae, 3 bowls (cont), 1 plate.

Handles: 3 pieces.

Overwear: 6 pieces.

large coarse wear handle

4/4/89

Day 3

which was considered too important to move. In the course of the past 12 months the door post has fallen into D1 hence there is no reason or impediment to the baulk's excavation. As the D4/D7 baulk is excavated to bedrock (for the southern 2m) it will be possible to start on the D1/D4 baulk tomorrow morning.

Also discussed the positions of future trenches. Amanda & I anticipate working together on the next trench & possibly one each after that, if time permits. There are a few options, each influenced by longer term goals but short term gains. The general aim in the domestic sector is to excavate one entire block & adjacent streets. To this end, the C & D grids (each 15m x 15m) are good because they have started on the corner of one such block. That is the long term goal. The short term gains sort are maximum wall plans (external generally) & possibly a courtyard. Viewed with these constraints, 7 trenches seem most appropriate. See plan:

Of the seven, there are five 'primary' & 2 'secondary' trenches. If ?4 or ?1 proved interesting, ?3 or ?2 could be opened subsequently. ?4 would be interesting because it will reveal the street & a house ^{partly} corner. ?1 is over a level area - a courtyard? ?1 is next to D7 & is a seemingly logical one but ?4 offers a greater chance of finding the other wall corner seen in D1 thus delineating the frontage of this house. ?4 is also partly over level ground & may reveal a courtyard.

$$\text{Density} = \frac{32}{(2 \times 0.2)} = 80 \text{ p/m}^2$$

Pottery

10.30 - Wall excavated to reveal a small pit of pottery
about 22" deep.

10.40 - The corner of the wall was found to be
of large flat pottery vessels. The pottery
was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.

10.50 - Pottery was found to reveal a small pit of pottery
about 22" deep. The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.

11.00 - Pottery was found to reveal a small pit of pottery
about 22" deep. The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.

12.00 - Pottery was found to reveal a small pit of pottery
about 22" deep. The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.

12.10 - Pottery was found to reveal a small pit of pottery
about 22" deep. The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.

12.20 - Pottery was found to reveal a small pit of pottery
about 22" deep. The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.
The pottery was found in a small pit about 22" deep.

Option two is now favored because it gives definite information
about the pottery vessels. Pottery is quite low to see it
and I feel that it is worth it. I should take a few days.
I don't know but you know of a large in situ chamber.

1.1.19

Day 3

9.30 - wall completely excavated & c.
 Extant height $\approx$ 55 cm

7.

10.00 - Peter Connor came over and took 4 photos:
 1 looking at eastern profile
 1 " " western "
 2 looking along wall from south.
 1 skew view looking N.W.

10.30 - Decision made to excavate to bedrock (through stratum 8).
 Will excavate to eastern (D4) edge of bank (the 2 m to west of D7 line). Have opened pottery & bone bags for stratum 8, Not a lot is being recovered however.

11.00 - Stratum 8 is only about 5-10 cm thick (varies over length & breadth of trench). The mud cement used in the construction of the wall is clearly different from the surrounding/burying soil. It is a much lighter, more yellow colour & is much more cohesive. The burying soil is quite friable & a medium rich brown colour. Another smaller, angular piece of bronze (heavily corroded) was uncovered near doorway).

12.00 - Discussion of future trenches & work with Peter C. The trenches D1, 4 & 7 have been excavated to the point where 3 internal walls are exposed where they terminate, adjacent to, but not in, the external wall. There are several options:

- 1 excavate the banks between the trenches thus fully revealing the walls within these squares,

- 2 to only excavate the bank between D1 & 4 thus revealing the relationship between two perpendicular walls,

Option two is ~~most~~ ^{more} favoured because it gives definite information about two partially exposed walls. Peter is quite keen to see it done & I feel that it is useful. Should take 3-4 days. It wasn't done last year because of a large in situ door post

ground & may reveal a courtyard.

$$\text{Density} = \frac{32}{(2 \times 0.2)} = 80 \text{ g/cm}^3$$

Pottery from Stratum 7, Baulke D4/D7, collected 4/4/89

Bases: 9 bases.

- 3 complete small vessel circular with dimple in centre
- 2 frags of large flat based coarseware vessels.
- 3 " " small/medium coarseware vessels.
- 1 " " large amphora base.

Rims: 9 pieces.

- 67 echinus. ~ 2 coarse } frags.
- 54 fine wear.

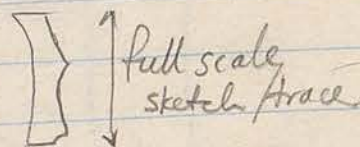

2 large coarseware vessels. (frags)

Handles: 4 pieces (two adjoining).

- 2 adjoining from large coarse wear vessel
- 1 from cooking wear.
- 1 handle/body junction of large coarseware vessel

Overwear: 8 pieces.

Other: suspected rim frag (no obvious rim)

Full scale sketch trace

: 1 piece parthian green glaze

Full scale trace

Tues 4/4/89 Day 9

9

Weather: Fine, sunny day. Dawn & early morning cool. Light N. breeze.

1

Workers: As day 1.

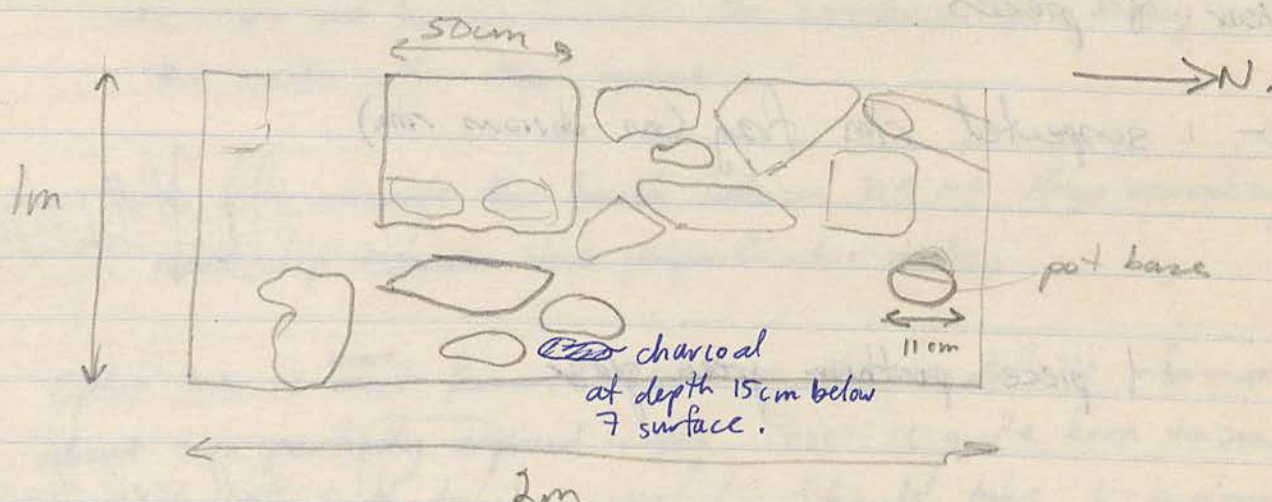

General Descriptions: Yesterday, digging ceased $\frac{1}{2}$ way through stratum 5 & it has started there now. Next to the wall on

D4 side at interface between 5 & 6 strata, a small amount of charcoal was recovered. A small lump of oxidized copper (or bronze) was found at 6-30 in stratum 5 near the end of the wall. It is green & very fragile. In 'Objects' Stratum 5, 4/4/89. Charcoal is in 'Charcoal', Strata 5/6 interface, 4/4/89, Baulk D4/D7.

7.00 - Began stratum 6. Still frequent recovery of small pellets of charcoal. Wall is clearly taking shape from D4 side & appears to terminate with a small gap before the 'lane' wall. Amphora rim fragment found.

7.30 - A whole pot base (broken) has been uncovered just at the N. edge of the baulk excav & is embedded in stratum 7. = D4 find.

8.00 - Sketch of baulk & wall at level 7/6 interface

9.00 - Finished excavation to level 8 ~ approximately floor level. There is a clear gap between the walls $\approx$ 50cm.

Density = $\frac{23}{(2 \times 0.2)} = 57.5$ Total density of SS = $\Sigma p = 117.5 \text{ g/cm}^3$

Pottery from Stratum 5, Baulk D4/D7, collected 4/4/89

Bases: $\frac{4}{14}$ pieces.

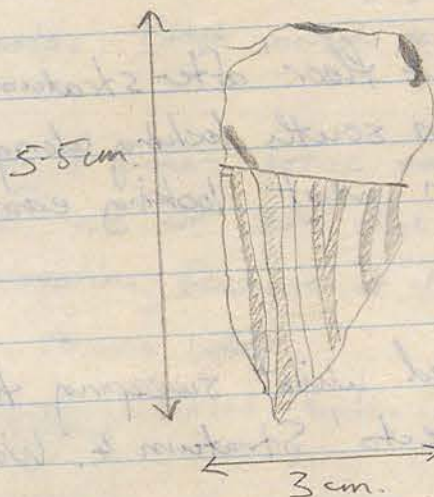

Rims: 12 pieces.

54 echinus, $\frac{84}{2}$ jars/coarse wear, 2 outward (bowls)

Oven wear: 6 pieces.

Object: Figurine fragment.
(Female drapery)

(found with washed sherds & not mentioned in notes)

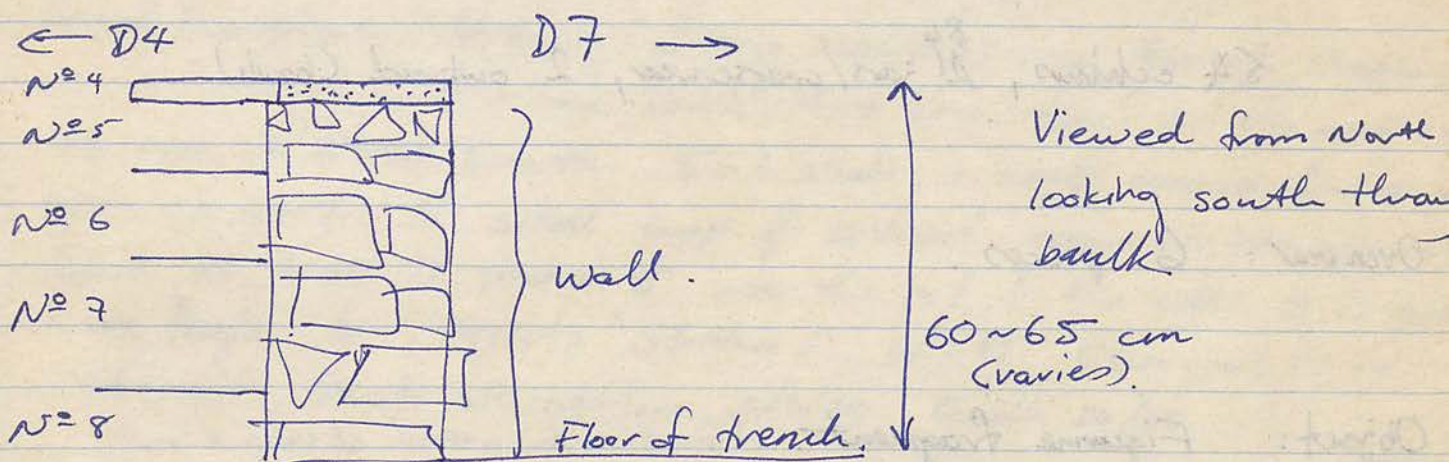

full size

This figurine fragment has been inventoried as an object & stored as such.

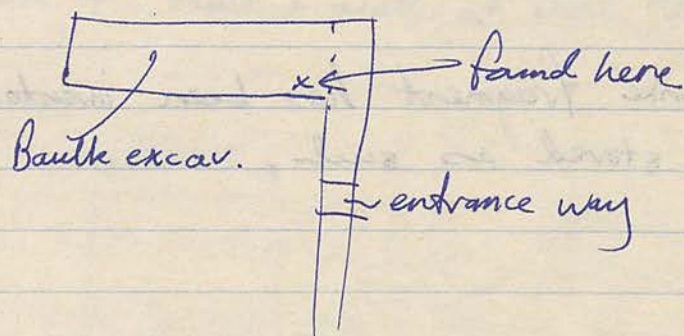

3/4/89. DAY 2

Stratum 4 (white floor band) appears to be uniform across the the lower wall. After partial excavation from D4 side, it was much more obvious that S.4 was uniform. Have excavated to assumed wall position & at this stage are leaving it. Excavation to lower levels is continuing.

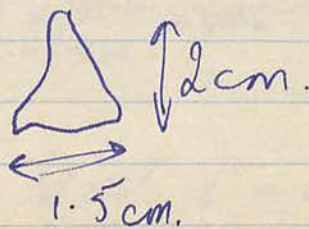

Peter took photos of the wall & 'floor' after stratum 5 had been partially excavated. 1 shot from south looking along wall with meter stick on west side & 2 from west looking east at profile of wall & 'floor' layer.

A piece of glass rim was found whilst sweeping the floor level for photo graphs. It is in 'Objects' Stratum 4. Was found in the S.E. corner

Floor level above the wall was removed after photos had been taken. A dark chip of dark rock (basalt?) was uncovered ~ shape of a clove & about 2cm long. It is in 'Objects' Stratum 4 also.

Wed 5/4/89 Day 4

ground & many ~~revel~~ ~~several~~ features.

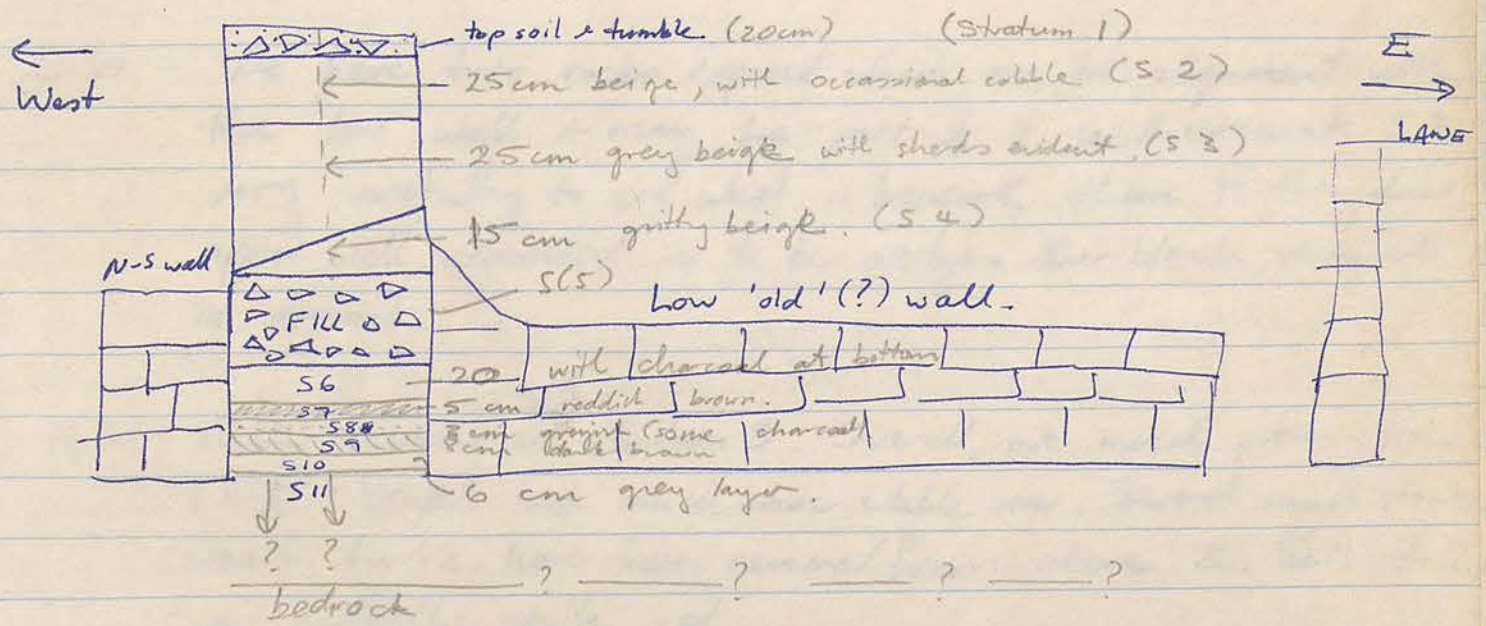

Weather: Clear & sunny. Cool morning. Light N. breeze.

Workers: Unis
Hanan
Abdula
Jima.

General Desc:

0600 - Asked for the large door jam to be moved away from the baulk (D1 side) & Unis began to level it over with a large pick. Before I could stop him, he had laid 3 blows into it & broken off a large chunk. Completely cracked at $\frac{1}{3}$ line. Bloody vandal! Marked out the stratigraphy of the baulk & Peter C took 2 photos. Block moved to corner of trench, out of the way.

7.00 - Cleaning of corner before excavation of baulk D1/D4. As with D4/D7, we will take the topsoil & tumble layers out together. An interesting feature of the baulk is a 'fill' layer of cobbles about 50 cm deep.

The fill layer only occupies the corner bounded by N-S & E-W low wall

Density = $\frac{18}{5.75} = 3.1 \text{ plm}^2$

Pottery from Strata 3 & 4 (undifferentiated) Baule D1/D4. Collected 6/4/89

Bases: 4 pieces.

All small ring bases, fragments.

1 of interest is of a light grey material, seemingly unglazed.
burnished greyware.
✓ full scale trace.

Rims: 7 pieces.

4 $\frac{1}{2}$ echinus. ~ 1 small bowl frag with weak black paint.

1 large vessel, coarseware.

4 outward turning pieces

Overwear: 7 pieces.

5/4/89.

Day 4

- 8.00 - Excavation of stratum one continuing. Nearly a disaster when southern end of baulk nearly collapsed. This would have meant the loss of our clearly defined stratigraphy. The year of weathering has made many bands distinctive.
- 8.30 - And the disaster has occurred. Have lost the best marker lines (on the southern end). Lost at least $\frac{1}{3}$ to $\frac{1}{2}$ of the fill which is unfortunate because it contained a lot of large sherds. All material from the fall has been lumped together as 'Unstratified' 1-75.
- 9.30 - Cleared away most of the fall & sorted it. Jima is now working on the southern end. Another fall is likely/imminent. Due to this Jima has taken the southern end down to S3 & material is slightly confused but will try to keep S1 & S2 separate on the rest of the baulk.
- 10.05 - Separated the Stratum 1 excavated at N. end. New bag for stratum 2. No bones found in S1.
- 11.00 - Peter thinks he may have found a temple or shrine 40m S.E. of his two trenches & is keen to open ^{another} one up on Sat.
- 11.30 - We have two rocks exposed which are in alignment with the 'low' wall & may be part of it. Will excavate S3 very carefully to see what is beneath them. If they don't appear well cemented or to be overlying other blocks, they will be removed.
- 12.30 - Finally starting on stratum 3. Overall, not much pottery from 1 & 2. Slopes look much more stable now. Several small stones clearly tumble, have been removed from above 3. Soil of 2 was actually quite red.

$$\text{Density} = \frac{13}{5.75} = 2.3 \text{ g/cm}^3$$

Pottery from Stratum 5, Baulk 01/04, Collected: 6/4/89

Bases: 2, possibly 3 pieces ~ see 'others' below.

1 complete small vessel ring:

1 fragment " " "

Full scale trace.

Rims: 6 pieces.

1 echinus fine wear.

2 large vessel, coarseware.

1 jar fragment.

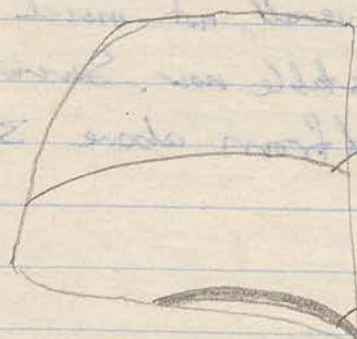

2 plates.

Handles: 1 fragment small coarseware vessel.

Overwear: 2 fragments.

Other: 2 pieces.

1 piece of metallic greyware possibly a base piece

incised line

raised ring ~ base?

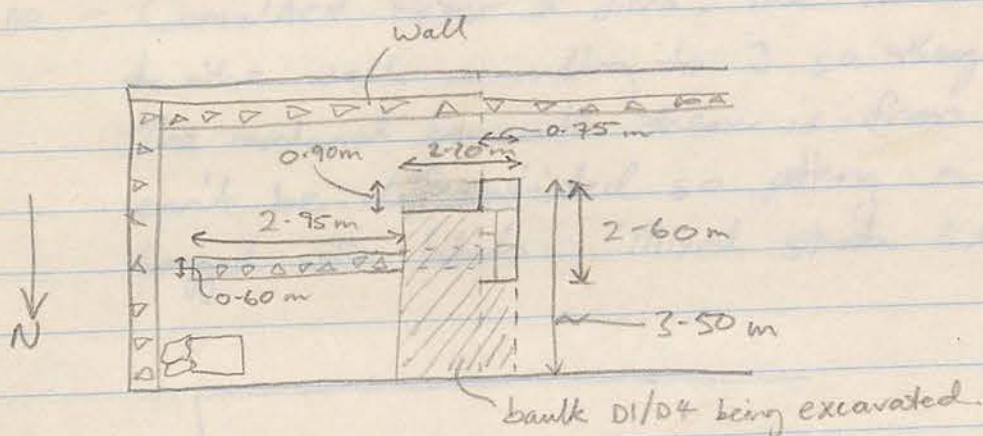

1 piece of fine ware with black glaze.

11.
Thurs. 6/4/89. Day 5.

Weather: Cool, clear morning. Some cirrus clouds. Light N.W. breeze.

Workers: Unis, Hamir
Hamir
Jilma
Abdula.

6.15 - Start on stratum 3. Have pottery & bone so far. Jilma & Unis digging.

7.00 - Placed a string line from floor level in D4 to the large dividing wall near the D1/D4 baulk. When level, it was above the large block but resting on two smaller blocks which are cemented to the large block. This tends to indicate that the dividing wall went to full height in the 'new' house
at D4/D7 baulk.

7.30 - A small fragment of suspected alabaster found on southern end of baulk in stratum 3. Have also just found a female figurine head (at 7.45). Both are in 'Objects' Stratum 3 D1/D4 Baulk. The alabaster is about 1cm² & the head about 4cm high & 2.5cm wide. Radi thinks she may be arabic as he has found the head of a man with Ayattolahi type head-dress.

June 27/28

After: Cool clear morning. Some cumulus clouds. Light NW breeze.

July 1, 1928, Mon

Clear

Clear

At Lake.

2 - Start on station 3. Have battery & box so far. Time

their digging.

100 - Place a string line from tree back in to the large clearing and
near the 21/28 bank. When laid, it was about the length of
but nothing on the small block which was connected to the
large block. This looks to me like that the clearing will not be
full height in the next few years.

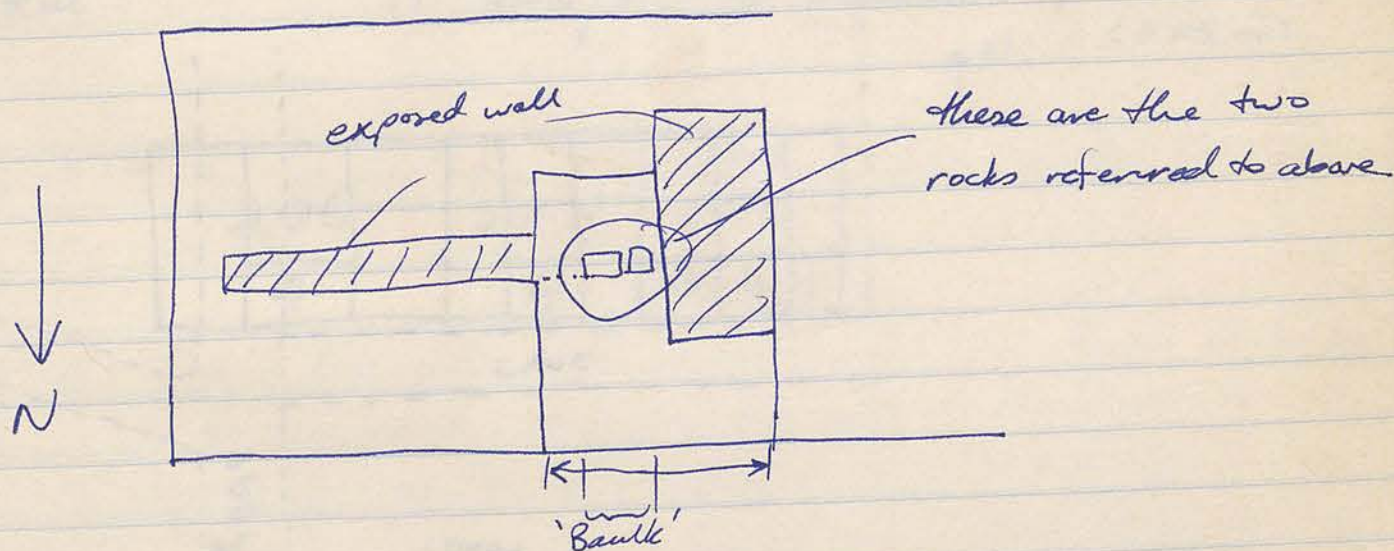

150 - A small fragment of vegetation observed about 100 yds. from
of bank in station 3. There also just found a female prairie
hawk (see 1st). But are no 'objects' station 3 21/28 bank.
The distance is about 100 yds. - the bank about 100 yds. high.
A 2-3 cm wide hole through the soil was made in the
soil found the hole & a few small objects were seen.

implying high position in the community. Peter C thinks our head
is Hellenistic.

8.30 - Finished 3, starting on stratum 4. The large blocks on the
bault will soon be clarified - are they a part of the 'low'
wall or are they tumble?

9.50 - Jima thinks ^{that} the forward block could be a part of the
wall about that the western piece is not. Will keep both in
place for a bit longer. Stratum 5 visible in bault &
some charcoal has been recovered from the boundary
region. Is bagged under stratum 4.

11.00 - Consulted Peter & Jima: The two rocks ^{were} not related
to the wall according to J so they have been removed.
The material beneath them is from strata 3 & 4 but
can't be differentiated so pottery & bones have been
bagged with labels: 'Mixed strata 3 & 4 from under rocks'

11.15 - An interesting piece of pottery has appeared. It has been bagged as
an object. Came from the mixed strata.

Full scale

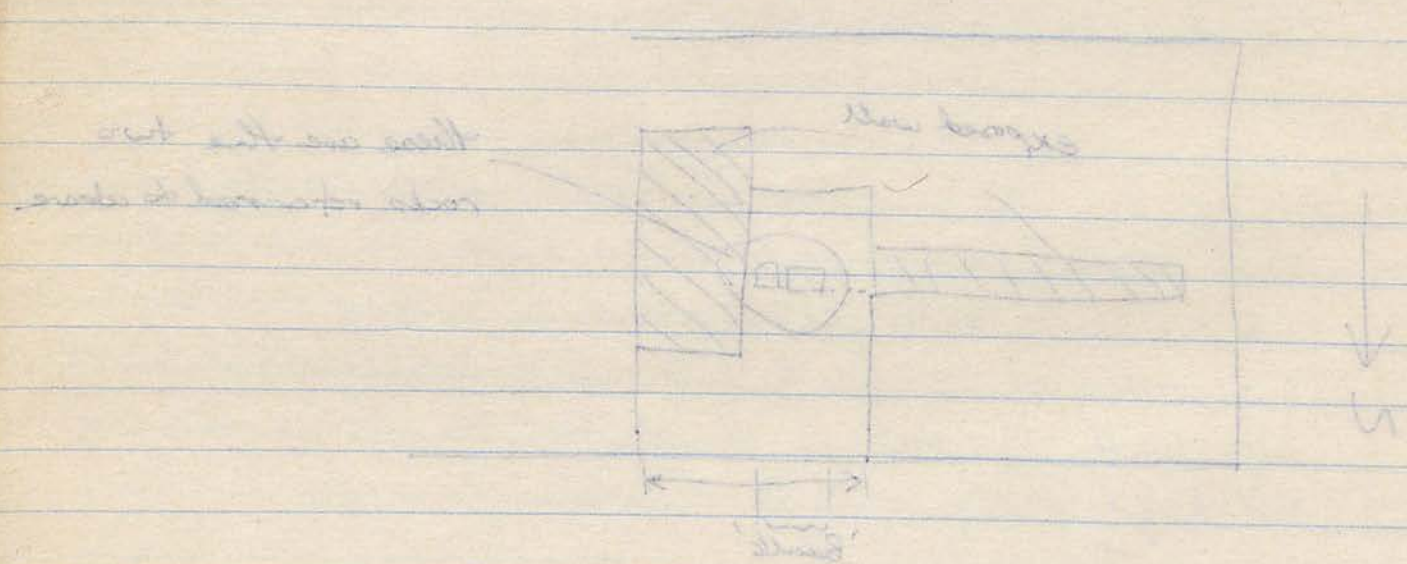

Peter thinks it is a
fragment of a figurine.

playing high position in the community. Peter C. thinks we have
 1948 Aug 2

0 - Finished 3, starting on station 4. The large block on the
 bank will soon be cleared - we have a part of the low
 wall or are they tumbled?

25 - Jim thinks the fossil block could be a part of the
 wall about that the western face is not. Will keep looking
 place for a bit longer. Station 2 visible in distance -
 some charcoal has been recovered from the boundary
 region. Is banded with station 4.

30 - Consulted Peter & Jim: the two rocks are not related
 to the wall according to 3 so they have been removed.
 The natural boundary there is from station 3 & but
 can't be differentiated so they are being left alone.
 banded with labels. Mixed with 2 & 4 from under rock.

32 - An interesting piece of pottery has appeared. It has been banded in
 an object. Came from
 the mixed strata.
 like this it is a
 fragment of a figurine.

6/4/89 Day 5

11:30 - small amount of charcoal recovered from 'under rocks'

8/4/89 (SATURDAY)

Day 6

Did surveying all day. Layed out 2 (5x5m) squares for Peter C. They are located in grid 364 being squares 364/4 & 364/5. 364/1

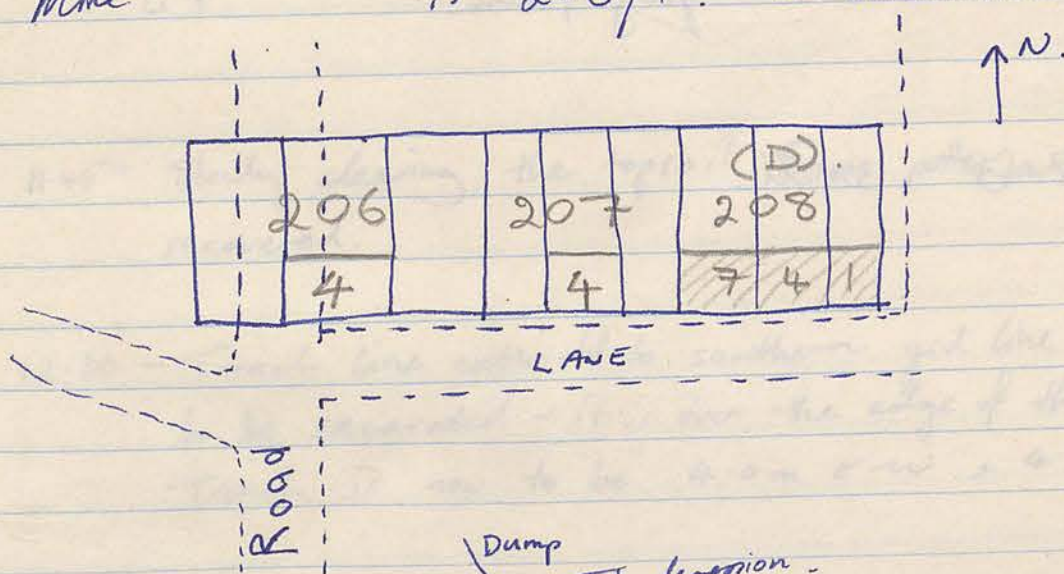

9/4/89 (Sunday)

Day 7.

Set out Amanda's & my next squares. Base of the squares is notionally on the grid line which is the southern edge of grids 206, 207 & 208 (D).

Amanda's square is 207/4 ~ corner of D1,4 & 7 house? (5x5m)

Mine is 206/4 ~ on intersection of lane & road. (5x5m)

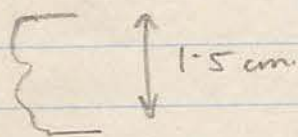

Weather: Cool morning. Clear & sunny with light S.E. breeze 20°C (in shade)

$$\text{Density of SI} = \frac{\sum SI}{16} = \frac{6 + 10 + 13}{(16)(0.1)} = 18 \text{ p/m}^2$$

Pottery from 206/4 Stratum I, collected 10/4/89

Bases: 1 fragment of a small coarseware ring.

Rims: 1 fragment of a medium sized coarseware vessel

Handles: 3 pieces, groups from jar and two

1 circular section, coarseware.

1 root section (rim not included above)

1 coarseware handle with grey fabric.

Ovenware: 1 fragment, small

Total

Mon 10/4/89. Day 8

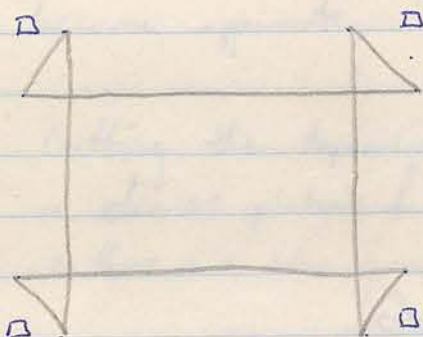

Weather: Cool morning with moderate N. breeze.

Workers: Unis, Haman, ~~Hamas~~. Awar.

General Description:

6.15 - Peter photographed site 206/4, my new trench. Took 3 shots, all looking North - 1 general, 1 up east bank, 1 up west bank.

6.30 - Clearing of weeds & now topsoil from between surface stones and tumble. Need a trowel for Haman & another zembyly. The dump is over 268/8 & 49 approximately. Trench is strung up as below:

In this way, the nails will not fall out as clearing progresses & also, a more ^{accurate} flexible string line is obtained.

11.45 - Slowly clearing the topsoil. Some pottery sherds have been recovered.

12.30 - Trench line extended to southern grid line i.e. all 50 cm bank to be excavated - it is over the edge of the intersection. Trench is now to be 4.0 m E-W & 4.5 m N-S.

Den 2009. 18/4/09
Pottery from 206/4, Stratum 1, collected 11/4/89

Bases: 4 fragments. **50WA**

All small circular coarseware vessels.

Rims: 3 fragments.

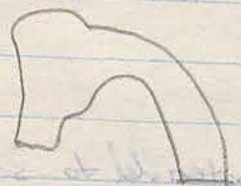

All outward coarseware vessels

Handles: 3 fragments.

All from large coarseware vessels

1 with root & rim connection

4-5 cm

Tues 11/4/89 Day 9

Weather: Overcast & very mild. Light rain at 5-5-30 but ground dry. S.E. breeze (quite strong at 10 am) & through till close & very dusty & hot at finish.

206/4

Workers: Unis, Hasan, Awaz.

6.30 - Work continuing on clearing topsoil. About $\frac{2}{3}$ cleared.

7.00 - Small amount of rain - not enough to hamper work.

7.30 - Spoke to Peter about extending trench westwards through the baulk so as to maximise coverage of road. He would rather that it stayed for now but once the stratigraphy & general conditions become apparent, it could be removed.

8.00 - Getting the topsoil totally removed from in between rocks so that a clearer picture of the trench is achieved. Top soil is quite hard & there are also green bush/weeds which have deep, tough roots.

10.00 - Have the little bush for cleaning down stones. Awaz looks like a bit of a dead worker - happier to sit than dig.

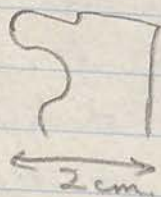

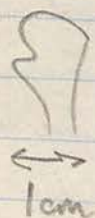

Pottery from 206/4, S 1, 12/4/89 collected.

Bases: 3 fragments. All small vessels, coarse wear.

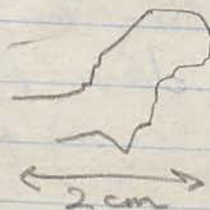

Rims: 7 fragments.

1 echinus coarse wear bowl.

4 large vessel coarse wear.

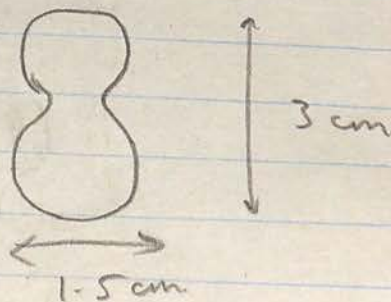

1 piece stance cannot be determined

Handles: 3 fragments

1 double handle ('8' profile)
large coarse wear vessel.

2 ordinary amphorae large vessel
coarse wear handles.
1 is the root.

Wed 12/4/89 Day 10

Weather: Warm with a cloudy sky. Light N.W. breeze

Workers: Unis, Hassan, Anwar.

General Desc: Laid out two trenches for Radi (D6 & E4) which took until 9 am (pegging & stringing).

9-30 - Workers had continued on clearing work. Should be ready to photo at 12 ~ 12-30 & then first rocks can come out. Some pottery.

12-30 - Peter took 3 photos looking North up trench after topsoil had been removed. Nos 6, 7 & 8 on Roll 4. Starting to remove rocks & tumble with underlying soil.

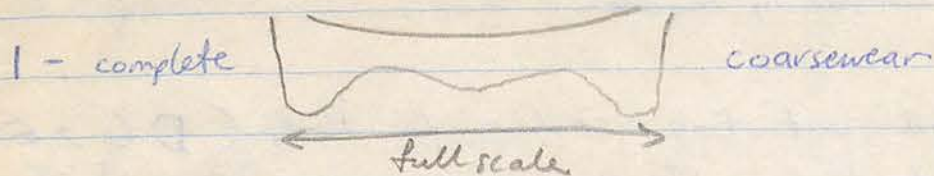

Stratum 1 = topsoil.

Stratum 2 = tumble

$$PS3 = \frac{33 + 101 + 13}{(15 \times 0.1)} = 98 \text{ g/lm}^3$$

Pottery from 206/4, $\frac{53}{51}$, Collected 13/4/89

Bases: 12 fragments.

1 - flat based coarsewear vessel 6cm ϕ .

7 - ring base fragments ~ non-descript.

1 - small ^{bowl} vessel with base & rim, glazed in & out.

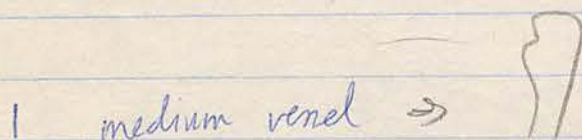

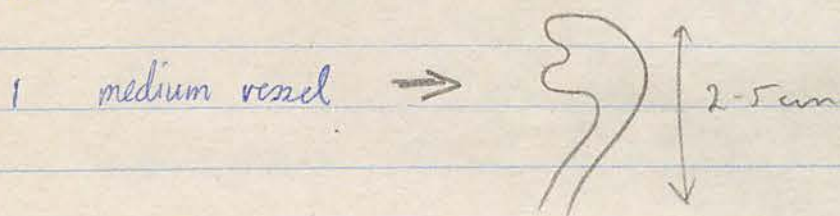

1 - amphora.

Rims: 12 fragments.

8 coarsewear large vessel fragments.

2 echinus.

Handles: 8 fragments.

4 root pieces } all coarse
4 large vessel }

Ovenwear: 1 fragment

Thurs 13/4/87 Day 11

Weather: Fine, sunny & still (to 8 am). No cloud. Hazy.

Workers: Unis, Hassan, Awaz, Jima & Abdula.

General: Spent until 8 am surveying on acropolis - set out a square & looked at Edward's traverses which he wants mapped.

8.00 - All tumble gone. Soil beneath is a medium brown & has been designated S3. A relatively small amount of pottery is being recovered.

approx 20cm uniformly

? - ? - ? - ? - ? - ? - ?

Stratum 1 (topsoil)

Topsoil depth variable, generally < 10 cm

Stratum 2 (tumble & soil between)

Stratum 3

11.00 - About 2/5 of trench excavated into stratum 3 but as yet, not to the boundary. Will be setting out more trenches for PJC on Saturday.

Pottery from 206/4 53. Collected 15/4/89.

Bases: 27 fragments.

- 1 - fine wear with brown glaze ~ plate?
- 2 - amphorae bases, ~ 1 unusual. →
- 20 - coarsewear circular ring frags.
- 2 - coarsewear plates.
- 1 - shallow angle coarsewear with ^{essentially} flat bottom.
- 1 - medium coarsewear green fabric ring frag.

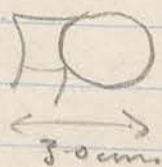

Rims: 43 fragments.

- 3 - echinus coarsewear frags.
- 13 - large vessel coarsewear rims.
- 7 - outward curving coarsewear frags.
- 18 - coarsewear frags ~ shape undefined.
- 4 - glazed rim frags: 1 brown glaze coarse
1 brown & black striations/wheel marks
2 brown/red wear.

Handles: 19 fragments.

- 10 - large coarsewear vessel "body" frags.
- 1 with dark brown semi-fine fabric.
- 6 - root fragments.
- 3 - root & rim frags. - 1 with rotalio.

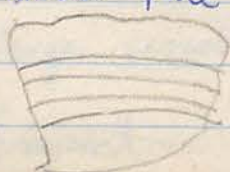

Openwear: 7 fragments.

Other: 4 fragments:

8

- 3 - brown fine wear glazed body sherds.

1 -

semi-coarsewear with black rings ~ wheel marks?

Sat 15/4/87. Day 12

Weather: Cool morning, clear sky, hazy.

Workers: Unis, Haman, Awaz.

General Desc:

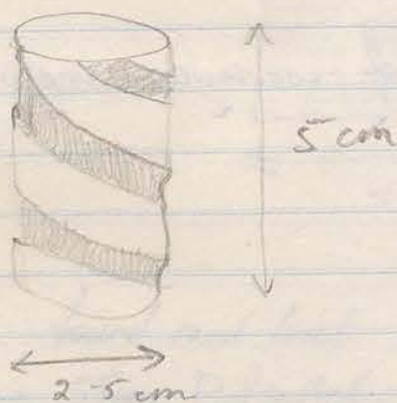

6:00 - Starting again in S3. Jima & Abdula back with Amanda

6:40 - Fragment of a smooth, apparently carved object - made of sphalerite? Bagged as an object (stratum 3)

7:30 - A large rectangular block is exposed in the eastern edge of the trench & it could be the cornerstone. It is in line with the southern wall. West wall (N-S alignment) is difficult to guess about because of the tumble & slope onto the road.

10:30 - Bone bag required for S3. Quite a lot of pottery.

11:30 - 5cm piece of pottery uncovered which is cylindrical but with "plaiting" or coiling. It appears to have a slight curve implying a handle perhaps. PJC says it is a twisted handle.

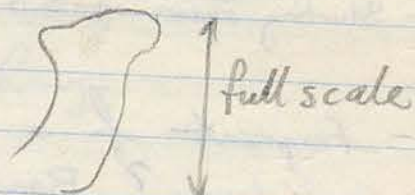

Pottery from 206/4, 53, Collected 16/4/89

Bases: 4 fragments

All circular 'ring' bases from small coarseware vessels

Rims: 3 fragments

All large coarseware vessels.

Handles: 6 fragments.

4 pieces being root/rim connections.

2 frags of large vessels

Pottery from 206/4, 54, Collected 16/4/89

Bases: 12 fragments.

1 - amphora.

7 - medium sized rings of coarseware vessels.

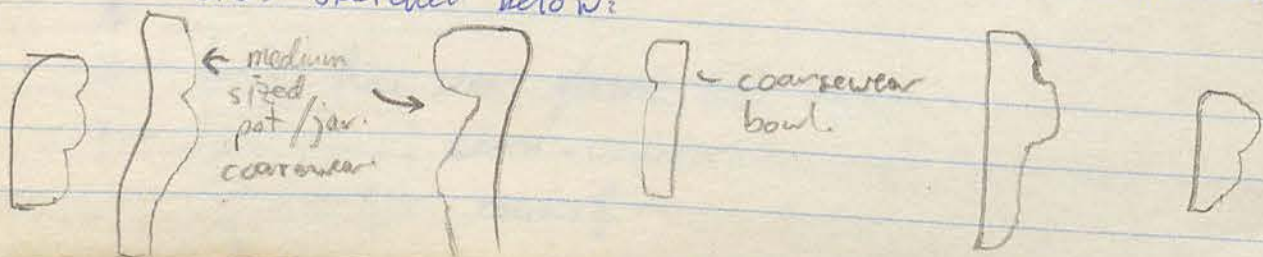

3 - small " " " "

1 -

Rims: 23 pieces

4 - eckinus, all coarseware.

- remainder various sizes of coarseware vessels. interesting ones sketched below:

Sun 16/4/89

Day 13

Weather: Cool, clear sunny morning. Light N.W breeze. Moderate S.E. breeze from 11 o'clock. Dusty.

Workers: Unis, Harman, Awaz,

General Desc:

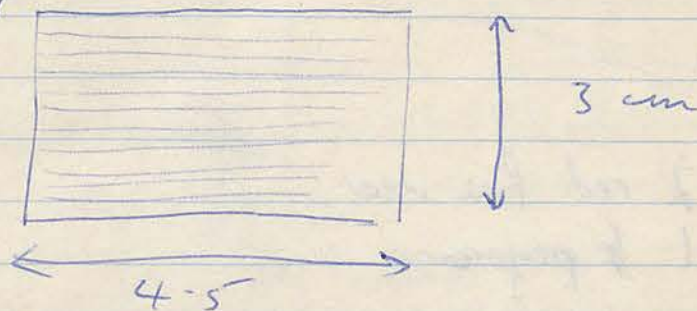

6:15 - Continuing with S3. Will get them to work from W to E so that there is a better chance of revealing the wall if it exists in the trench.

7:00 - Started stratum 4.

8:00 - N-S wall is suspected of being along the East bank just inside the trench. This means that almost the entire trench is in roadway.

9:00 - Once the wall becomes more apparent, a 1-5m trench will be excavated adjacent to it down to B/R. This will, hopefully, reveal the stratigraphy of the road. An object was recovered just before breakfast - grey clay material. Harman says it is modern & was all for pitching it.

NE 89.343

12:00 - May have found road level in N of trench. Approx depth appears to be 55cm. Definitely a new stratum beneath S4. It is harder than overlying soil - consistent with a road?

$$S4 = \frac{50 + 61 + 76}{(13 \times 0.15)} = 96 \text{ p/m}^3$$

206/4 S4, 16/4/89 continued.

Handles: 5 fragments, all coarse wear.

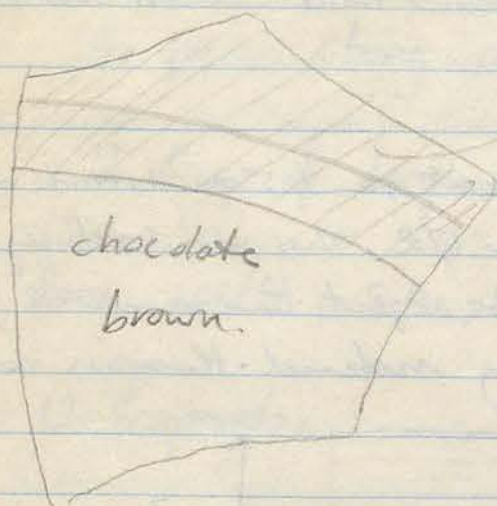

2 'doubles' } 3 both with root attachment.
see p 16.

1 small vessel handle ~ 1.5 cm wide & tight curve

2 roots.

Ovenwear: 3 fragments.

Other: 7 fragments - body sherds with interesting glazes or markings:

black

raised striations

2 red fine wear.

1 grey wear.

full face
groove ~ base piece
of small vase?

unidentified ~ rim?

finished surface

Pottery from 206/4, 54, Collected 17/4/89.

Bases: ¹³ 12 fragments. All coarseware; none complete.

1 - amphora.

1 - medium ring vessel

10 - small ring vessels.

1 - echinus bowl base (V-small
1 cm high).

Rims: 27 fragments.

23 - echinus coarseware.

16 - large vessel fragments

3 - outward turned coarseware frags.

4 - small vessel coarseware fragments

Handles: 9 fragments

2 - "body" handle fragments

6 - handle roots.

1 - handle & rim frag.

Overwear: 6 fragments.

also 6 fragments with black on inside but not out ~ wa
v
vessel frags?

Others: 6 frags.

5 - red/brown diagnostic glaze frags

1 - worn dark brown frag (glazed)

17/4/89 Day 14

12-00 - N-S wall in east bank becoming well defined.

12-30 - small fragment of glass (~ mother of pearl appearance), Bagged with the two other objects. Found in S.W. corner. More pieces also found (2 others as at 12-35)

all

water

$$pss = \frac{28 + 34 + 34 + 38 + 68 + 37}{(13)(0.22)} = \text{shards/m}^3$$

Pottery from 206/4, S5. Collected 18/4/89

Bases: 6 fragments.

34-medium sized coarsewear vessels, orange fabric

1 - small coarsewear base with white fabric.

1 - " " " " brown " unusual: sketch

plan

section

full scale.

Rims: 11 fragments.

5 - echinus ~ 2 small frags adjoining.

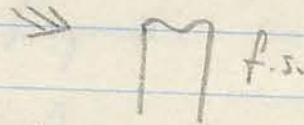

2 - large coarsewear vessels.

1 - outward shallow dish frag: →

1 - coarse greyware. ⇒

1 - medium sized

coarsewear vessel

f.s.

Handles: 4 fragments.

2 - rim & handle frags. both medium sized coarsewear

1 - root frag. large coarsewear vessel

1 - ~~medium~~ large vessel body frag.

Ovenwear: 2 frags.

Other: 3 black lined (water?) vessel frags.

2 small glazed frags.

Tues 18/4/87 Day 15

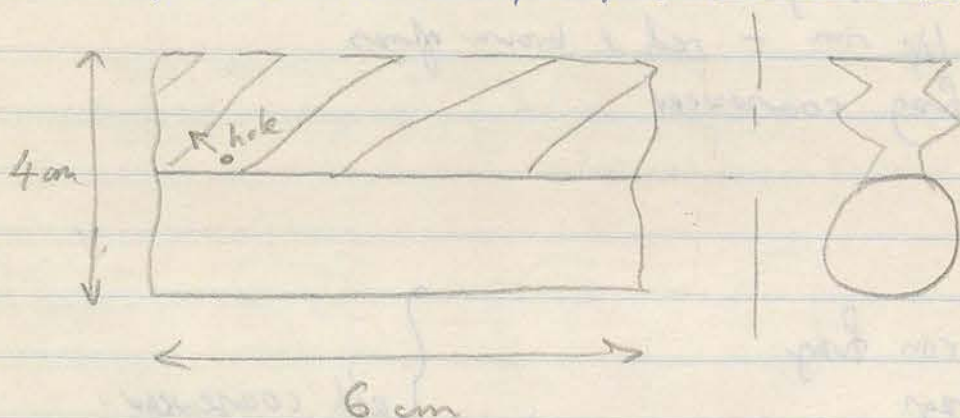

Weather: Cool, clear & no wind.

Workers: Unis, Homan, Awoz, Fatyre

General Desc:

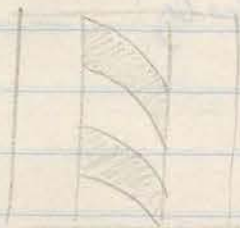

6.00 - Continuing to expose southern & western walls. Removal of tumble in N.E. corner. Will excavate to a uniform depth across the trench leaving the walls 10cm or so above the level. After that, will dig several loci - one being the trench material south of the ^{E-W} wall & one within the room.

9.00 - Object uncovered ~ part of a handle: sketched below.

N^o 89.188.

Peter thinks it should have another round unit on top of the twisted material.

It came from N.E. corner (Unis.)

10.30 - Change into SS, Bone & pottery bags. Quite a large bag from S4. (pottery)

11.00 - A dark square of dark grey soil has been uncovered adjacent to the East wall (N.E. corner)

Pottery from 206/4, S 5, Bag N^o 1. Collected 20/4/89

Bases: 5 frags.

- 1 - coarseware fish plate
- 2 - small coarseware terracotta ring frags.
- 1 - medium "
- 1 - beige/grey ring frag.

Rims: 11 frags.

- 1 - echinus bowl frag.
- 4 - coarseware medium to large vessel frags.
- 3 - notched rim frags
- 1 - pie crusted frag ~ with thumb print?
- 1 - glazed lip rim ~ red & brown glass
- 1 - plate frag coarseware.

Handles: 6 frags.

- 1 - root & rim frag
 - 3 - root frags
 - 1 - circular cylindrical amphora frag.
 - 1 - handle frag (body)
- } all coarseware.

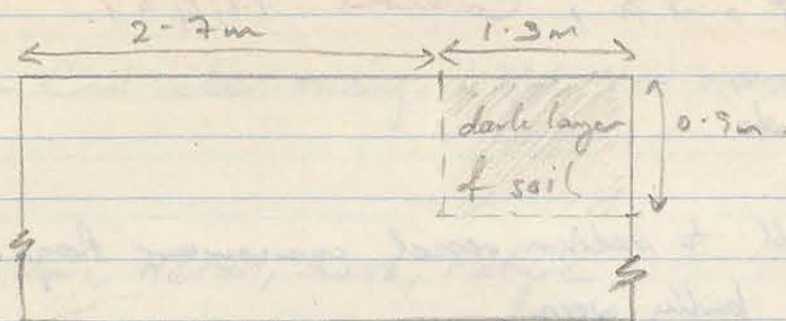

Ovenware: 4 fragments.

Others: 2 frags black lined body sherds coarseware

- 2 - frags red glaze. Fineware.
 - 1 - reddish brown medium ware
 - 1 - dark brown in & out
 - 1 - red out brown in.
- } all quite worn

1 - figurine fragment now separated & bagged as an object

18/4/87 Day 15

12-45 - Unusual flatly white material (small fragments) recovered from south east corner in SS. Bagged as objects for further identification - **Nº 89.523** = glass fr.

Object Nº 89.481

Figurine fragment

object.

Pottery from 206/4, 55, Collected 19/4/89.

Bases: 9 fragments.

5 - small to medium vessel coarseware frags.
All badly worn.

1 - plate fragment, red glaze beneath, brown on top.
fine wear.

1 - fish plate

medium wear with grey
remnant glaze. Terra

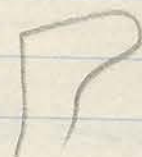

2 - large coarseware frags.

Rims: 9 fragments.

1 - echinus small bowl

1 - shallow bowl base & rim frag fine wear. Red glaze

5/4 - large vessel coarseware

1 - frag so badly worn ^{it is} ~~it is~~ unidentifiable.

1 - medium wear plate

(Handles: 7 fragments.

4 root & rim frags ~ all badly worn coarseware.
with ∞ "infinity" symbol style

3 root fragments ~ 1 ∞ style.
all coarseware.

Wed 19/4/89 Day 16.

Weather - Cool clear morning. Light N.W. breeze.

Workers: Unis, Haman, Awar, Fatyre.

General Desc:

6-00 - Starting off in S.S. In the room, also southern wall line. Pottery & bone bags required.

8-00 - Small fragment of glass uncovered by Unis in North. & trench. Depth = 70 cm No 89-521.

9-00 - Beginning to wonder if there is a southern wall. As Haman digs down in that area, nothing is appearing. Perhaps this is the road after all. The N-S wall in the east bank certainly has a solid looking corner stone.

19/4/89 Pottery Continued.

Overwear: 6 fragments

Other: 1 black lined frag.

1 small frag red glazed finewear.
1 small " brown " " "

One

Pottery from 206/4, 55, N^o 2 (see p. 23 for N^o 1) Collected 20

Bases: 10 fragments.

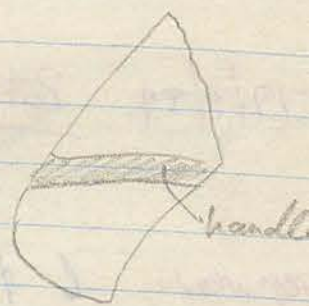

- 1 - amphora toe
- 1 - fish plate
- 3 - large vessel coarse wares ring frags.
- 4 - small " " " " "
- 1 - semi-fine brown glazed ring base frag.

Rims: 16 fragments.

- 1 - echinus
- 54 - shallow bowl / plate lipped rims.
- 54 32 - notched rim frags all coarse
- 5 - circular necked vessel frags.

Handles: 2 frags.

- 1 - handle & rim frag.
- 1 - pressed handle / body fragment:

Overwear: 4 frags.

Other: 6 frags.

- 1 - black lined body sherd (water vessel?)
- 2 - red brown glazed frag both sides, fine wear.
- 2 - red in brown out frag. medium wear.
- 1 - high gloss black glaze fine wear.

20/4/89

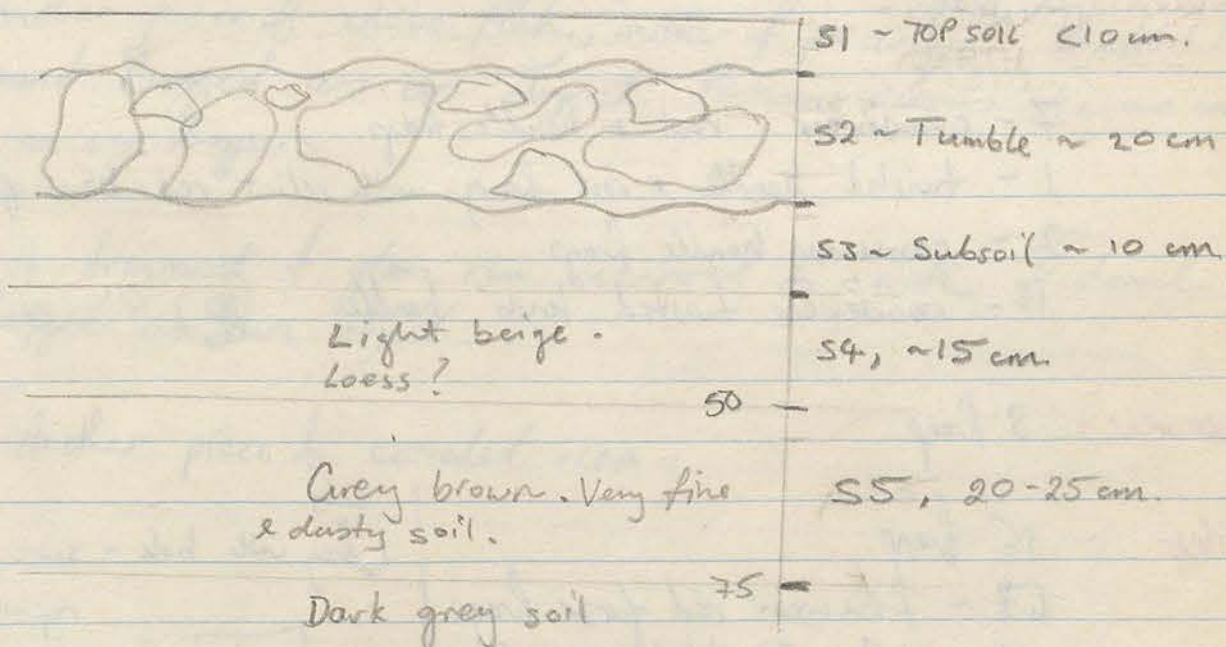

Thurs. 20/4/89 Day 12

Weather: Cool morning with gentle N. breeze. Clear & sunny.

Workers: Unis, Haman, Anas, Fityre

6-30 - The finds of pottery in this trench have been of a fairly uniform small size. The fragments are also worn. The large quantity of bone is also unusual. It is felt that these two factors indicate a roadway. The 'southern' E-W wall was non-existent thus leaving a 2-85 m corridor between 2 walls - one of which has a relatively impressive block (corner stone?). After speaking to Peter, it has been decided to dig a locus to E/R 1-5 m wide & across the southern edge. This will give a good cross-section of the road & show the N-S walls to E/R. The work today will consist of levelling off at the S6/S5 boundary & marking out the locus. Peter leaves for Hahls at 9 am so all of his workers will be divided between Amanda's & my trenches.

9-30 - Piece of iron (corroded) found in N.E. corner by Unis. 65 cm E, 140 south of N.E. corner. Depth 70 cm. Bagged as OB700.

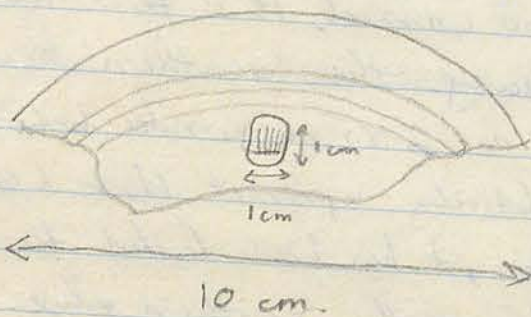

1-00 - Two lots of pottery & bone: N^o 1 Unis (N1) } same strata
N^o 2 Haman (S)

Pottery from 206/4, S 5, Collected 22/4/89

Bases: 8 frags.

- 5 - medium vessel base. Coarsewear.
- 2 - small " " "
- 1 - medium wear 'fish plate' with palmette stamp.

Rims: 29
28
31 frags.

- 78 - eckinors ~ 2 coarse, 2 fine with red glaze, 1 medium w.
- 98 - large vessel coarsewear. 1 - rim of pithos (v heavy & large)
- 98 - notched rim frag ~ 1 medium wear with worn red glaze ~ 7 coarse wear.
- 1 - shallow bowl with out turned rim.
- 5 - medium vessel coarsewear frag. etc

Handles: 12 frags.

- 7 - coarsewear root & handle frag.
- 1 - twisted handle & root frag. with relict red-brown glaze.
- 2 - coarsewear handle frag.
- 1 - coarsewear twisted 'knob' handle.

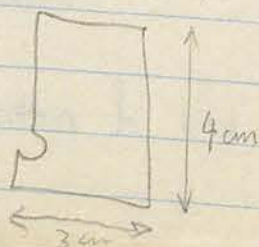

Ⓚ All in one, no gap.

Overwear: 3 frags.

Other: 15 frags.

- 67 - fine wear red glaze frag
- 1 - " " black " "
- 1 - medium wear brown glaze frag
- 2 - black lined (water vessels?)

body
1/2 frag with hole ~ spare piece or repair hole?

Sat. 22/4/87 Day 18

Weather: Mild, clear & sunny morning with light N.W. wind.

Workers: Unis, Hanan, Awaz, Fatyrc.

General:

6.00 - Should level off trench at top of ^{by mid-morning} S6₁ - using one pottery ~~shovel~~ between the two teams. Will then put down locus trench across southern 1.5 m of trench. One bone bag.

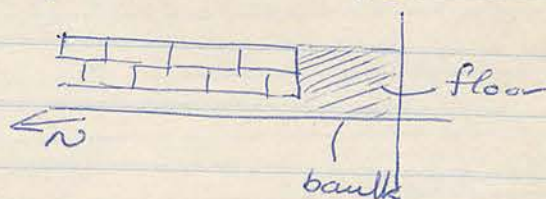

9.00 - The western N-S wall appears to not go any deeper than 1 course of stones. This is the same as the E-W wall to the south of the trench. Are these later occupations when foundations were laid on soil and bedrock? Or, are these coincidental alignments? Unlikely.

10.15 - Piece of iron found in west of trench. Bagged as an object.
 ~~N = 89.236.~~

11.45 - Section of floor has been found in S.W. ^{at the} corner of the end of the N-S wall.

It is compacted limestone.

Depth = 70 cm.

12.00 - Another piece of white flaky, "mother of pearl" shell (?) found. Bagged as an object. Hanan claims it was used as an eye dropper.

12.30 - A fragment of glass rim recovered in south of trench. Bagged as an object.

12.40 - Another piece of corroded iron.

Pottery from 206/4, B 53, Western wall trench. Collected 23/4/89

Bases: 1 fragment ~ medium vessel ring, Coarse ware

Rims: 2 fragments ~ 1 echinus.

~ 1 lipped shallow bowl / plate base

Ovenware: 1 frag.

Other: 1 frag ~ worn red glass medium ware

SEE PAGE 31.

For 206/4 54, 18/4/89

Sun 23/4/89 Day 19

Weather: Mild morning with moderate N.W. breeze 30°C at 11.30.

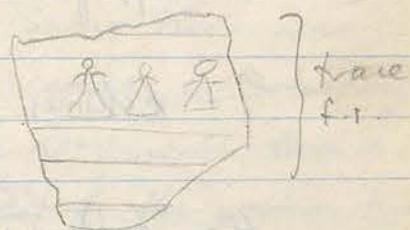

Workers: Unis, Awaz, Fatyre, Haman (in black), Hussein (6.30^{am}) (orange).

General:

6.00 - Set the stringline 1.5 m north of S. bank & set them to it. Will go to ~~Islet~~ Bedrock. This

6.30 - Hussein turned up.

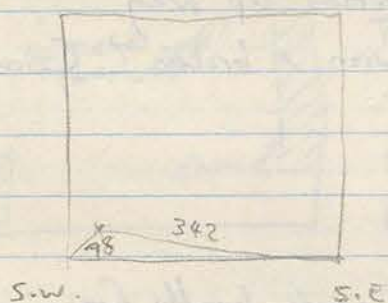

8.30 - Fragment of decorated pottery found:

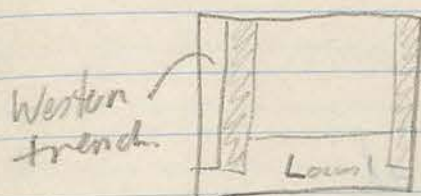

Co-ords: 342 S.E.

78 S.W.

90 cm below S.W.

Peter thinks it is a Megaran pressed relief bowl & that it is datable. Bagged as an object. **N^o 89.273**

11.30 - Stratum 6 is approximately 15-20 cm deep.

12.00 - S6 excavated. Ready to open S7. Also cleaning up the western ^{side of western} N-S wall to give it better definition. Have cleaned the eastern N-S wall.

Pottery from 206/4, ^{East} 57, Collected 24/4/89

Bases: 28⁶ fragments.

- 4 - amphorae bases, coarseware, 1 - decorated with lip.
- 14 - medium vessel, coarseware rings-frag.
- 5 - larger vessel, coarseware ring frag.
- 2 - large, flat based, coarseware vessels.
- 1 - burnished greyware frag.

Rims: 39 fragments

- 9 - echinus. ~ 6 fine ware with glaze
~ 3 coarseware.
- 4 - outturned, shallow vessel bowls ~ plates? Medium wear.
- 2 - notched, coarseware, medium vessels.
- 22 - outturned lipped vessel rims ~ 21 coarseware
~ 1 medium ware with glaze
- 1 - coarseware raised central portion lip frag.
- 1 - pie crust rim? or just worn & broken? Coarseware.

Handles: 9 fragments.

- 1 - cylindrical, black glazed fine ware, small handle frag.
- 5 - root & handle frags.
- 1 - root & rim frag.
- 2 - ellipsoid body frags.

Overwear: 6 - fragments.

Other: 16¹⁵ fragments.

- 3 - circular plugs?
- 10 - glazed frags ~ 8⁴ black ~ 1 green, 5 ~ red.
- 2 - black lined frags.

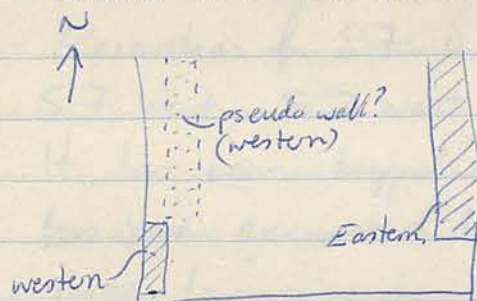

Mon 24/4/87 Day 20.

Weather: High cloud & haze. Mild. Light N.W. Breeze at 6am.

Workers: Unis, Haman (O), Anwar, Fatyeh, Haman (R).

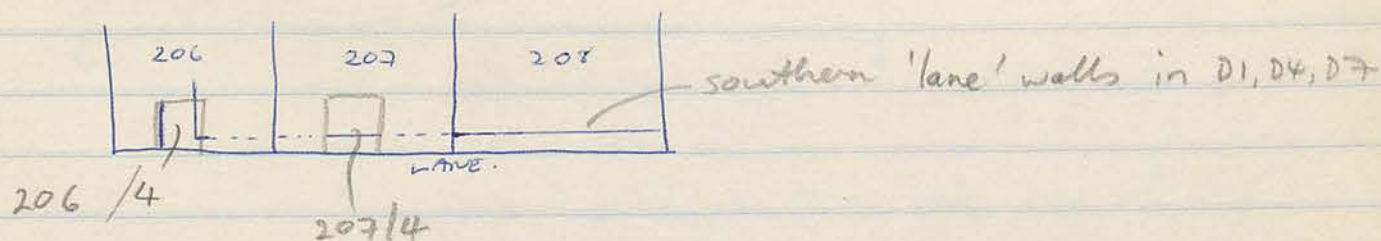

6:00 - Starting on S7. Soil in west of trench is a dark grey whilst to the east it is an orange brown. Have separated the pottery & bone according to east & west. The boundary appears to be about 1.8 m from west, i.e. roughly half & half.

6:30 - It appears that there is a band of crushed limestone across the trench immediately beneath S6. It looks like a floor. Some floor was detected in the western corner, but not the centre, on Saturday. The band is below the level of the ^(pseudo?) western N-S wall thus it is unlikely that they are related. In the ^{south edge} ~~west~~ of the western bank a wall is evident. It has large, well finished blocks at the base which look like corner stones. However, the eastern & western walls ~~are not~~ do not have equal southern edges.

The western wall protrudes $\approx 20-25$ cm through the bank & apparently continues full length although it's not possible to know without removing pseudo (?) wall.

The southern extent of the eastern wall is directly in line with the southern line of the east-west 'lane' walls.

Pottery from 206/4, S 7 WEST. Collected 24/4/89.

Bases: 7 fragments.

- 1 - complete small vessel coarseware ribby with central nipple
- 3 - medium vessel, coarseware ring flange
- 2 - small " "
- 1 - amphora toe

Rims: 15 fragments.

- 3 - ecklers, all fineware & glazed.
- 1 - straight sided neck rim.
- 11 - lipped coarseware vessel necks.

Handles: 1 fragment ~ medium wear root & handle frag with red glaze.

Overwear: 5 fragments.

Other: 2 fragments.

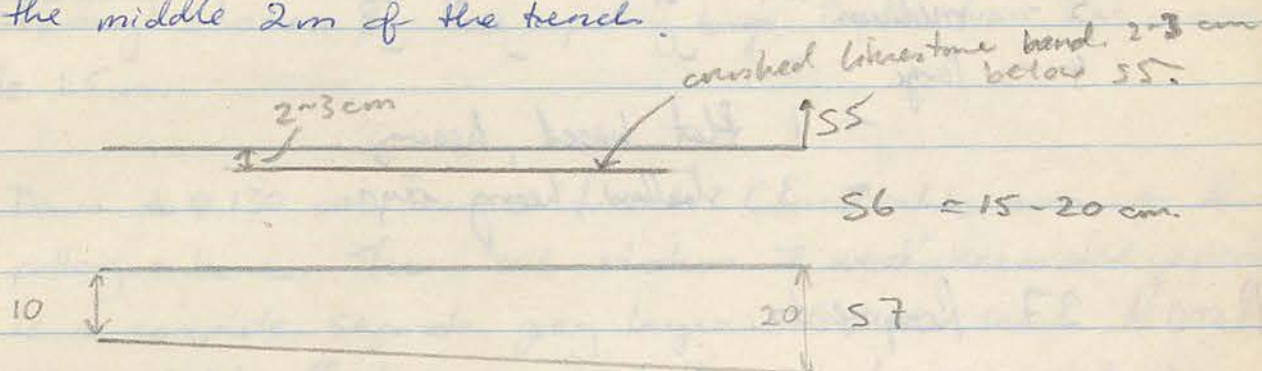

- 1 - rounded frag, plug?
- 1 - frag with scorch marks on inside.

24/8/89 Day 20

8:30

9:00 - S7 excavated across locus. Thickness of stratum 7 varies.
 ≈ 10 cm in ^{west} ~~east~~ & 20 cm in ^{east} ~~west~~.

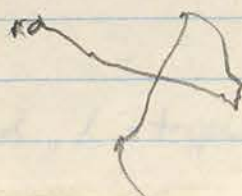

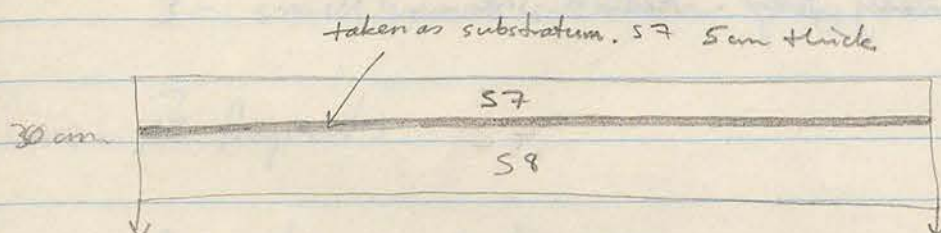

The crushed limestone band is ≈ 5 cm thick & is visible across the middle 2m of the trench.

9:30 S7 not fully excavated yet. Continuing down. No apparent soil change.

10:15-11:45 ~ Surveying of Radi's & Peter's trenches (heights).

12:00 - Excavation of S7 is continuing & is now under the place of S7 West. S7 West must be viewed as a sub-stratum of S7. It has been bagged & labelled separately. About 20 cm of S7 has been excavated below S7 West. The soil is now uniform across locus & is being called S7.

Pottery from 206/4, S 8 N²¹, Collected 25/4/89.

Bases: 16 fragments.

- 7 - small vessel, coarseware, ring frags.
- 5 - medium " " " "
- 4 - large " " " "
- ~ 1 flat based, heavy.
- ~ 3 shallow, heavy rings.

Rims: 27 fragments.

- 7 - echinus - 3 fineware $\begin{cases} 1 \text{ black glaze} \\ 2 \text{ red.} \end{cases}$
4 coarseware $\begin{cases} 2 \text{ black} \\ 2 \text{ red.} \end{cases}$
- 2 - notched medium wear frags
- 1 - outturned shallow bowl / plate frag
- 12 - lipped vessel neck frags, all coarseware.
- 5 - outturned vessel neck frags, all coarseware

Handles: 7 fragments.

- 4 - root & handle frags. ~ 1 large
~ 3 small / medium.
 - 3 - ellipsoid body frags. medium size
- } all coarse

Overwear: 5 frags.

Other: 15 frags.

- 3 - worn glazed pieces ~ 1 black fineware
~ 2 red.
- 11 - black lined frags.
- 1 - rounded frag stopper?

Tues 25/4/89 Day 21

Weather: Mild morning. Hazy. High cloud.

Workers: Unis, Horan (G), Anwar, Fatyre, Horan (N).

6.00 - ~~Starting~~ ^{Starting} stratum ⁸~~7~~. Bone & pottery bags. Depth from S.W. corner is 115 cm.

10.00 - Down to ± 130 cm across trench. Considerable amount of pottery & bone. The 'sub-stratum 7 west' excavated yesterday is a complete, separate grey layer across the trench. It is about 5 cm thick. Must have missed the grey layer in east when doing the surveying yesterday. The grey stratum dips slightly east.

11.00. New layer S9. Similar brown to S8 but has many small ("pebble") stones throughout. Starting depth ± 130 cm.

Pottery from 206/4, S9, Collected 25/4/89.

Bases: 5 fragments

- 1 - fine ware with black glaze & rouletting.
- 1 - brown glazed echinus bowl base.
- 3 - small vessel coarseware ring bases

Rims: 7 fragments

- 2 - echinus, 1 fine ware
- 5 - lipped vessel neck fragments.
- 2 - outturned vessel neck frags

Handles: 4 fragments ~ all root & handle frags, coarseware

Ovenware: 2 fragments

Others: 8 frags: 4 black lined, 3 glazed, 1 stopper(?)

400 body sherds to 76 diagnostics ~ 5:1

Pottery from 206/4, S 4, N.E. corner. Collected 18/4/89.

Bases: 19 frags.

- 8 & - medium sized rings all coarseware.
- 9 # - small vessel rings all coarseware.
- 1 - flat based shallow vessel. Coarseware.
- 1 - bodysherd with hint of base. Coarseware.

Rims: 35 fragments

- 7 - echinus.
- 16 B - notched coarseware rims.
- 7 - lipped medium vessel rims. Coarseware.
- 2 - medium wear outturned neck rims.
- 1 - shallow vessel outturned frag.
- 2 - glazed lipped rims - 1 brown/black
1 brown

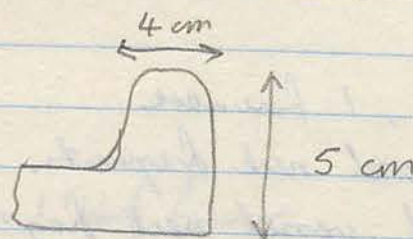

Handles: 12 fragments

- 7 - root & handle fragments. Coarseware.
- 4 - coarseware body frags.
- 1 - cylindrical coarseware body frag $\phi 1.5$ cm, length 5 cm

Overwear: 3 fragments

Others: 7 frags.

1 roof tile frag.

- 2 parthian green frags. 1 v. worn.
- 3 fine wear with red glaze
- 1 rounded frag ~ stopper?

Pottery from 206/4, S 8 N^o 2, Collected 25/4/89.

Bases: 19 Fragments,

2 - amphorae toes.

13 - small vessel frags ~ 11 coarseware

~ 1 with fine black glaze.

4 - medium vessel coarseware frags.

Rims: 16 Fragments.

2 - eckinus - 1 medium wear with red glaze.

11 - lipped neck Fragments - 1 very large coarseware

- 1 medium wear.

- 9 coarse wear.

3 - outturned lipped neck Fragments.

Handles: 2 Fragments. ~ both coarseware

1 - medium wear with brown glaze &  profile.

1 - coarse/orenwear

Orenware: 3 Fragments

Others: 4 Fragments

1 - lamp fragment

2 - round stoppers (?)

1 - medium wear with red paint.

$$f_{56} = \frac{74}{(1.5 \times 4.0 \times 0.20)} = 62 \text{ shards/m}^2$$

Pottery from 206/4, 56, Collected ~~25/4/89~~ 23/4/89. Day

Bases: 12 fragments.

- 3 - medium vessel ring frag. Coarsewear.
- 5 - small " " " "
- 1 - medium wear red glazed ring frag.
- 1 - shallow vessel (plate?) with low ring base. Red/bk
- 2 - amphorae toes

Rims: 33 fragments.

- 7 - echinus
- 11 - coarsewear medium vessel notched rims.
- 8 - coarsewear large vessel rims. Lipped.
- 6 - " medium " " "
- 1 - overturned vessel lip.

Handles: 11 fragments.

- 10 - root fragments.
- 1 - root & rim fragment.

Overwear: 3 fragments.

Others: 15 fragments.

- 4 - blacklined (water vessel?) frags.
- 4 - rounded frags ~ stoppers?
- 7 - glazed frags.
 - ~ 4 grey/black glazed ~ badly worn.
 - ~ 1 red
 - ~ 1 poor quality black glaze

~ 1 frag of pencil relief vessel now OBJECTED.

Wed

26/4/89

Day 22

Weather: Curly east wind with dust. Thundery. Mild.

Workers: Unis, Haman (O), Awas, Fatye, Haman (N)

6.00 - continuing with S9.

6.30 - Have reached the regolith in west of trench. Bedrock fairly close. Will take most of today to clear S9. Very windy & dusty.

8.00 - Piece of corroded iron found. Bagged as an object. From middle of trench. **N^o 89.471**

8.30 - Have stopped work in my trench due to dust & wind. Workers have gone over to Amanda's new trench. May resume later if wind drops.

9.00 - Gave up.

Pottery from 206/4, S9, Collected 26/4/89.

Bases: **No fragments.**

Rims: 6 fragments.

1 - eckitus

4 - Lipped rim frags. (cracks)

1 - outturned lipped neck frag.

Handles: 6 fragments. all root & handle all coarseware.

Others:

~~Others:~~ **89 fragments.**

1 - roofing tile frag.

5 - glasses 2 fine, 3 medium ware.

3 - black lined water vessels (?).

Pottery from 206/4, S9, Collected 27/4/89.

Bases: 9 fragments

- 1 - flat based large coarseware frag
- 6 - small rings, coarseware
- 2 - medium ware glazed.

Rims: 11 fragments

- 2 - eckins, medium ware
- 8 - lipped neck frag, coarseware
- 1 - outturned, large vessel, coarseware

Handles: 3 fragments.

- 2 - root & handle. ~ 1 showing separation of handle.
- 1 - handle fragment.

Ovenware: 2 fragments.

Others: 4 fragments.

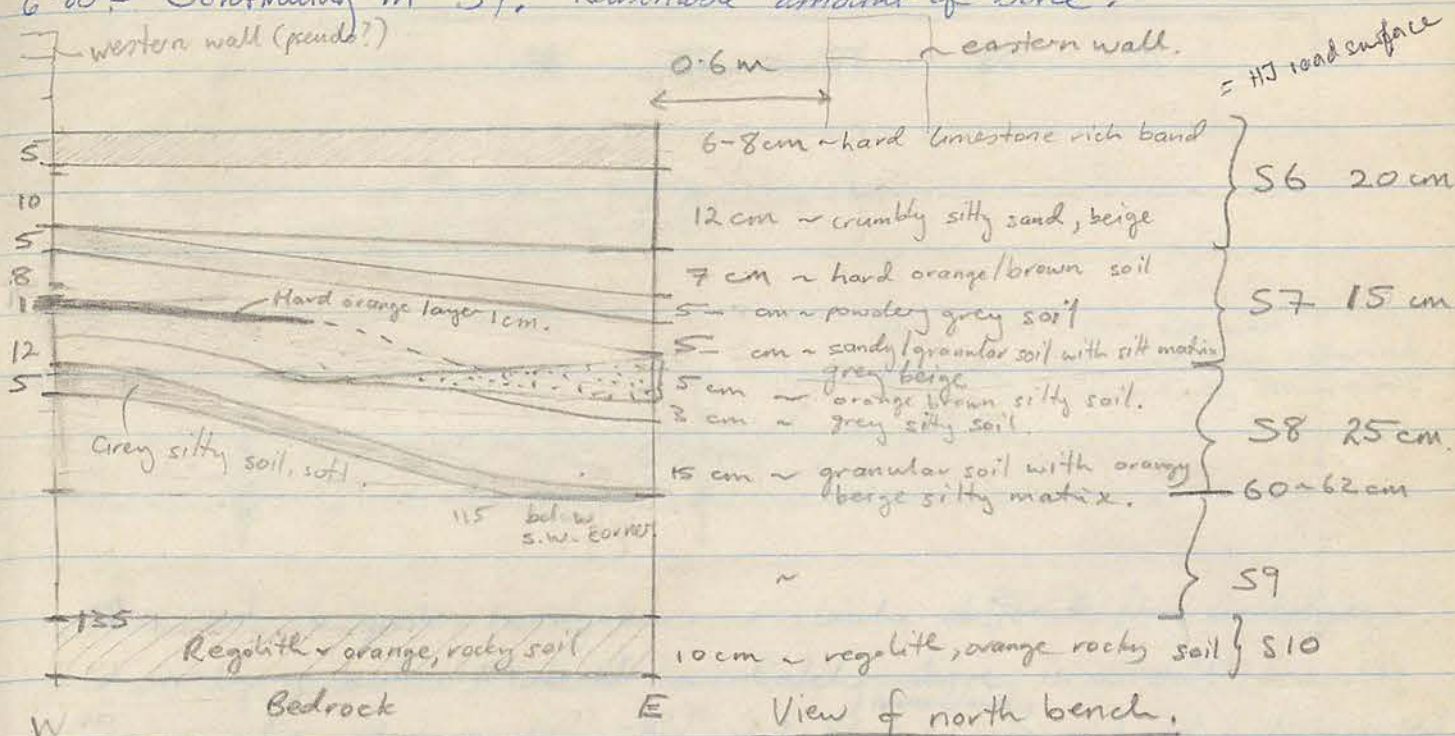

- 3 ~ black lined.
- 1 - possible setre piece

Thurs 27/4/87 Day 23.

Weather: Cool/mild. Overcast. Light N.W. breeze

Workers: Unis, Haman (O), Anwar, Fatyeh, Haman (W)

6:00 - Continuing in S9. Reasonable amount of bone.

The soil ^{strate} clearly dips to the east & wedge out to the west.

7:30 A distinct ^{packet} layer of limestone fill(?) has appeared ^{1-3 ~ 1 m} 93 m from east wall. Also a thin limestone (crushed) band ~ 1-2 cm thick 1 m from east wall & continuous across 1.5 m lower. Having the soil directly above this layer taken off to determine extent of the band.

9:00 - Peter photographed the floor (9-21 & 9-22) ^{slides} & also the western wall (9-23 & 9-24) to show large block sitting above soil - an unusual feature for such a piece.

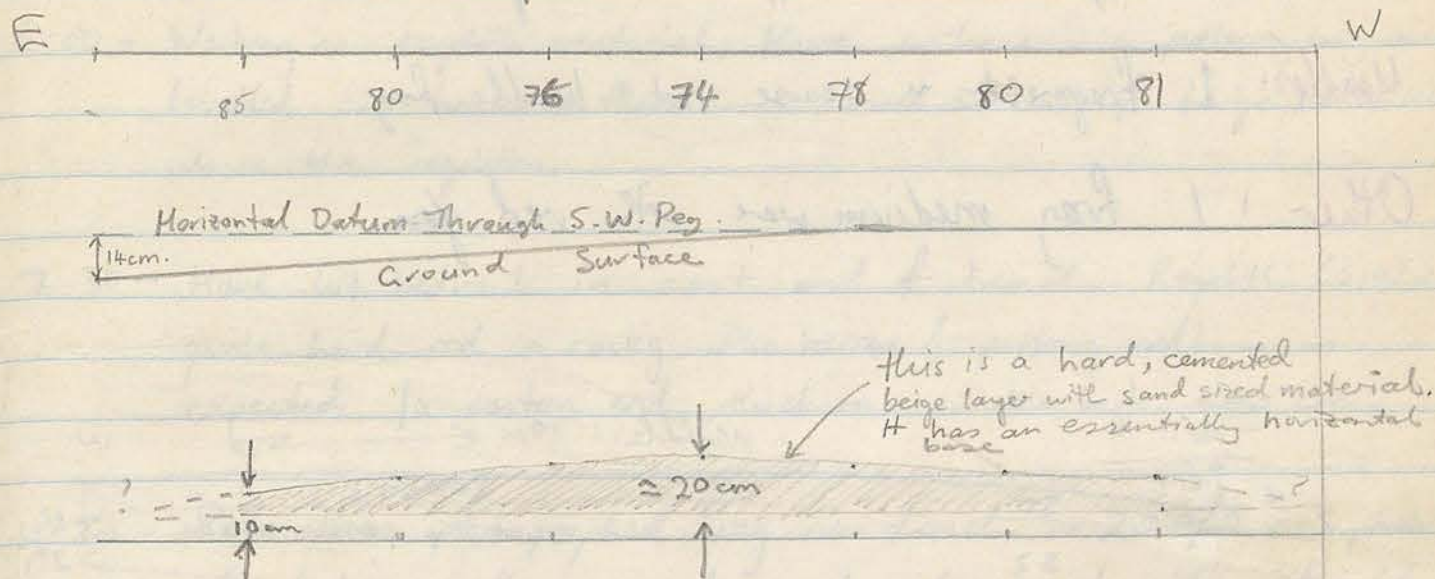

9:30 - Need to excavate to B/R beneath the east wall so that foundations can be investigated. Also want to be able to see some 'floor'. Compromise is to leave 50 cm x 100 cm of 'floor' but take out the rest so that the corner of the wall is revealed to B/R. Using the same pottery zembill & bone bag (S9)

27/4/87

Day 22

10.30 - Almost in the southern bank, there is a stratum of soil which arches over, rising in the middle - camber?

View of South Bank.

The soil is quite homogeneous & clearly different from underlying & overlying beds. Material immediately above is a soft, crumbly grey matrix with granules. The material immediately below is a hard well cemented stratum. Beneath this is a 10cm stratum of greyer soil of similar texture & composition - a previous road surface? The lens is capped with a thin band of harder material, although of similar colour.

11.30 - Small fragment of bronze (pin?) uncovered in S.E. of trench. Begged as object. Close to S9/S10 (regolith) boundary.

1.00 - The cambered surface is very apparent in south bank & to some extent in the northern wall of the 1.5m trench. In the north face, the soil strata drop off to the east although not at the same depth. Stratum 6 appears to be slightly lenticular & of the same soil. It is also capped by a hard band although in this case it is clearly a white limestone band. They are probably related.

145. ie. 2 road levels at 5 to 6 and 9

How related to walls?

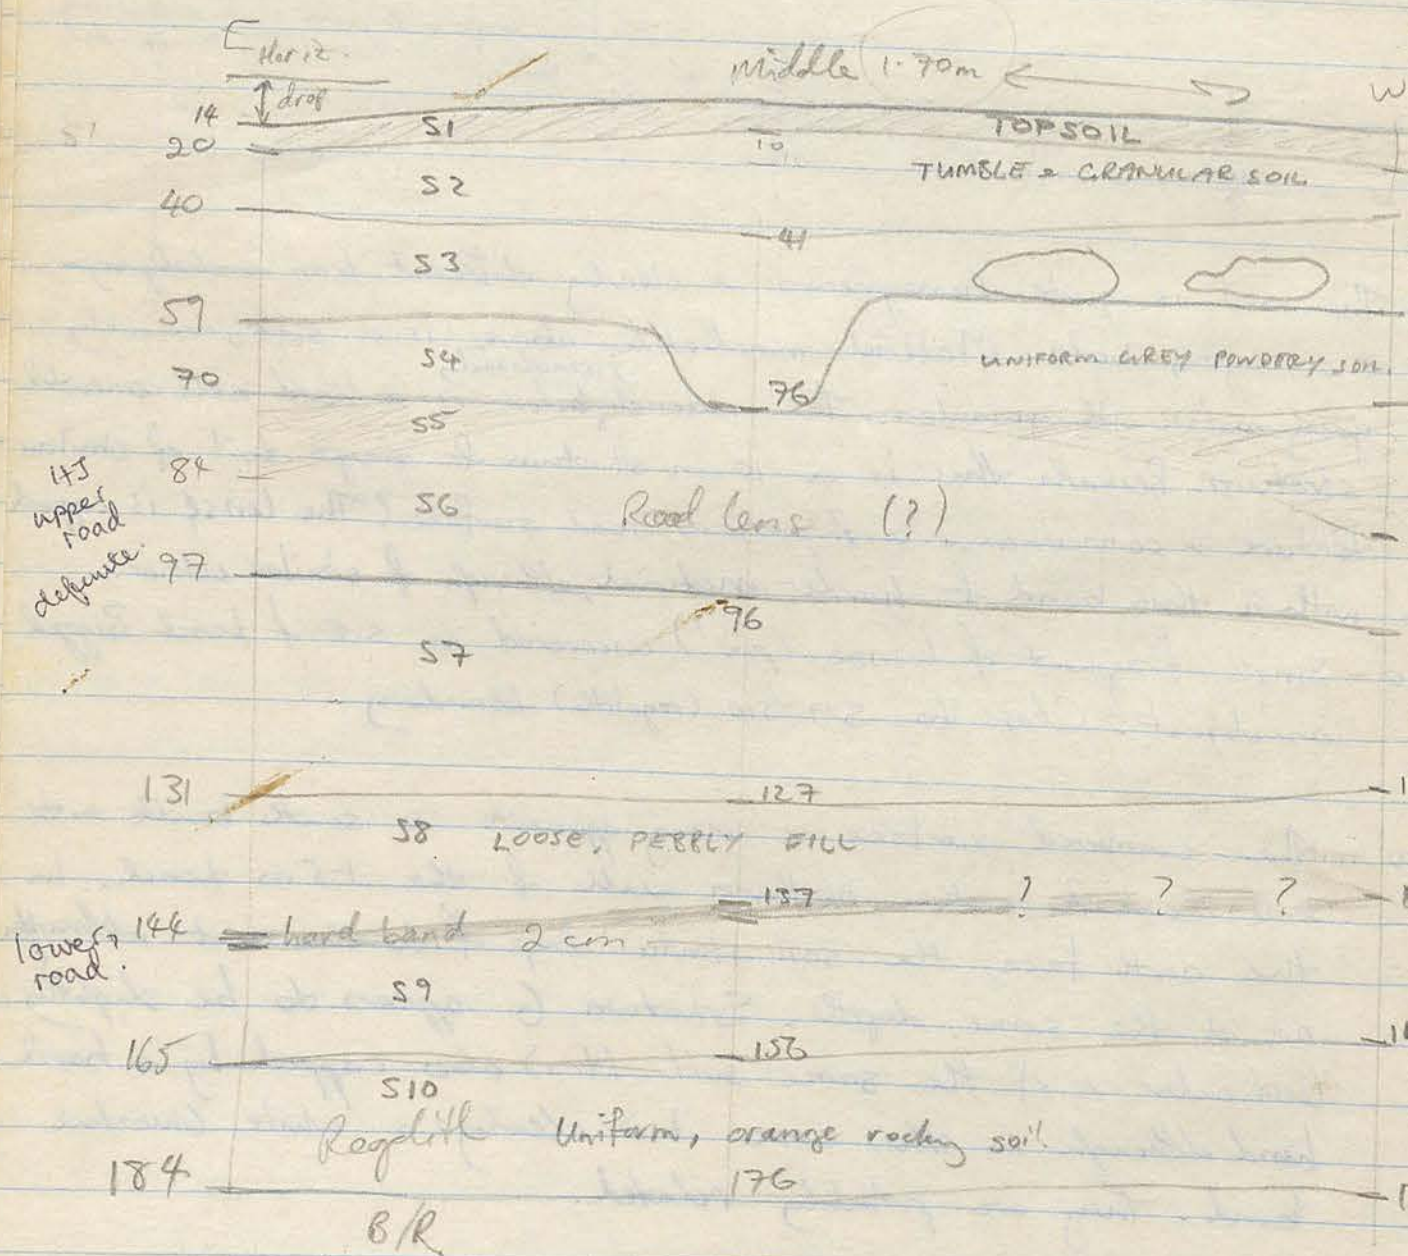

Pottery from 206/4, S9, collected 1/5/87

Bases: 1 fragment ~ small coarseware ring frag.

Rims: 3 fragments ~ all lipped neck frags. Coarse

Handles: 1 fragment ~ coarse root & handle frag.

Other: 1 frag medium ware with red glaze

Monday 1/5/89. Day 24

Weather: Mild, hazy morning.

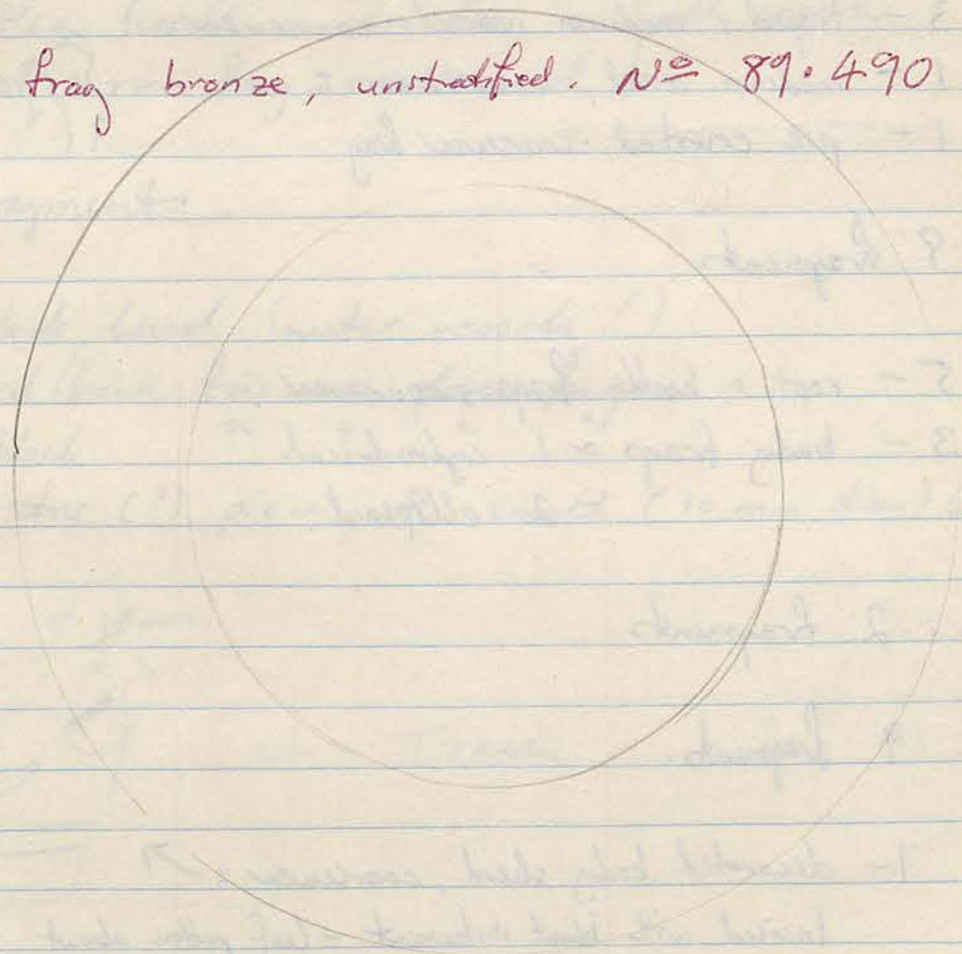

Workers: Unis, Haman (O), Awaz, Fatymre, Haman (N)

6-00 - Working on regolith material. Have a bone & a pottery bag and labelled 59 because there is a small amount of beige (59) soil above the regolith.

7-30 - Have hit bedrock in east end of trench. Regolith (510) is quite hard, red & rocky. Also barren of pottery and bone as expected. In eastern end, thickness is variable but < 15 cm.

11-30 - Peter has photographed my new trench ~ 207/2. 3 photos all looking north: general, west side, east side. Should be able to start tomorrow on some clearing. Should get out (almost) all the regolith material today.

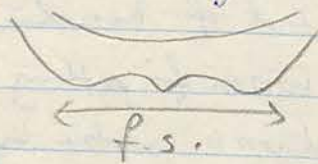

Small frag bronze, unstudied. No 89.490

Pottery from 206/4, 55, Collected 22/4/59.

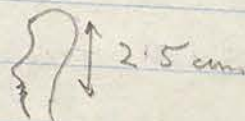

Bases: 9 fragments.

- 64 - medium vessel coarseware for ring frags
- 1 - medium wear ring base, red glaze
- 1 - small vessel ring frag, coarseware
- 1 - deepened flat base with ripple ~ small vessel, medium wear, red glaze:

Rims: 9 fragments.

- 1 - echinus, small bowl, coarseware.
- 3 - coarseware, medium vessel, notched.
- 3 - lipped, medium vessel, coarseware.
- 1 - medium vessel, coarseware &
- 1 - pie crusted, coarseware frag.

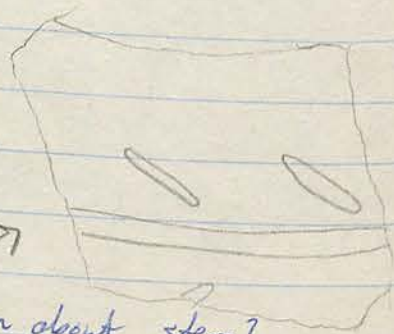

Handles: 8 fragments.

- 5 - root & handle frags, coarseware.
- 3 - body frags ~ 1 cylindrical
~ 2 ellipsoid.

Ovenware: 2 fragments.

Other: 9 fragments.

- 1 - decorated body sherd, coarseware: →
Incised with blunt instrument ~ leaf pattern about stem?

- 3 - red glaze body sherds.
- 4 - black lined coarseware frags. Water vessels?

Pottery from 206/4, 55, Collected 19/4/89.

Bases: 6 fragments.

- 5 - ring base frags, all coarse & small/medium.
- 1 - mediumware, scorched, ring frag.

Rims: 11 fragments.

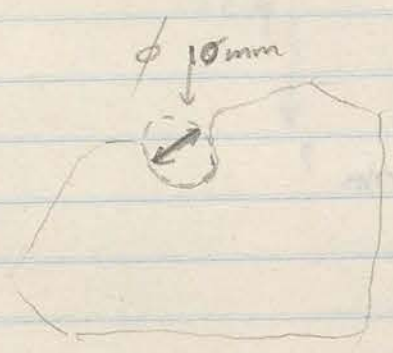

- 2 - edrims, small, coarse.
- 1 - coarse, pie crusted,
- 7 - neck frags with lip, coarse.
- 1 - notched neck frag, coarse.

Handles: 5 fragments

- 3 - root & handle frags.
 - 1 - reflex handle & rim frag.
 - 1 - root & rim frag, small vessel
- } all coarse

Other: 14 fragments.

- 2 - black lined (water vessels?)
- 10 - red/brown fine ware glaze frags
- 1 - black
- 1 - stone (?) piece with small (10 mm diam) hole.

Trace over photo - 1

Pottery from 207/2, 52, Collected 2/5/89.

Bases: 2 fragments.

1 - medium sized ring base frag.
1 - small " " " } coarseware

Rims: 7 fragments.

1 - echinus
4 - outturned, lipped neck rims, 1 fineware
2 - notched, coarseware 3 coarse

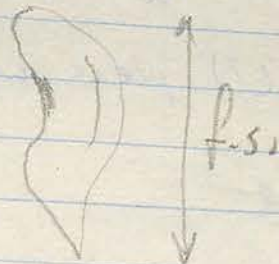

Handles: 2 fragments.

1 - root & handle frag.
~~1~~

~~are 1 fragment.~~

Others: 2 frags.

1 - piece of figurine. Now 'objected'.

1 - badly worn diagnostic ~ rim?

Tuesday 2/5/89 Day ²⁵~~24~~

Weather: Mild am & very little breeze.

Workers: Unis, Haman (O), Anas, Fatyone, Haman (N).

6.00 - Last foot of regolith to be removed. No pottery or bone bags.
Laid out 2 trenches with Bryce till 7.

8.00 - Trench cleaned & photographed. Note the eastern wall is not quite on B/R but rests on the (firm) regolith. Photos 10-7 through to & including 10-21.

8.30 - 206/4 finished. Moved to 207/2. Opening pottery & bone bags. S1 ~ topsoil.

Object found during sorting of pottery (figurine frag)

N^o 89.365

Pottery from 207/2, S3, N^o1 Collected 4/5/89.

Bases. 10 fragments.

- 1 - 'fish plate', coarseware.
- 2 - joining pieces of small shallow bowl. 
- 1 - complete small ring.
- 4 - small, coarse vessel ring frags.
- 1 - amphora toe
- 1 - amphora (miniature) toe. 

Rims: 28 fragments.

- 9 - eckinus.
- 4 - flat outturned neck rim frags. 
- 3 - shallow vessel/plate frags. All coarse
- 9 - lipped, outturned neck rim frags. ~ 2 adjoining.
- 2 - straight sided neck rim frags/bowl rims.

Handles. 4 fragments.

- 2 - root fragments.
- 1 - root & rim frag.
- 1 - body frag.

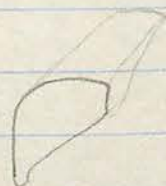

Ornware: 4 fragments.

Others: 9 fragments.

- 6 - red glaze frags.
- 1 - red glaze frag with striations: fan shaped like scallop shell.

- 1 - rounded piece ~ stopper?
- 1 - unidentified grey fabric piece.

Pottery from 207/2, SG no 1, Collected 18/5/89.

Bases: 8 fragments.

- 1 - amphora toe
- 5 - small vessel rim frag. - coarse
- 2 - medium " " " coarse

Rims: 7 fragments.

- 1 - echinus.
- 1 - shallow vessel rim, black glaze (could be a base),
- 3 - lipped rim frag, coarse.
- 2 - outturned, lipped neck frag.

Handles: 1 fragment - medium vessel body, coarse

Ovenware: 3 fragments.

Other: 14 fragments.

- 1312 - black lined/scorched frag.
- 1 - red painted frag.

Pottery from 207/2, S1, Collected 3/5/89

Bases: 2 fragments.

- 1 - small, coarse ^{ing} frag.
- 1 - medium, " "

Rims: 7 fragments.

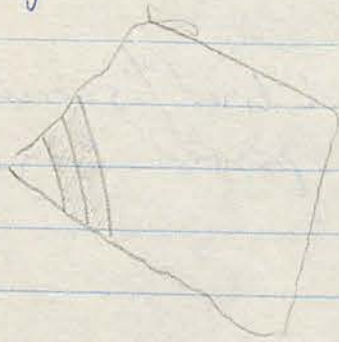

- 1 - eckins, ^{medium} fine ware
- 1 - straight edged, fine ware red glazed frag
- 5 - outturned, liped neck frags, all coarse

Handles: 1 fragment ~ root & body frag, coarse

Greenware: 1 fragment

Others: 4 fragments.

- 1 - worn greyware frag.
- 1 - black lined.
- 1 - incised frag.

full scale.

Weds Day 26 3/5/89

Weather: Mild, still raining. 21°C at 6am.

Workers: Unis, Haman (ol), Awarz, Fatymre, wife of Haman (w).

6.00 - Continuing on S1. 1 pottery bag.

10.15 - Finished S1. No bone. Will clean off tumble and get it photographed (S2)

1.00 - A small amount to be done tomorrow.

Bag, S1.

Pottery from 207/2, S3, Collected 4/5/81. S3 N°2
Bases: 3 fragments

- 1 - amphora toe, smallish.
- 2 - coarseware ring bases, small vessels.

Rims: 8 fragments.

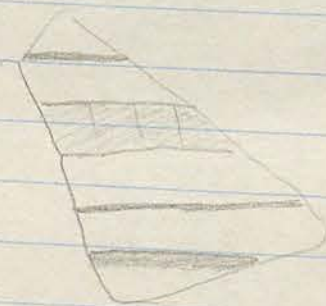

- 3 - large vessel straight lipped necked coarse frags ~ related but not adjoining.
- 1 - echinus coarse
- 1 - lipped shallow bowl/plate coarseware
- 2 - lipped neck vessel frags, coarseware.
- 1 - parthian green glass, pie crusted frag.

Handles: 3 fragments

- 2 - root & handle frag. 1 ~ grey burnished ware.
- 1 - root & handle frag coarseware, related to rim frag above. Similar fabric & colouring.

Others: 2 fragments.

- 1 - red glaze
- 1 - horizontally ribbed frag.

See p38 for S3 N°1

Thurs Day 27

4/5/89

40.

Weather: Close, still morning. Completely overcast.

Workers: Unis, Haman (v), Anwar, Fatymre, Wife of Haman (w) ^{H(w) 45-70}
_{wife home}

6.00 - Did final trowelling & sweep. Photographs 10-34/36
All looking North

6.30 - Removing tumble. Pottery into S2.

7.30 - Tumble cleared. Opened pottery & bone traps for S3.
Filled

11.00 - N^o 1 pottery filled. Opened S3 N^o 2.
Iron nail found. Bagged as an object.

Pottery from 207/2, S2, Collected 4/5/89.

Bases: 3 fragments:

- 2 - small vessel coarseware rim, 1 complete.
1 - amphora toe.

Rims: 4 fragments.

- 1 - large vessel coarseware neck frag.
2 - medium vessel lipped neck frags. } all coarse.
1 - shallow vessel outturned frag.
1 - notched frag, neck.

Handles: 1 fragment ~ root & handle frag, coarse

Others: 3 fragments.

- 3 - All glaze pieces, 2 black, 1 brown - all worn.

Pottery from 207/22, S 3 N^o 1, Collected 8/5/89.

Bases: 11 fragments.

- 6 - small ring base frags. Coarse.
- 1 - large ring " "
- 2 - medium vessel, coarse, flat bases.
- 2 - amphora toes.

Rims: 20 fragments.

- 7 - echinus ~ 2 with fine black glaze
- 3 - flat outturned neck frags., coarseware
- 6 - lipped outturned neck frags., coarseware
- 1 - coarseware plate frag
- 1 - red glazed shallow bowl with notched edge, base evident.
- 2 - straight edged bowl rims. → 

Handles: 10 frags.

- 1 - complete handle/body coarseware vessel. 
- 6 - root fragments, all coarse.
- 3 - body frags, 1 cylindrical } coarse.
2 ellipsoid }

Others:

Ovenware: 1 fragment.

Others: 1 fragment ~ rounded piece, stopper?

Monday

Day 28

8/5/87

Weather: Clear, sunny, cool morning. Warm day, not hot.

Workers: Unid, Hanan (O), Anas, Fatymre, Wife of Hanan (W)

6.00 - Continuing with stratum 3. Moving from east to west.
Bone & pottery bags open.

8.30 - Circular fragment of pottery with pined relief uncovered in north of trench. Depth 50cm below N.W. corner. Possibly a lamp fragment. Bagged as an object.

8.45 - Piece of basalt grinding stone found. Same depth & area as lamp (?) fragment. Bagged with S3 N.2.3 (Pottery).

10.00 - Piece of figurine found in N.W. corner. Depth 50cm. Bagged as an object.

full scale.

Pottery: S3 nos 1, 2, 3, 4 & 5

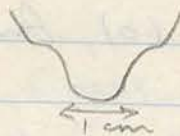

Bone: S3

Objects: 2 bags.

Pottery from 207/2, S3 N^o 1, Collected 9/5/89

Bases: 54 fragments.

- 1 - large ring.
- 1 - 'nipple' amphora toe
- 3 - ring base frags.

Rims: 19 fragments.

- 6 - eckins, 3 fineware painted.
- 8 - lipped neck frags.
- 2 - notched neck frags.
- 2 - straight neck frags.
- 1 - plate frag.

Handles: 6 fragments.

- 1 - complete medium vessel, coarse loop handle.
- 1 - fine cylindrical handle.
- 3 - root frags, coarse.
- 1 - ellipsoid body frag, coarse.

Others: 8 fragments.

- 3 - rounded stoppers (?)
- 2 - incised pieces ~ blunt instrument.
- 1 - brown glaze.
- 2 - worn frags ~ rims?

42.
29.
Tuesday 9/5/87 Day 28

Weather: Cool morning, n.w. breeze.

Workers: Haman (O), Uris, Anwar, Fatyore, wife of Haman (W).

6:00 - Have approx. half the trench to excavate. Bone & pottery bags.

8:15 - Opened second pottery bag in S3 for today.

10:30 - opened third S3 bag.

- A fragment of glass found in S.E. of trench. Bagged as an object.

Pottery: S3, nos 1, 2 & 3.

Bone: S3 (one only).

Objects: 1 only.

Pottery from 209/2, S 3, Collected 10/5/89.

Bases: 7 fragments.

- 4 - small vessel rings.
- 2 - medium vessel rings.
- 1 - plate base

Brim: 21 fragments.

- 2 - echinus, + ~~medium wave with black paint~~.
- 3 - notched neck fragments, coarse.
- 4 - large/medium vessel neck frag, coarseware, outturned
- 1 - small vessel neck frag, mediumware outturned
- 1 - painted neck frag, outturned.
- 4 - lipped neck frags, all coarse.
- 5 - shallow vessel/plate rims, 1 painted & downturned

Handles: 3 fragments.

- 2 - root frags.
- 1 - body frag.

Ovenware 4 fragments.

Others: 12/13 fragments.

- 2 - roofing tiles.
- 5 - red slip/glossed frags.
- 1 - internal black glaze.
- 1 - lined frag - water-vessel.
- 1 - decorated neck frag of large vessel - incised lines
- 1 - ribbed frag

1 - unidentifiably worn rim (!) frag.

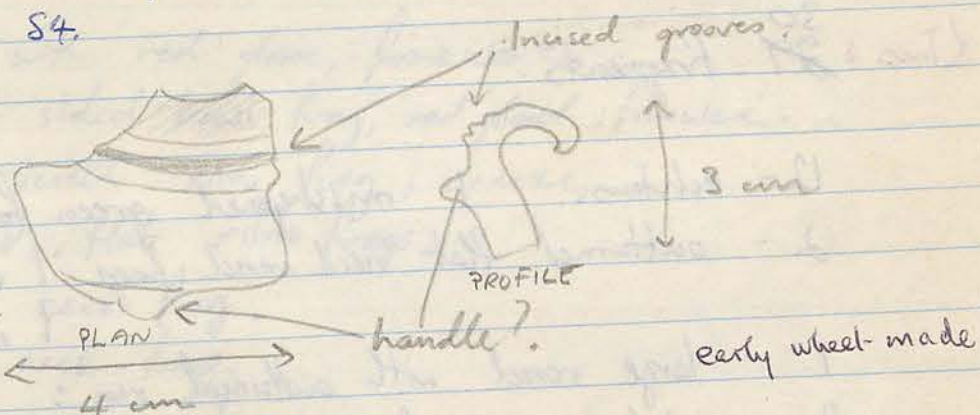

Weds. 10/5/87. Day 21.

Weather: Moderate breeze from N.W. Very hazy/dusty.

Workers: Unis, Haman, Fatyme, Harnum (wife of Haman(N)).

6.00 - Opened bags for bone & pottery. Small amount of S3 to be removed.

8.30 - Fragment of black glazed lamp uncovered. Bagged as an object. From S4.

8.30 - Changed layer to S4. New bone & pottery bags.

10.30 - Piece of pavilion green glazed plate rim found. Looks yellow with 'mother-of-pearl' shimmer on top. Bagged as an object.

Large piece of vesicular basalt grinding stone found.

12.30 - Stratum 4 is slightly more orange than the grey beige of S3.

Pottery - S3, S4 Nos 1 & 2

Bone - S3, S4.

Objects - 2 bags.

Pottery from 207/2, S3 N^o 2, Collected 8/5/89.

Bases. ¹³/~~12~~ Fragments.

- 1 - red glazed base/rim shallow bowl frag. Medium ware.
- 5 ~~4~~ - small ring coarse frags.
- 3 - medium ring coarse frags.
- 3 - amphora toes.
- 1 - heavy vessel flat base, coarse.

Rims ³⁰/~~27~~ Fragments.

- 12 - echinus. 1 misshapen green fabric sherd.
- 2 - outturned flat neck vessel frag. 1 coarse & large.
1 medium & small
- 1 - large vessel with outturned rim: 
- 2 - notched neck frags.
- 5 - straight sided rim frags, all coarse.
- 7 - loped outturned neck frag. 1 medium ^{ware} with red glaze
6 coarseware.
- 1 - shallow vessel/plate rim.

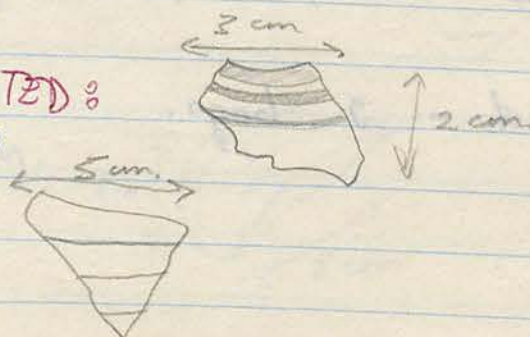

Handles: 6 Fragments.

- 1 - root & rim small necked coarseware vessel.
- 4 - root frag, 1 with  handle body, coarse.
- 1 - ellipsoid body frag, coarse.

Overwear, 1 Fragment.

Others: 8 Fragments:

- 1 - terracotta piece?  OBJECTED:
- 1 - lamp fragment, black, OBJECTED:
- 2 - black lined frag - water vessels?
- 1 - incised piece:
- 3 - rounded stripes (?)

Pottery from 207/2, S3 n°3, Collected 8/5/87.

Bases: 3 fragments.

- 1 - small vessel ring frag. } all coarse.
- 2 - medium " " " }
- 44

Rims: 11 fragments.

- 1 - eckinus with red glaze, fine ware.
- 1 - straight sided bowl frag, red glazed, fine ware.
- 1 - shallow vessel rim frag, coarse.
- 3 - outturned, flat rim frags.
- 1 - notched neck frag.
- 3 - lipped neck frags.
- 1 - small vase neck.

Handles: 3 fragments.

- 2 - ellipsoid body frags.
- 1 - circular body frag with root.

(Overmould) 1 fragment.

Others: 10 fragments.

- 1 - roofing tile
- 4 - red glazed/slip pieces.
- 1 - black glaze.
- 1 - brown glaze.
- 1 - figurine fragment -

Trace of figurine frag.

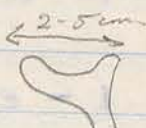

Pottery from 207/2, S3 N^o ~~4~~⁵, Collected 8/5/89

Bases: 3 fragments.

- 1- complete, small ring base, coarse.
- 1- shallow vessel ring base, coarse
- 1- medium vessel ring frag, coarse.

Lims: 5 fragments.

- 1- large vessel with large outturned, grooved lip.
- 2- shallow vessel outturned rims, 1 with red glaze, medium ware.
1 with brown glaze.
- 2- lipped neck frags, both coarseware medium vessels.

Handles: 3 fragments

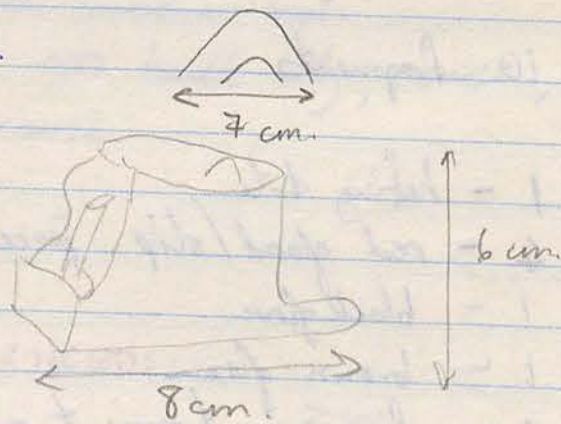

- 1- ellipsoid body frag, coarseware
 - 1- root frag.
 - 1- root & handle frag.
- } all coarse.

Ovenware: 1 fragment.

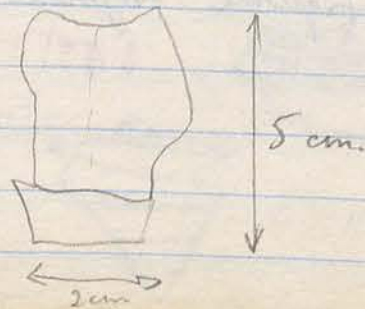

Other: 5 fragments.

- 1- 'coping' roof tile frag.

- 1- blacklined frag.
- 1- brown glazed frag.
- 1- large, interesting blob figurine?

- 1- small, interesting blob figurine?

Pottery from 207/2, S3 N⁴~~2~~, Collected 8/5/89

Bases: 5 fragments.

- 4 - small vessel rings, coarseware
- 1 - amphora toe.

Rims: 20 fragments.

- 7 - eckmrs.
- 4 $\frac{1}{2}$ - shallow vessel frag ~ one with red & black glaze - medium ware
- 1 - red glazed medium ware small bowl with lip. Part of base shows.
- 3 - notched medium vessel neck frag, coarse.
- 2 - lipped, outturned neck vessel frag, coarse, (1 med, 1 small)
- 3 - outturned, flat neck vessel frag, coarse.

Handles: 6 fragments.

- 1 - complete medium vessel handle. coarseware
 - 1 - large vessel, ellipsoid body frag ~ amphora.
 - 2 $\frac{1}{4}$ - root fragments.
 - 2 - root & handle frags. 1 ~  with central ridge
- } All coarse

Oven: 1 fragment

Other: 3 fragments.

- 1 - blackglazed outer, red glazed inner mediumware body sherd
- 1 - black lined frag.
- 1 - rounded piece (stopper?)

Pottery from 207/2, S4 N^o 1, Collected 11/5/89.
Bases: 9 fragments.

- 1 - complete, small vessel ring base, coarse.
- 6 - small vessel ring frags, coarse
- 1 - medium ware 'fish plate' frag, red paint.
- 1 - " vessel ring.

Rims: 24 fragments.

- 5 - echinus.
- 2 - notched neck frags, coarse.
- 3 - straight sided rim frags, 1 mediumware.
- 7 - lipped neck fragments, coarse.
- 7 - shallow bowl/plate frags. 1 fineware black glaze.

Handles: 43 fragments.

- 2 - root & handle frags. } all coarse
- 1 - root & rim frag

Ovenware: 4 fragments.

Others: 9 fragments.

- 4 - lined frags ~ water vessels?
- 3 - decorated ~ 1 black glaze fineware
~ 2 red paint.
- 1 - rounded stopper (?)
- 1 - suspected amphora toe ~ rounded 'blob' piece.

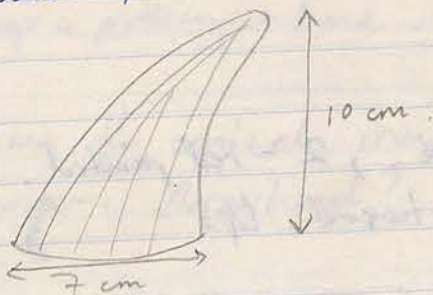

Thursday 11/5/89 Day

46.
31
30.

Weather: Fine, sunny, cool a.m.

Workers: Unir, Harnan, Fatyma, Harnum.

6:00 - Slowly continuing with S4 along north bank. Stratum is about 20 cm thick. Opened pottery & bone bags. Large horn uncovered, now in Bone Bag.

7:45 - Pottery bag S4 N²2 opened.

10:30 - Pottery bag S4 N²3 opened.

Pottery - S4 N²5 1, 2 & 3.

Bone - S4.

Objects - Nil

Pottery from 207/2, S4 N=1, Collected 13/5/89

Bases: 10 fragments.

- 2 - small vessel ring bases ~ 1 red slip.
- 7 - medium vessel ring frags. ~ 1 brown slip.
- 1 - complete medium ring frag, coarse

Rims: 22 fragments.

- 9 - eckinus, 1 ~ black glaze, 2 ~ red painted.
- 1 - large eckinus with overturned lip.
- 2 - notched neck frags.
- 4 - outturned, flat, neck frags.
- 1 - lipped neck frags, cooking vessel
- 1 - fineware black glazed plate / shallow bowl
- 2 - straight sided rim frags.
- 1 - overhanging lipped rim.
- 1 - large vessel codrre (storage jar) (pithos) red paint inside.

Handles: 2 fragments.

- 1 - rim & handle frag of ^{medium} ~~small~~ diam neck vessel, coarse
- 1 - rim & handle frag of small " " " , cooking.

Crenware: 1 fragment.

Others: 10 fragments.

- 1 - mollusc shell
- 2 - red slip frags, 1 medium, 1 fineware.
- 2 - lined frags.
- 1 - tile frag.
- 1 - red & black painted frag.
- 1 - rounded 'stipe'.
- 1 - decorated incised 3
- 1 - black glaze, worn.

Sat.

13/5/89

Day

47.

32

21

Weather: Clear, sunny, still.

Workers: Unis, Hanan, Fatyone, Harroun

6-00 - Half way through s4. A wall may be appearing in N-S baulk & also in E-W baulk but need further excavation. Bagged pottery & bone. Mollusc shell uncovered at s4/s5 baulk

9-00 - Piece of conical iron found along south baulk in western corner. Arrowhead? Bagged as an object.

10-30 - Piece of transparent material ~ glass?, quartz?, calcite? Bagged as an object.

11-15 - s4 N^o 3 opened.

Pottery: s4 N^{os} 1, 2 & 3.

Bone: s4

Objects: 2.

Pottery from 207/2, S ~~4~~ 1007, Collected 14/5/89.

Bases: 8 fragments.

- 2 - complete, small vessel rings, coarse.
- 1 - amphora toe
- 1 - flat based bowl base, coarse.
- 1 - small ring frag, coarse
- 3 - medium ring frags, all coarse.

Rims: 22 fragments.

54 - ecdysis -

- 1 - notched neck frag, coarse.
- 54 - shallow vessel/plate rim frags, 1 greyware, 1 red painted
- 4 - straight sided rim frags, all medium-fine ware
- 2 - outturned, flat neck frag.
- 5 - lipped neck frags.

Handles: 2 fragments.

- 1 - complete small vessel handle
- 1 - root frag.

(Ovenware) 9 fragments.

Others: 12 fragments.

- 1 - ribbed pithos type coarse, large storage vessel frag.
- 3 - rounded styres.
- 4 - red painted frags.
- 1 - fine ware black glazed frag.
- 2 - black lined frags.
- 1 - red & black painted frag.

207/2

Sun 14/5/89

35.9.

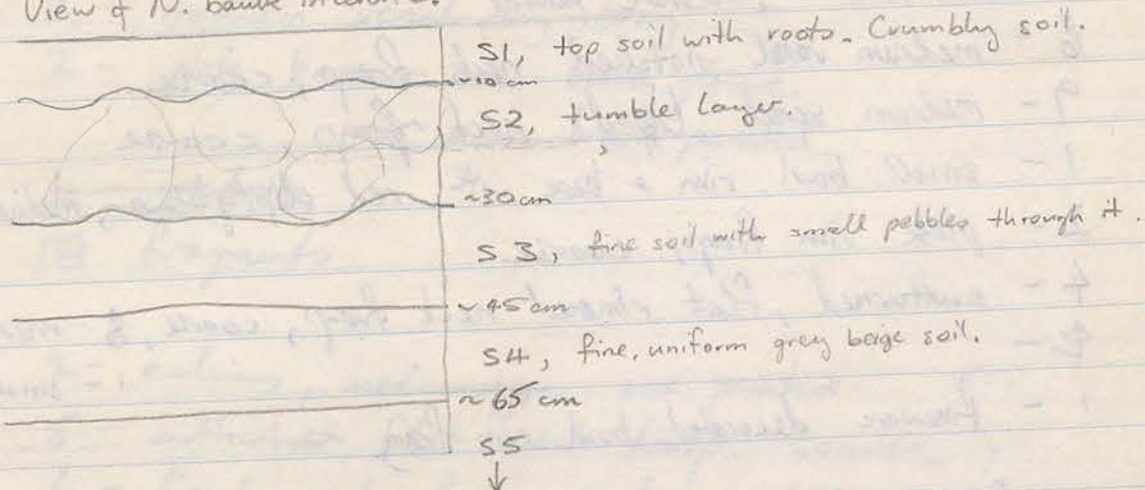

Weather: Mild, clear, sunny, light breeze. Hot later.

Workers: Unis, Haran, Fatyme, Harnum.

6:00 - Small amount of S4 in NW corner.

8:30 - Commencing S5.

View of N. bank in centre.

North-south wall in east of trench taking shape in north. Still lacks definition in south. E-W wall in south is not clearly evident.

10:00 - Haran home sick.

10:30 - Piece of iron found next to N-S wall about 1.5m in from S bank. Bagged as object.

noon - Unis claims that there is a floor below S5. If so, will level it there & dig a locus to bedrock. Southern E-W wall is apparent in east.

Pottery: S4, S5 nos 1 & 2

Bone: S4, S5

Objects: 1 only

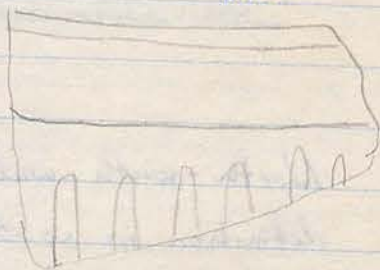

Pottery from 207/2, S3 n^o 2, Collected 9/5/89

Bases: 4 fragments.

- 3 - small rings, coarse.
- 1 - medium " "

Rims: ³⁰~~29~~ fragments.

- 7 - ecklon, 1 fineware painted.
- 6 - medium vessel notched neck frag, coarse.
- 9 - medium vessel lipped neck frag, coarse.
- 1 - small bowl rim & base with red slip/glaze, mediumware.
- 2 - plate rim frag, coarse.
- 4 - outturned, flat rimmed neck frag, coarse, 3 - medium.
- 4 - 1 - small.
- 1 - fineware decorated bowl rim frag. →

Handles: 5 fragments.

- 1 - handle & rim frag. (notched) coarse
- 3 - root frags, coarse
- 1 - body frag with helical twist, coarse

Overware: 1 fragment.

Others: 8 fragments.

- 3 - red slip/glaze frags.
- 1 - black ~ brown (?) glaze.
- 3 - incised fragments.
- 1 - peculiarly shaped pined frag.

Trace.

Potters from 207/2, S3 N^o 3

Collected 9/5/89.

Bases: 12 fragments.

- 2 - complete small rings,  coarseware.
- 4 - small/medium vessel ring frag. coarse.
- 1 - amphora toe
- 1 - amphoriskos toe
- 2 - medium vessel ring frag.
- 2 - plate base ~ one black glaze
~ one brown painted.

1 - medium

Rims: 18 fragments.

- 2 - eckins, mediumware, one painted
- 5 - outturned, flat neck frag. coarse
- 6 - lipped neck frag, 1 fineware with red slip.
- 2 - notched neck frags.
- 1 - plate frag, brown paint.
- 2 - rim frag of straight sided, fine ware, red glazed bowl - 1
~ brown glazed bowl - 1.

Handles: 4 fragments.

- 1 - root handle & rim frag of medium vessel, coarse
- 1 - root frag of large coarse vessel.
- 2 - body frags.

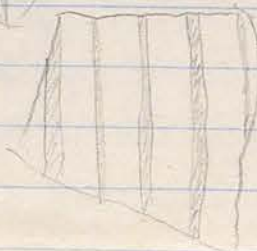

Overware: Nil

Others: 8 fragments

- 4 - red slip/glaze frags.
- 1 - black glaze.
- 1 - with dab of red paint.
- 2 - incised frag
- 1 - ribbed frag

TRACE.

TRACE.

Pottery from 207/2, S4 N²1, Collected 10/5/89

Bases: 13 fragments.

- 1 - complete small ring. 
- 5 B - small vessel ring frag.
- 5 - medium vessel ring frag.
- 1 - plate base.
- 1 - flat based bowl.

Rims: ²⁰19 fragments.

- 6 - outturned, flat lipped neck frag.
- 4 - eckins.
- 2 - plate frag.
- 1 - straight sided bowl frag, fine ware
- 6 B - lipped neck frag, 2 large coarse vessels.
- 1 B - notched neck frag.

Handles: 1 root frag.

Others: 3 frags.

- 2 - red slip / glazed frags.
- 1 - fine black sherd, matrix black

Pottery from 207/2, S4 n^o 2, collected 10/5/89.

Bases: 2 fragments.

- 1 - black glazed fineware ring base frag.
- 1 - complete small vessel ring base, coarse.

Rims: 12 fragments.

- 54 - eckinus, 1 red painted, 1 with rim painted.
- 1 - shallow vessel, burnished greyware.
- 1 - shallow vessel, red painted, mediumware.
- 4 - lipped, neck frags.
- 1 - outturned coarseware/cooking vessel neck frag.

Handles: 1 - root fragment.

Ovenware: 5 fragments.

Others: 7 fragments.

2 - tile frags.

1 - fineware black glaze

1 - rounded piece - stopper?

2 - brown glaze frag, both worn.

1 - body cherd with ribs/wheel marks.

Pottery from 207/2, SS n°1, Collected 15/5/89.

Bases: 8 fragments.

- 1 - red slipped plate base.
- 1 - complete small vessel ring.
- 5 - small vessel ring frags, coarse.
- 1 - flat bottomed bowl base.

Rims: 32 fragments.

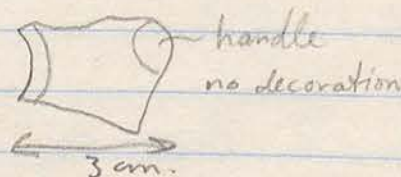

- 6 - eckins.
- 3 - plate / shallow vessel frags.
- 6 - flat, outturned rim frags ~ 2 joining pieces.
- 4 - notched neck rim frags.
- 5 - lipped neck rim frags.
- 2 - straight sided rim frags.
- 1 - spout frag with lip.
- 1 - large coarseware (pithos) storage vessel.
- 4 - flat rim frag ~ plates?

Handles: 3 frags.

- 2 - bodies, 1 large amphora handle.
- 1 - root frag.

Ovenware: 9 fragments.

- Others:
- 1 - lamp fragment ~ quite plain
 - 3 - black lined frags.
 - 4 - red slip frags.
 - 1 - black glazed
 - 1 - brown glazed eckins rim.
 - 1 - red painted,
 - 1 - tile fragment.

Monday 15/5/89, Day 34.

Weather: Mild morning with light N.W. breeze. Hazy.

Workers: Unis, Haman, Fatyme, Harnum.

6-00 - Continuing with 2nd half of SS.

8-00 - Two fragments of glass found in S.W. corner. SS. Bagged as objects.

9-30 - Bag n^o 2 opened.

- loom weight, (basalt) found in middle of trench. Bagged as an object.

10-00 - another loom weight found. Bagged with previous one.

10-45 - Small area of fine, dark grey soil adjacent to west bank, 1.5m from southern bank. Also, beneath it orange soil - regolith? Have cleaned off the N-S wall in eastern bank. Fairly thick, solid mud used as cement between blocks. E-W wall is south of trench is the same although not so apparent beyond the middle of the trench i.e. not visible in west yet.

Pottery: 5 5N⁹¹, 2 23

Bone: SS.

Objects: 2 bags, 7 objects.

Pottery from 207/2, S4 n^o ³/₂, Collected 11/5/89

Bases: 6 fragments:

- 3 - complete small vessel ring frags, 2 coarse, 1 medium.
- 3 - medium vessel ring frag, coarse.

Rims: 26 fragments.

- 7 - eckims, 2 black glaze, 3 red painted.
- 3 - outturned, flat topped neck frags.
- 2 - notched neck frags.
- 6 - plate/shallow vessel frags, 1 red painted
- 4 - lipped neck frags, medium vessels, coarse.
- 4 - straight sided bowl frags, 2 fineware, 2 medium

Handles: 2 fragments, both root frags.

- 1 - with depressed groove in centre of handle

Overware: 2 fragments.

Others: 5 fragments.

- 1 - grey burnished greyware frag.
- 1 - red painted large frag.
- 1 - dark lined frag.
- 1 - brown glazed frag.
- 1 - rounded piece ~ stopper?

Pottery from 207/2, S4 N² $\frac{2}{3}$, Collected 11/5/89

Bases: 23 fragments.

- 1 - small ring with black glaze ~ fineware
- 1 - medium vessel ring, grey paint/glaze
- 1 - medium vessel ring, coarse.

Rims: ⁴⁹~~20~~ 20 fragments.

- 4 - eckhus, 3 fineware, 1 medium.
- 2 - shallow bowl / plate frag, 1 mediumware with red paint.
- 8 - lipped neck frag, medium vessels, coarse
- 1 - notched neck frag, coarse
- 2 - outturned neck frags, 1 - medium vessel
- 1 - small, red paint evident.
- 3 - small bowl with vertical rim frag.

Handles: 3 fragments.

- 1 - root & rim frag, coarse medium vessel.
- 1 - large coarse root frag ~ shaped like a clove.
- 1 - body frag, coarseware, medium vessel.

Overware: 3 fragments.

Others: 4 fragments

- 3 - black lined
- 1 - red slip.

Pottery from 207/2, SG, Collected 16/5/89.

Bases: 9 fragments

2 - complete, small vessel rings, coarse

5 - medium vessel frags, rings, coarse

1 - amphora toe, coarse

1 - flat based piece, coarse

Rims: 21 fragments.

6 - eekhus.

5 - shallow vessel/plate rim, 3 red painted.

5 - lipped neck frags, 1 red painted mediumware.

2 - outturned, flat neck frags, coarse

3 - small bowl straight rim frag, all mediumware.

Overware: 5 fragments.

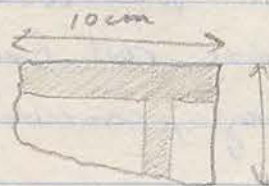

Others: 7 fragments

1 - tile frag.

2 - black lined frags

3 - red painted frags

1 - rounded styler.

Tuesday 16/5/89. Day 35.

Weather: Warm, light breeze N.W., hazy. Hot day, little breeze after 8.

Workers: Unir, Haman, Fatyme, Harnam.

6.00 - Continuing with about 2m² of ss in N.W. of trench.

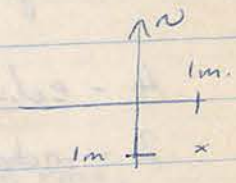

8.30 - Stone object uncovered, may be a head with crown-face lost.

TRACE.

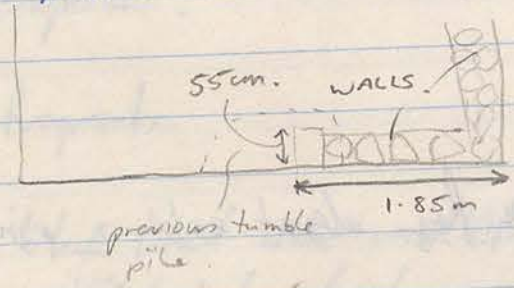

Found

Depth: 75 cm.

10.00 - Finished ss. Starting on S6 in S.E. corner. S6 is a richer brown than ss. Am expecting regolith & bedrock in N.W. corner. Depth to S6 in middle of north bank (section point) is 80 cm.

Have removed the tumble pile in the middle of the south bank. It was apparently in a doorway. A large door stone has been found ~~in the~~ east of the middle of S bank.

~~It later found~~
not to be door.

Pottery: S5 wss 1 & 2, S6 ~ 1.

Bone: S5, S6.

Objects: 1.

Pottery from 207/2, 54 N^o 2, Collected 13/5/89

Bases: 9 fragments.

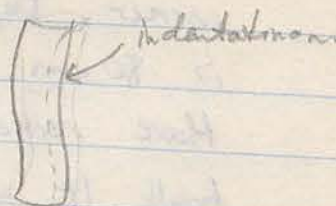

- 1 - amphorikos toe, greyware (?)
- 1 - amphora toe,
- 3 - small vessel rings, coarse.
- 1 - 'fish plate' base, coarse.
- 3 - medium vessel rings, coarse

Rims: 18 fragments.

- 4 - echinus, 1 with black glaze.
- 2 - notched neck frags
- 1 - straight sided bowl rim, fineware.
- 4 - lipped, medium vessel, neck frags, coarse.
- 3 - outturned neck frags.
- 4 - outturned flat neck frags.

Handles: 3 fragments.

- 1 - root on neck frag.
- 2 - bodies, 1 - indented, curved:

Oreware 2 fragments

Others: 9 fragments.

- 1 - fineware, black glaze frag. almost echinus rim,
- 2 - red slip/glaze.
- 1 - brown glaze
- 1 - painted ~ red & brown.
- 2 - unusual blunt instrument incisions:
- 1 - rounded 'stopper'
- 1 - with incised rings & paint:

5 cm

Pottery from 207/2, 54 N^o 3, Collected 13/5/89.

Bases: 11 fragments.

- 2 - amphorae toes.
- 2 - large medium ware ring - plate? related?
- 5 - medium ring frag, coarseware
- 2 - small vessel ring frag, coarse

Rims: 15 fragments.

- 3 - echinus, all red painted.
- 7 - lipped neck fragments, all coarse.
- 1 - burnished greyware plate with downturned rim.
- 2 - small vessel, shallow bowl rim frag; outturned.
- 1 - outturned flat rim frag, coarse.
- 1 - flat edged coarseware vessel frag.

Handles: 5 fragments.

- 1 - root & rim frag of large, coarseware vessel.
- 2 - root frags, coarse.
- 2 - coarse, almost complete ring handles.

Ovenware: 3 fragments.

Others: 11 fragments.

8 - black lined water vessel (?) frags.

1 - ribbed body sherd.

1 - brown glaze painted coarse frag.

1 - rounded stopper, with swirl in middle,
was it a base piece?

Ribbed body sherd.

Pottery from 207/2, 56 N^o1, Collected 12/5/89.

Bases: 4 fragments.

- 2 - ring base frags, 1 mediumware, 1 coarse
- 1 - white 'glazed' frag.
- 1 - rounded bowl base.

Rims: 6 fragments.

- 2 - eckins, painted/slipped mediumware.
- 1 - large, red slipped plate rim.
- 2 - small bowl, straight sided rim frags.
- 1 - lipped neck frag.

Overware: 9 fragments

Others: 10 fragments.

A

- 5 - black lined/scorched.
- 3 - red painted frags.
- 1 - black glaze frag
- 1 - rounded 'stopper'

O

OH

Weds 17/5/89 Day 36

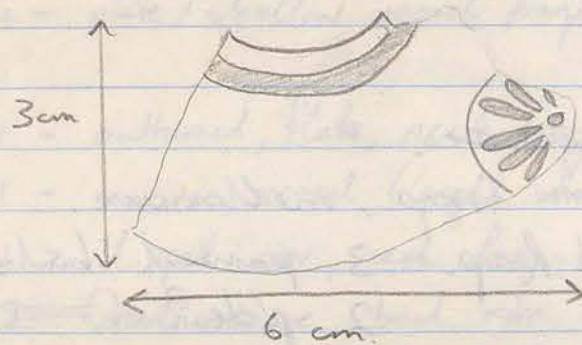

Weather: Clear, warm, still morning.

Workers: Unis, Haman, Fatyma, Harnum.

6-00 - Continuing with S6. Bone & Pottery bags opened.

8-00 - Pottery n^{os} 1 filled.

10-30 - Lamp fragment uncovered in middle of trench.

89.918

It appears to be the top half  & that the 'petal' part is the handle. Bagged as an object.

Pottery S6 n^{os} 1, 2 & 3

Bone: S6

Objects: 1.

Pottery from 207/1, SS N^o 1, Collected 14/5/89

Bases: 10 fragments.

1 - large vessel rounded toe ~ pithos?

4 - small ring bases, 

4 - medium " "

1 complete, all coarse

1 - flat based small vessel.

Rims: 24 fragments.

3 1/2 - eadims.

5 - lipped neck frags, coarse.

4 - straight sided rim frags, medium ware.

5 - plate/shallow bowl frag. 3 painted bowls.

2 plates? 

2 - outturned neck frag.

1 - notched neck frag.

4 - outturned flat neck frag, 2 medium, 2 coarse

- 1 - outturned, flat krater (?) rim.

Handles: 5 fragments.

- 2 - root & handle frag, coarse.
- 3 - body frag, one  shape, all coarse.

Ovenware: 2 fragments.

Others: 12 fragments.

- 5 - blacklined water vessel (?) frags.
- 4 - red painted frags.
- 2 - spout (?) frag, 1 black glaze on interior, 1 coarse.
- 1 - mediumware spout area (?) frag.

Pottery from 207/2, S7,

Collected 18/5/87.

Bases: 9 fragments.

3 - small ring bases, 1 complete, coarse

4 - medium " "

1 - painted plate base

1 - large, heavy bowl with flat base, coarse

Rims: 30 fragments.

15 - plate & shallow bowl fragments.

5 - echinus rims, medium ware.

6 - lipped rim frags.

1 - outturned, large coarseware vessel rim.

1 - small bowl, straight sided rim, mediumware.

1 - outturned neck frag of small, fineware 'vase'

1 - rim frag, unspecified:

1 cm. red painted

Handles: 1 fragment ~ root of coarseware medium vessel

Overware: 9 fragments.

Others: 13 fragments.

3 - black lined/scorched.

7 - red painted or slipped frags.

1 - faded/worn brown glaze

2 - faded glazed frag, now crazed white.

1 - ribbed frag, incised with blunt instrument

S4 = 7 bags
S5 = 7 bags
S6 = 5 bags

57

Thurs 18/5/87 Day 37

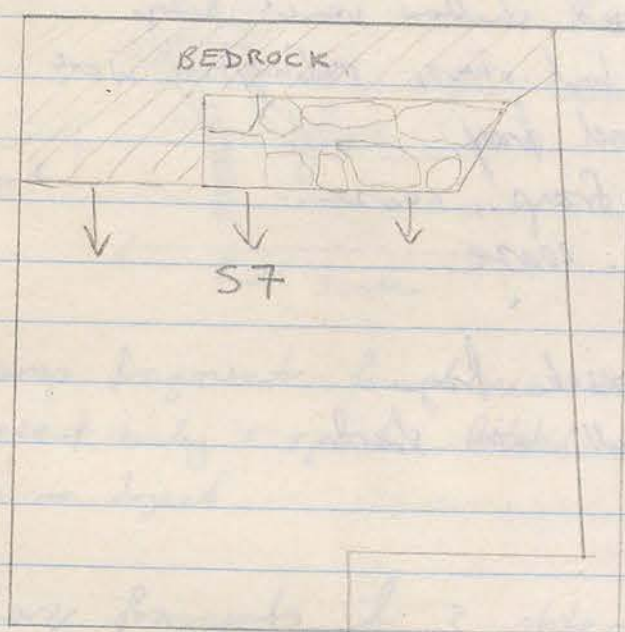

Weather: Light N.W. breeze, clear, mild am.

Workers: Unis, Huanan, Subit for Fatyone, Huanan.

6.00 - Finishing S6 along N bank.

8.00 - small piece Ogivine Council. - breast of a woman?

9.30 - Hit bedrock across north of trench. Definitely a small, non-continuous wall E-W in north. *

New layer, S7, only south of the wall - an earlier occupation?

Pottery: S6 N=1 & S7 N=1.

Bone: S6, S7

Objects: 1.

Pottery from 207/2, 57, n°1, Collected 20/5/89.

Bases: 54 fragments.

- 1 - small ring frag, coarse
- 1 - medium ring frag with red paint ~ plate?
- 1 - ~~flat~~ solid ring base with red paint.
- 2 - medium vessel ring, coarse.

Rims: 40 fragments.

- 21 - echiurus
- 1 - partial green glazed shallow vessel frag.
- 4 - straight sided bowl rims, medium/fine ware
- 4 - plate/shallow vessel frags.
- 5 - outturned neck frags., coarse.
- 2 - lipped neck frags. coarse
- 1 - notched "
- 1 - flat, outturned neck frag.
- 1 - unidentifiably small rim shed.

Handles: 3 fragments.

- 2 - root frag ~ coarse
- 1 - body frag ~ coarse

Ovenware: 14 fragments

Others: 20 fragments.

- 1 - tile frag.
- 6 - black lined/scorched frags
- 10 - red painted or slipped frags.
- 2 - brown painted frags.
- 1 - brown slip/gloss.

Saturday 20/5/89 Day 38.

Weather: Clear, mild, sunny morning. Light N.W. breeze.

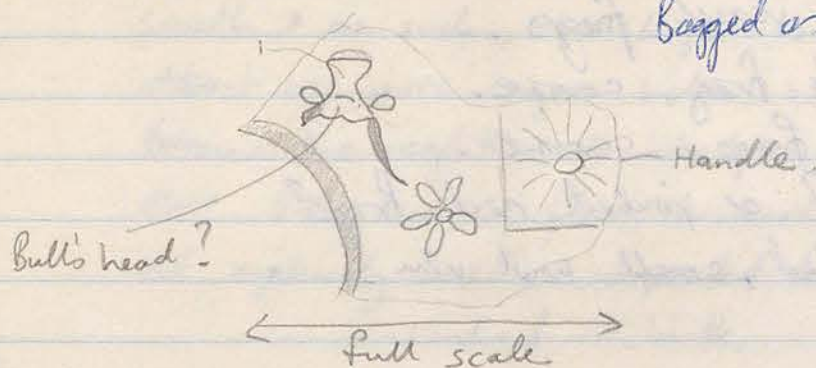

Workers: Unis, Haman, Fatyane, Harnam.

6:00 - Moving from north to south through S7.

7:00 - S7 n^o1 filled.

8:30 - Lamp fragment found in S7. Very decorated, pised relief.

Bagged as an object.

89.838

or

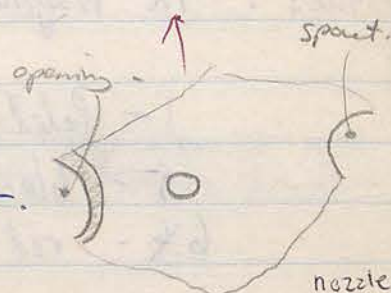

89.829

9:30: Lamp fragment found near other piece in S7. Looks like base piece of body & spout. Related to piece above? Bagged separately as an object.

10:30 - Large fragments of 3 plates found in S7 S.E. corner. 1 plate black glaze fineware, other 2 painted mediumware. All bagged in Pottery n^o 3.11:30 - ~~S7 n^o 4 opened~~ ~

12:00 - Another lamp fragment. From S.E. corner, S7. Related to other pieces? Bagged as an object.

Pottery: S7 nos 1, 2 & 3

Bone: S7

OBJECTS: 3

1 Pottery from 207/2, 57 m², Collected 21/5/89.
Bases: 8 fragments.

- 3 - amphora bases (coarse)
- 3 - small vessel rim frags, 1 complete, coarse.
- 2 - medium vessel " " , coarse.

Rims: 20 fragments.

- 10 - ecklinus frag.
- 4 - plate/shallow vessel frags.
- 1 - notched neck frag, coarse.
- 3 - lipped neck frag, coarse.
- 1 - vase spout? or pinched neck frag?
- 1 - straight sided, small bowl rim.

Handles: 4 fragments.

- 4B - root & rim frag, 1 small fineware, $\frac{3}{2}$ coarse.
- 1 - root & body frag, coarse.
- 2 - body frags.

Ovenware: 11 fragments.

Others: 12 fragments.

- 1 - Faded, white based glaze.
- 5 - black lined/scorched.
- 6.4 - red painted frags.

Sunday 21/5/89, Day 57.

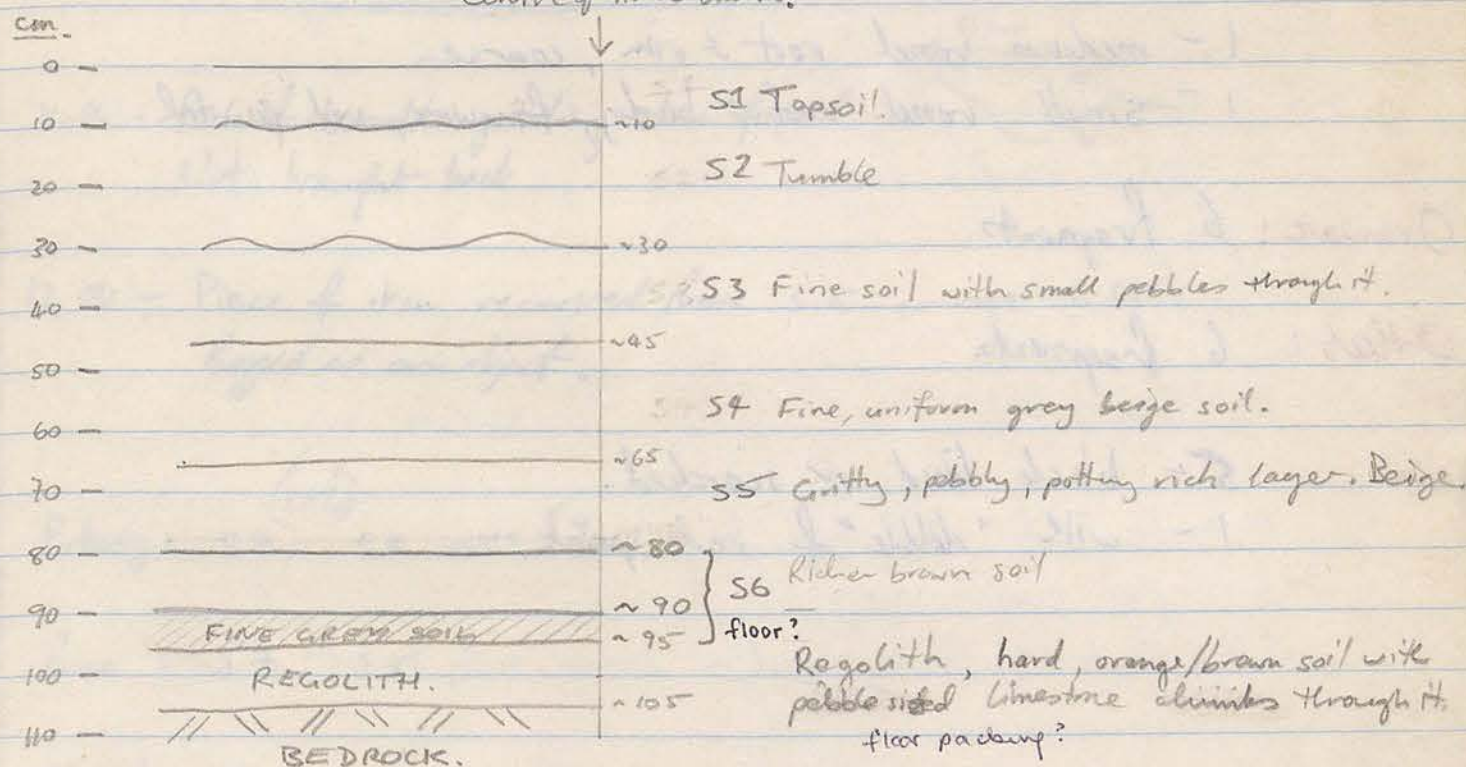

Weather: Clear & Sunny, light N.W. breeze, 18°C at 6am

Workers: Unis, Hanaan, Fatyane, Haroun.

6.00 - Continuing with 57.

Piece of iron (nail?) found in East of trench (corner).
Bagged as an object.

6.30 - S6 is a grey layer overlying regolith (in the northern end) -
* appears to be a floor. Possibly. The bed rock dips to the south & as such, the layer is thicker there. Appears to be at least one more layer below S7 in south (before regolith). Because the regolith was intact in the north, it seems probable that S6 was a floor. It must be noted, though, that S6 is not especially hard or compacted but quite loose & 'clumpy' -
Centre of north bank.

7.00 - Along 1.5 m of west bank, S7 has become a fine grey soil, different from the tan colour of the rest of the stratum.

lottery from 207/2, 87 n^o 2, Collected 21/5/87.

Bases: 6 fragments.

- 1 - black glazed plate base frag, fineware.
- 1 - "pimple" based, black & red painted vessel base.
- 2 - complete small ring bases with central point.
- 2 - ring base frag.

Rims: 6 fragments

- 3 - lipped neck frag.
- 2 - echinus frag.
- 1 - open vessel outturned rim & crater? painted.

Handles: 2 fragments.

- 1 - medium vessel root & rim, coarse.
- 1 - small vessel root & body, fineware, red painted.

Ovenware: 6 fragments.

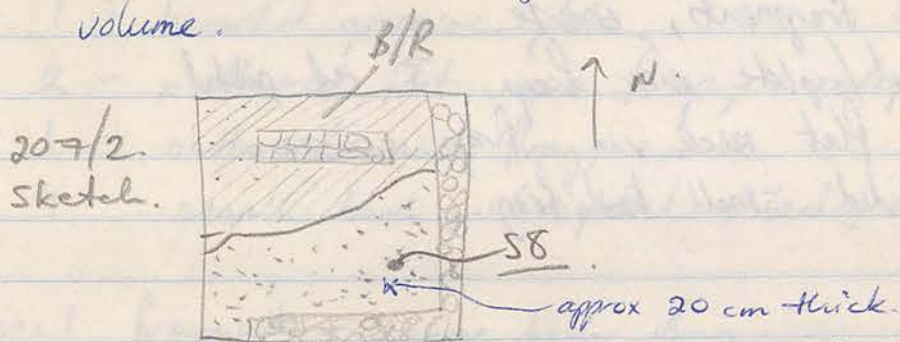

Others: 6 fragments.

- 5 - black lined or scorched.
- 1 - with "dibble" of red paint.

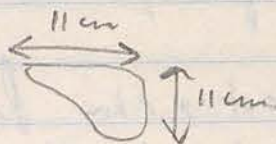

8:30 - Piece of iron found in S.W. corner of trench. Bagged as an object.
Smaller than other piece.

9:30 - Excavation along south bank of S7 has shown ^{west} wall to be continuous - no door apparent in south. Perhaps it is in bank. There is a large doorway to the north in 207/3. What appeared to be a doorstone on Day 35, (16/5) has been shown ^{to be a} ~~as a~~ large block. Many smaller stones beneath it.

10:00 - Finished S7, starting S8. Don't expect it to be a large volume.

11:00 - Piece of basalt grinding stone found.
Not brought back.

12:00 - Piece of iron recovered from S.E. corner in S8.
Bagged as an object.

Pottery: ⁽¹²²⁾ S7, S8 nos 1 & 2

Bone: S7, S8

Objects: 3.

Pottery from 207/2, SS N^o 2, Collected 15/5/89.

Bases: 5 fragments.

- 1 - medium vessel complete ring, medium ware, red paint.
- 3 - " " ring frag.
- 1 - amphora toe.

Rims: 24 fragments.

- 6 - eckinus, 1 fine, black glaze, 3 medium, red painted.
- 10 - lipped neck fragments, coarse.
- 5 - shallow vessel / plate rim frags, 3 red painted.
- 2 - outturned, flat neck rim frag, coarse.
- 1 - straight sided small bowl frag.

Handles: 3 fragments,

- 2 - root & rim frag, coarse.
- 1 - root & handle frag, coarse.

Ovenware: 6 fragments.

Others: 10 fragments.

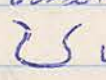

- 4 - black lined water vessel frag.
- 5 - red painted frag.
- 1 - decorated body sherd ~ incised with blunt object.

61.

Pottery from 207/2, ss n^o 2, Collected 15/5/89.

Bases: 4 fragments.

- 2 - small ring frags, coarse.
- 1 - flat base of large vessel, coarse.
- 1 - round base of a  vessel, coarse.

Rims: 9 fragments.

- 4 β - eckins, 1 black glaze, 1 local brown/black glaze, 1 red paint.
- 1 - burnished greyware plate.
- 2 - outturned, flat, neck frag, 1 red paint.
- 1 - outturned neck frag, coarse.
- 1 - small bowl, straightish sided, red painted.

Handles: 1 fragment - coarse body frag.

Ovenware: 3 fragments.

Others: 3 fragments.

- 2 - black lined frags.
- 1 - red painted.

Pottery from 207/2, S 5 no 1, Collected 16/5/89.

Bases: 8 fragments.

- 5 - small vessel ring frags, coarse
- 1 - medium " "
- 1 - plate(?) base frag,
- 1 - low ring/flat base frag.

Rims: 14 fragments.

- 4 - echinus.
- 2 - shallow vessel/plate rim frag.
- 2 - outturned flat rim frag, 1 pithos type vessel
- 6 - lipped neck frag.

Handles: 1 fragment - root.

Ovenware: 12 fragments.

Others: 20 fragments

12 ~~11~~ - black lined/schardled

4 - red painted

1 - red slip

2 - worn glazes ~ black & brown?

1 - rounded stopper.

Pottery from 207/2, 55 N^o 2, Collected 16/5/89

Bases: 3 fragments.

- 1 - complete ring frag, small vessel, coarse
- 1 - 'fish plate' base piece.
- 1 - amphora toe

Rims: ¹⁴15 fragments.

- 3 - eckins.
- 2 - plates/shallow bowls, 1 red painted, 1 with flat base.
- 4 - outturned rim frag, flat, all coarse.
- 3 - lipped neck frags.
- 1 - small bowl with straight sided rim.
- 1 - outturned, lipped neck frag.

Handles: 1 fragment ~ body of coarse medium sized vessel.

Ovenware: 18 fragments.

Others: 5 fragments.

- 2 - blacklined frags.
- 1 - rounded 'stopper'.
- 1 - fineware black glaze
- 1 - worn/vitrified black/blue glaze frag.

Pottery from 22/5 207/2, 59, Collected 22/5/89.

Bases: 12 fragments.

- 3 - amphora toes, coarse.
- 5 - small ring bases, 2 complete, all coarse.
- 3 - medium " " , all coarse.
- 1 - shallow conical bowl base:

Rims: 24 fragments.

- 9 - eckers, 5 red painted.
- 7 - shallow bowl/plate, all medium ware, 4 with red paint.
- 6 - lipped neck frag, 2 adjoining.
- 1 - outturned, flat rimmed shallow bowl frag, medium ware, red paint.
- 1 - coarseware storage vessel neck frag.

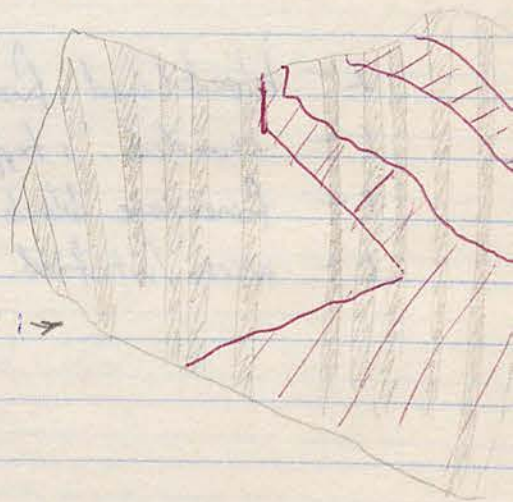

Handles: 5 fragments.

- 2 - root frags, overware.
- 1 - root & rim frag, coarse.
- 2 - body frag, 1 coarse, 1 black painted with central ditch.

Overware: 9 fragments.

Others: 9 fragments.

- 1 - ribbed fine ware frag with red paint: →
- 5 - black lined/scorched.
- 3 - red painted frag.

Monday 22/5/89, Day 40.

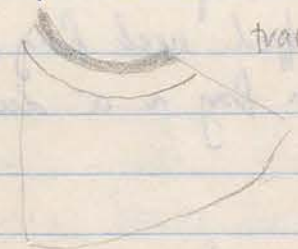

Weather: Light cloud, sunny, N.W. breeze.

Workers: Unis, Hanan, Fadyne, Hammar.

6:50 - Continuing with S8. Noticing that regolith is absent in some areas - implies either none formed (unlikely) or else removal - then a soil floor above/on bedrock. Pottery bearing S8 on B/R in middle of trench & also in east. Quite patchy though with some pockets of regolith. S8 ~ 20 cm thick.

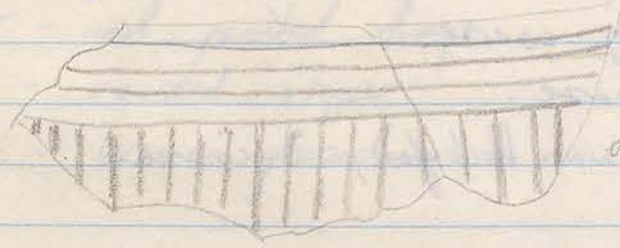

10:00am - starting stratum 9.

10:30am - 1 lamp fragment found - plain undecorated - S9.

⇒ object

- 2 rim fragments moulded bowl - weak black glaze

in situ

Pottery: S8, 1 & 2, S9

Bone: S8

Objects: 2.

Pottery from 207/2, SG N^o 2, Collected 17/5/89

Bases: 8 fragments.

- 6 - ring base frags, coarse
- 1 - flat based bowl frag with swirl
- 1 - flat based, heavy coarse vessel.

Rims: 27 fragments.

- 10 - eckimus.
- 5 - plate frag, 2 medium ware, 2 coarse
- 5 - straight sided small bowl rim frags.
- 5 - lipped neck frags.
- 1 - outturned lipped neck frag.
- 1 - unusual rim frag ~ a dud?

Handles: 7 fragments.

- 1 - root & rim frag, coarse.
- 2 - root frags, coarse.
- 4 - body frags, 1 worn black glaze, 3 coarse.

Ovenware: 6 fragments.

Others: 9 fragments.

- 7 - black lined / scorched.
- 1 - brown/black glaze faded
- 1 - red painted piece.

Pottery from 207/2, 56 N^o 3, Collected 17/5/19.

Bases: 8 fragments.

- 1 - large vessel ring, coarse
- 3 - medium ring frags. coarse.
- 3 - small ring frags, 1 complete.
- 1 - small bowl, solid ring base.

Rims: 12 fragments.

- 7 - e.d. rims.
- 2 - shallow bowl/plate, painted, medium ware
- 2 - lipped neck frags, coarse.

Ovenware: 9 fragments.

Others: 13 fragments.

- 5 - black lined/scorded frags.
- 5 - red painted frags.
- 1 - rounded 'stopper'.
- 2 - brown glazed.

Pottery from 207/2, 59 n^o 1, Collected 23/5/87.

Bases: 2 fragments.

- 1 - amphora base
 - 1 - medium vessel rim
- } coarse

Rims: 15 fragments.

4 1/2 - plate fragments, all mediumware

2 - echinus.

8 - tipped neck fragments, 2 cookingware, 1 medium/fine 'vase' type

2 - tipped rim fragments.

Handles: 2 fragments.

1 - amphora handle ~ heavy right cylindrical

1 - fineware small vessel rim & handle frag, red paint.

Orenware: 5 fragments

18 fragments.

2 - adjoining roofing tile frag.

2 - blacklined / scorched frag.

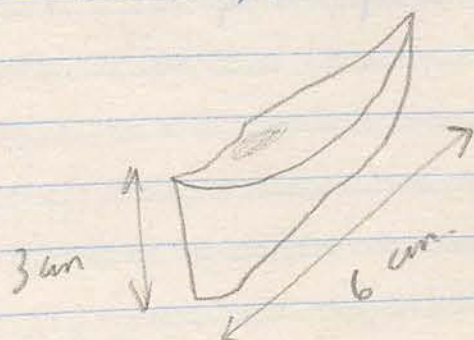

3 - brown painted

1 - red slip.

8 - red painted ~ some with a little brown also.

1 - very faded green glazed (?) frag.

1 - curious, solid circular frag.

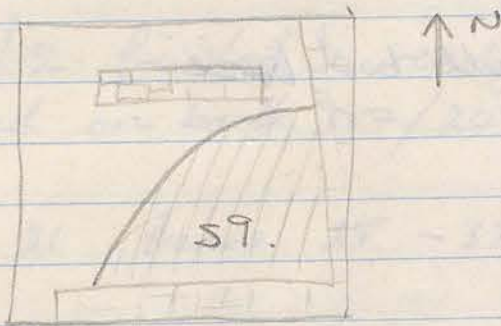

Tuesday 23/5/89 Day 41.

Weather: Hazy, mild & still at 6am.

Workers: Unis, Haman, Fatyme, Harum.

6:00 - continuing with S9 in S.E. corner. About 15 cm thick.

S9 is a rich brown soil (when freshly dug) with a fine texture & small stones throughout ~ $\frac{1}{2}$ to fist sized. Quite rich in pottery which is quite surprising. - fill under floor?

8:00 - Almost complete lamp recovered from S9.

S.E. = 200 cm

89.917✓

S.W. = 375 cm

rayed Type 8-9.

depth = 142 below S.W.

= 110 below N-S wall

11:45 - E-W wall is complete (& apparently without door) across the south of the trench.

Pottery: S9 [✓] [✓] 1 & 2

Bone: S9

Objects: Nil

Pottery from baulk D7/207-1, S1 & 2 n=1, Collected 24/5/8

Bases: 11 fragments -

- 7 & - medium vessel ring bases, coarse
- 2 - small " " " "
- 1 - 'fish' plate base.
- 1 - solid circular small bowl base

Rims: 15 fragments.

- 5 - eclipses.
- 3 - plates, coarse.
- 2 - outturned, flat neck frag.
- 4 - lipped neck frag.
- 1 - straight side small bowl frag.

Handles: 6 fragments.

- 1 - complete medium vessel ring handle, coarse.
- 2 - root frag, coarse.
- 3 - body frag, 1 black & 1 painted.

Overware: 3 fragments.

Others: 7 fragments.

- 2 - black lined/scatched
- 2 - red slip slipped.
- 3 - decorated frag ~ incised.

Weds 24/5/89.

Day 42

Weather: Hazy & very windy.

Worked: Unis, Hanaan, Fatyone, Harroum.

6.00 - Cleaning of walls & floor. No pottery or bone.

8.30 - 207/2 finished & ready for photographing.
- Started on bank D7/207-1.

10.00 - Roll 21, frames 25 - 32, query 25?

11.30 - Strata 1 & 2 being taken out together. Stratum 1 is topsoil with roots etc. Stratum 2 is tumble & is producing a lot of fist sized stones. Very pottery rich - 3 bags already & a lot of bone also.

Pottery: SI & 2 nos 1 & 2 & 3Bone: SI & 2

Objects: Nil.

Pottery

bases:

Pottery from 202/2, 58 no, , Collected 21/5/89

Bases: 8 fragments.

Other

Saturday 27/5/89 Day 44.

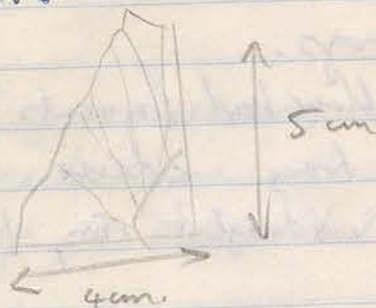

27/5/89.

Weather: N.W. breeze, cool (16°C am). Hazy.

Workers: Unis, Haman [Anna's head], Fatyone (replacement), Harman.

6-00 - Aiming to get D7/207-1 down to D7 floor level.

8-00 - Piece of figuring fragment uncovered in S4.
Bagged as an object.

10-00 - Loom weights found. Bagged as an object.

11-30 - Dismantled D7/207-1 with Peter. Will leave it levelled off at the floor level of D7. Interesting to note that the fill layer above the floor level was also found in D1 above the floor. Now that the baulk is down, & no wall revealed, the main room of the house ⁵⁰ ~~now~~ exposed is about $15\text{m} \times 6\text{m}$. This, huge yet there are no additional supports visible (e.g. sand as pillar bases etc). Another observation is the difference in door levels of D7 & 207-1. In the N-S wall of 207/1 there is a door which lies at the top of the fill layer. Is this a later opening & occupation?

12-00 - Piece of basalt grinding stone found at D7 floor level.

Pottery: S4 nos 1, 2, 3 & 4. (Baulk D7/207-1)

Bone: S4
