List of equipment for Trench Supervisors

Dig bag
 Water
 Clip board and spare clips for windy days
 Pens (water proof only - black or blue), pencils, ruler, eraser
 Measuring tape
 Plumb bob
 String
 Spirit level (may be shared)
 Supply of labels
 Supply of different-sized plastic bags
 Toilet paper (for wrapping delicate objects as well as for personal use!)
 Small cartons/boxes for objects. When available
 Band-aids and aspirin for the vapours (yours or the workers')

ADVICE to TRENCH SUPERVISORS

1. Take a **new page** for each day. (Each day may take several pages).
2. Draw a **scale plan** of the trench **each day** on the graph paper (essential), with North at the top (if this is not convenient, mark North direction clearly).
Mark depth from surface at the beginning of each day, at designated points.
When starting a square, this plan may be nearly empty but draw it all the same and mark in emerging tumble.
3. Draw arrows on your plan to indicate **direction** in which you are excavating.
4. Every time you designate a new context, (on the occasion of a new spit, a new feature, a new soil colour) fill in the **Context Record Sheet** for that trench, as well as describing it in your report. Store the accumulated context record sheets in the plastic sleeve in your record book.
5. **Structures** . Measure carefully any structure (wall, doorway, threshold, ovens, pit, any large dressed stones or columns) and record exact location, height, width in your report as well as on the scale plan.
6. **Floors** - marked by very hard tough surface or layer of white crushed limestone. May be softer adjacent to wall. Record thickness of floor, if we decide to dig through it.
If your floor is particularly good, collect a few bags of surface material - there may be seeds.
7. **Objects**. e.g. glass, figurine or lamp fragments, metal, stucco, loomweights, spindle whorls, beads, graffito-ed sherds, coins, gold jewellery (some hope). Mark in the location and depth of any objects clearly and accurately. If necessary, draw another sketch plan as the day progresses. A quick sketch of the object in the report would be helpful, if it is too mysterious to name e.g. Mattie's metal blobs.
8. **Pottery**: label bags clearly in waterproof pen, with one label inside the bag and one outside. **Record daily the number of bags per context** . Be very careful to separate pottery from different contexts.
It is absolutely essential to double-bag the pottery. A broken bag of pottery without context is useless.
9. **Bone**: Collect all bone and label as for pottery. Record number of bags per context daily.
10. **Charcoal**: Collect all charcoal and label as for pottery. Record number of bags per context daily.
11. **Tile**: it is important to record the location and amount of tile.
12. **Very important**: at the completion of a trench, draw to scale:
 - i Draw a section of the exposed baulk, with details of stratigraphy clearly marked.
 - ii Draw a top plan of the completed trench, with contexts clearly marked.
 - iii Write a short summary with your interpretation of the trench.

Context Report

في الصباح تم تنظيف الأجزاء 1 و 2 من حفرة 100/2
 تم تنظيف الجدران من جهة الغرب - تم العثور على الفخار في المنطقة
 بالقرب من شمال - جنوب بجانب هذا الجدار تم العثور على
 حديد رقم 2 وهو قطعة من الفخار (D) وهي قطعة كبيرة
 أو من
 - وجدنا عذون من حجرة فوق الأرفعة 2 من الفخار في الأرفعة
 المنظر رقم 2
 - افنت تم تنظيف المرصع الرابع 100/2 والمرصع الثالث 100/3 باليد
 في شقة البيت القديم
 - in early morning doing clean the floor
 also we do chime the wall step from the west
 but now working in the door part in the scanner
 100/2 and 100/3 and chime the road
 we find since zero pottery
 - we have wall and deep we must work in the
 road to that wall
 - The Pottery in the trench is historic

2	Iron slag	1.3	
3	Lamp frag	1.3	

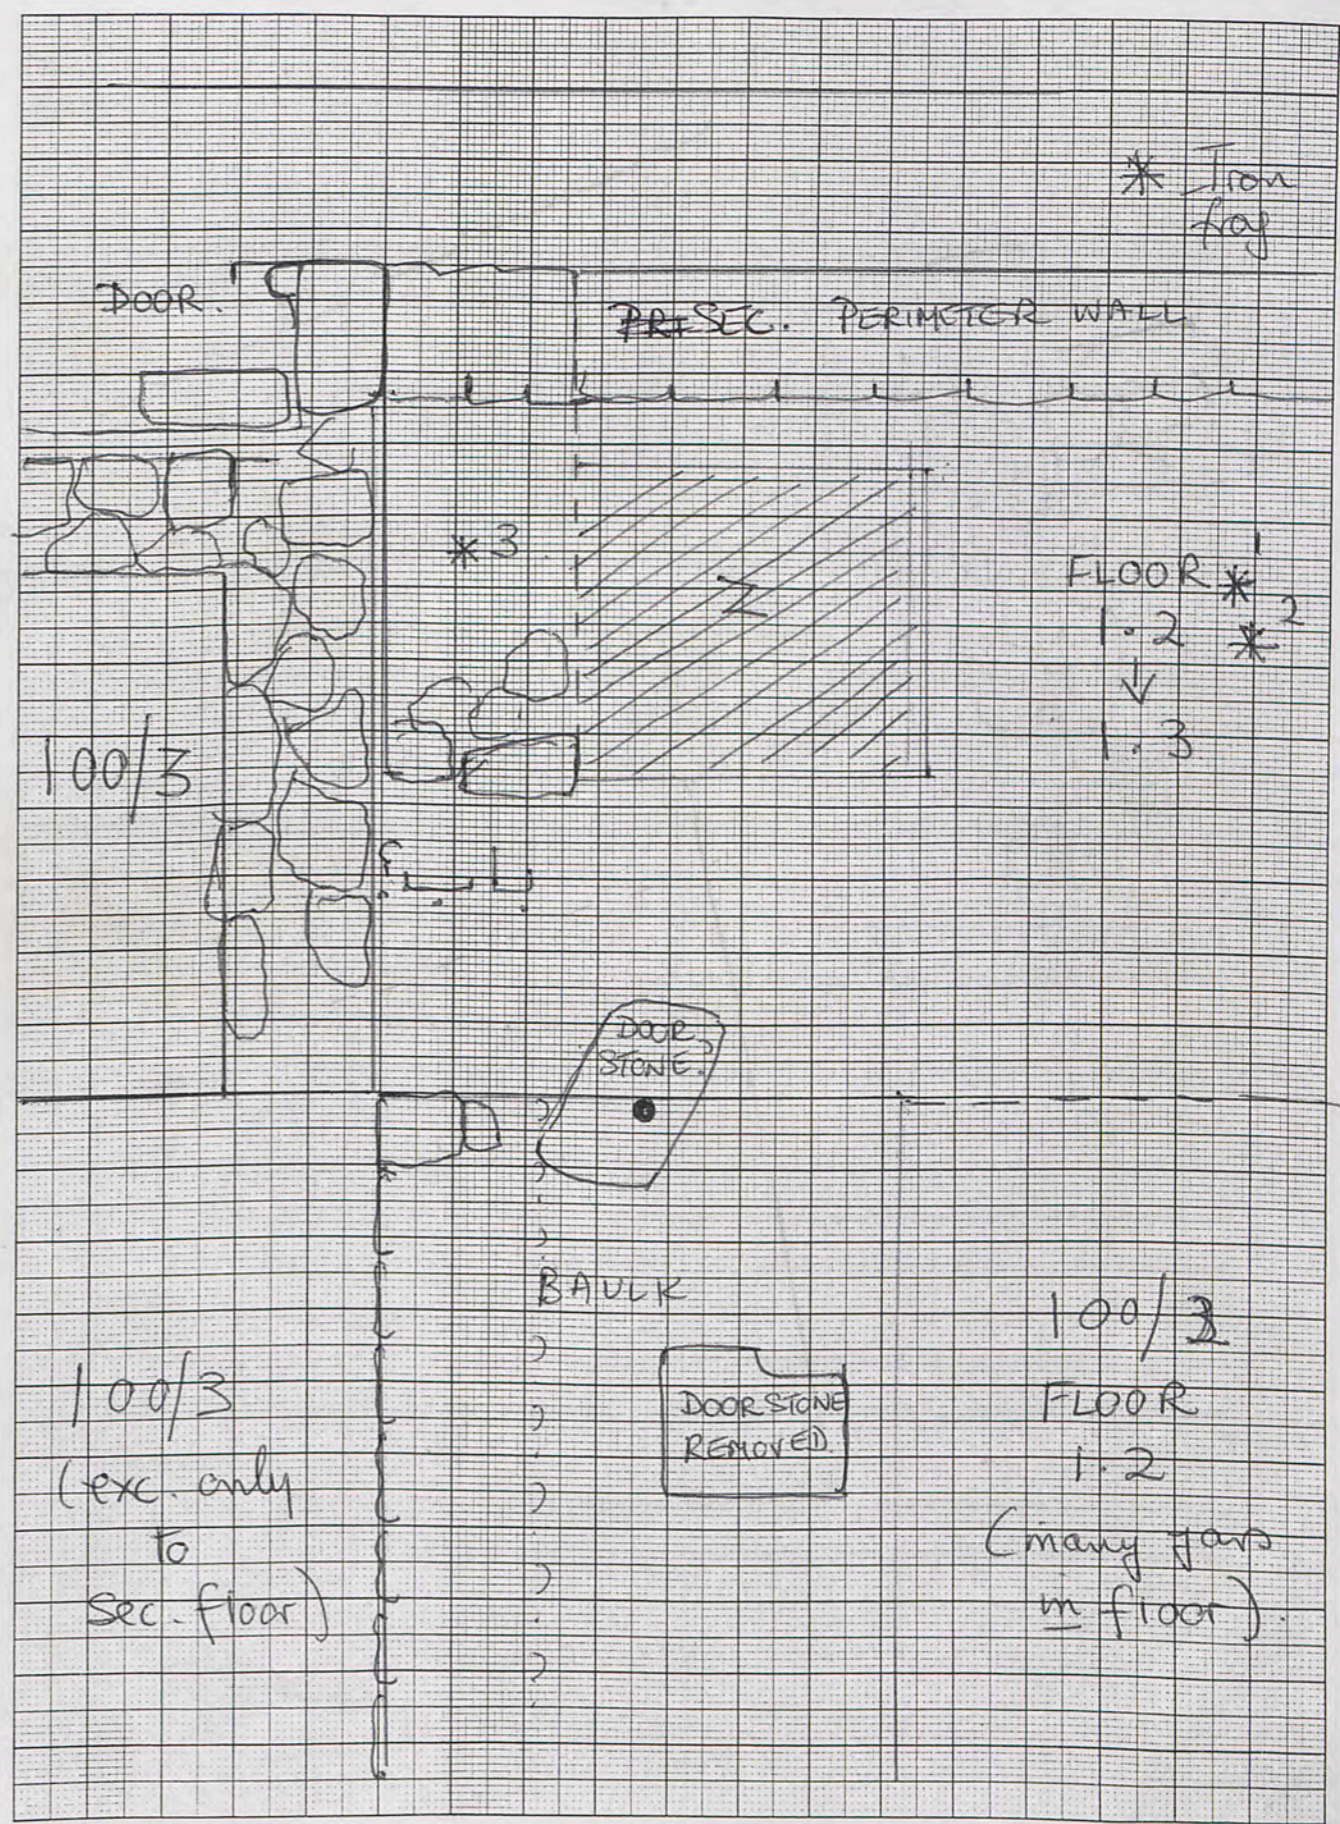

Context Report

Z.	(Hikmet has gone to the Museum) I have asked the workers to clear more of the baulk 100/2-3 to see the E/W wall in 100/3. This small area is Z (separate pottery)
1.3	After clearing to the supposed wall, we find the wall is badly damaged on the South side. I suspect the large stone visible on the North face may originally have been the doorstone on East side, and the rest of the "wall" from there to west, is suspect.
1.3	Now excavating 150 cm of sec. floor in locus 1, to see the west face of the primary perimeter wall. Iron bolt (?) found at *1, depth of 65 cm from surface, 30 cm below sec floor Metal slag found at *2 in same context

*1

3.	Lamp frag	1.4	
4.	Bronze frag x 2	1.4	
5.	Lamp frag	1.4	

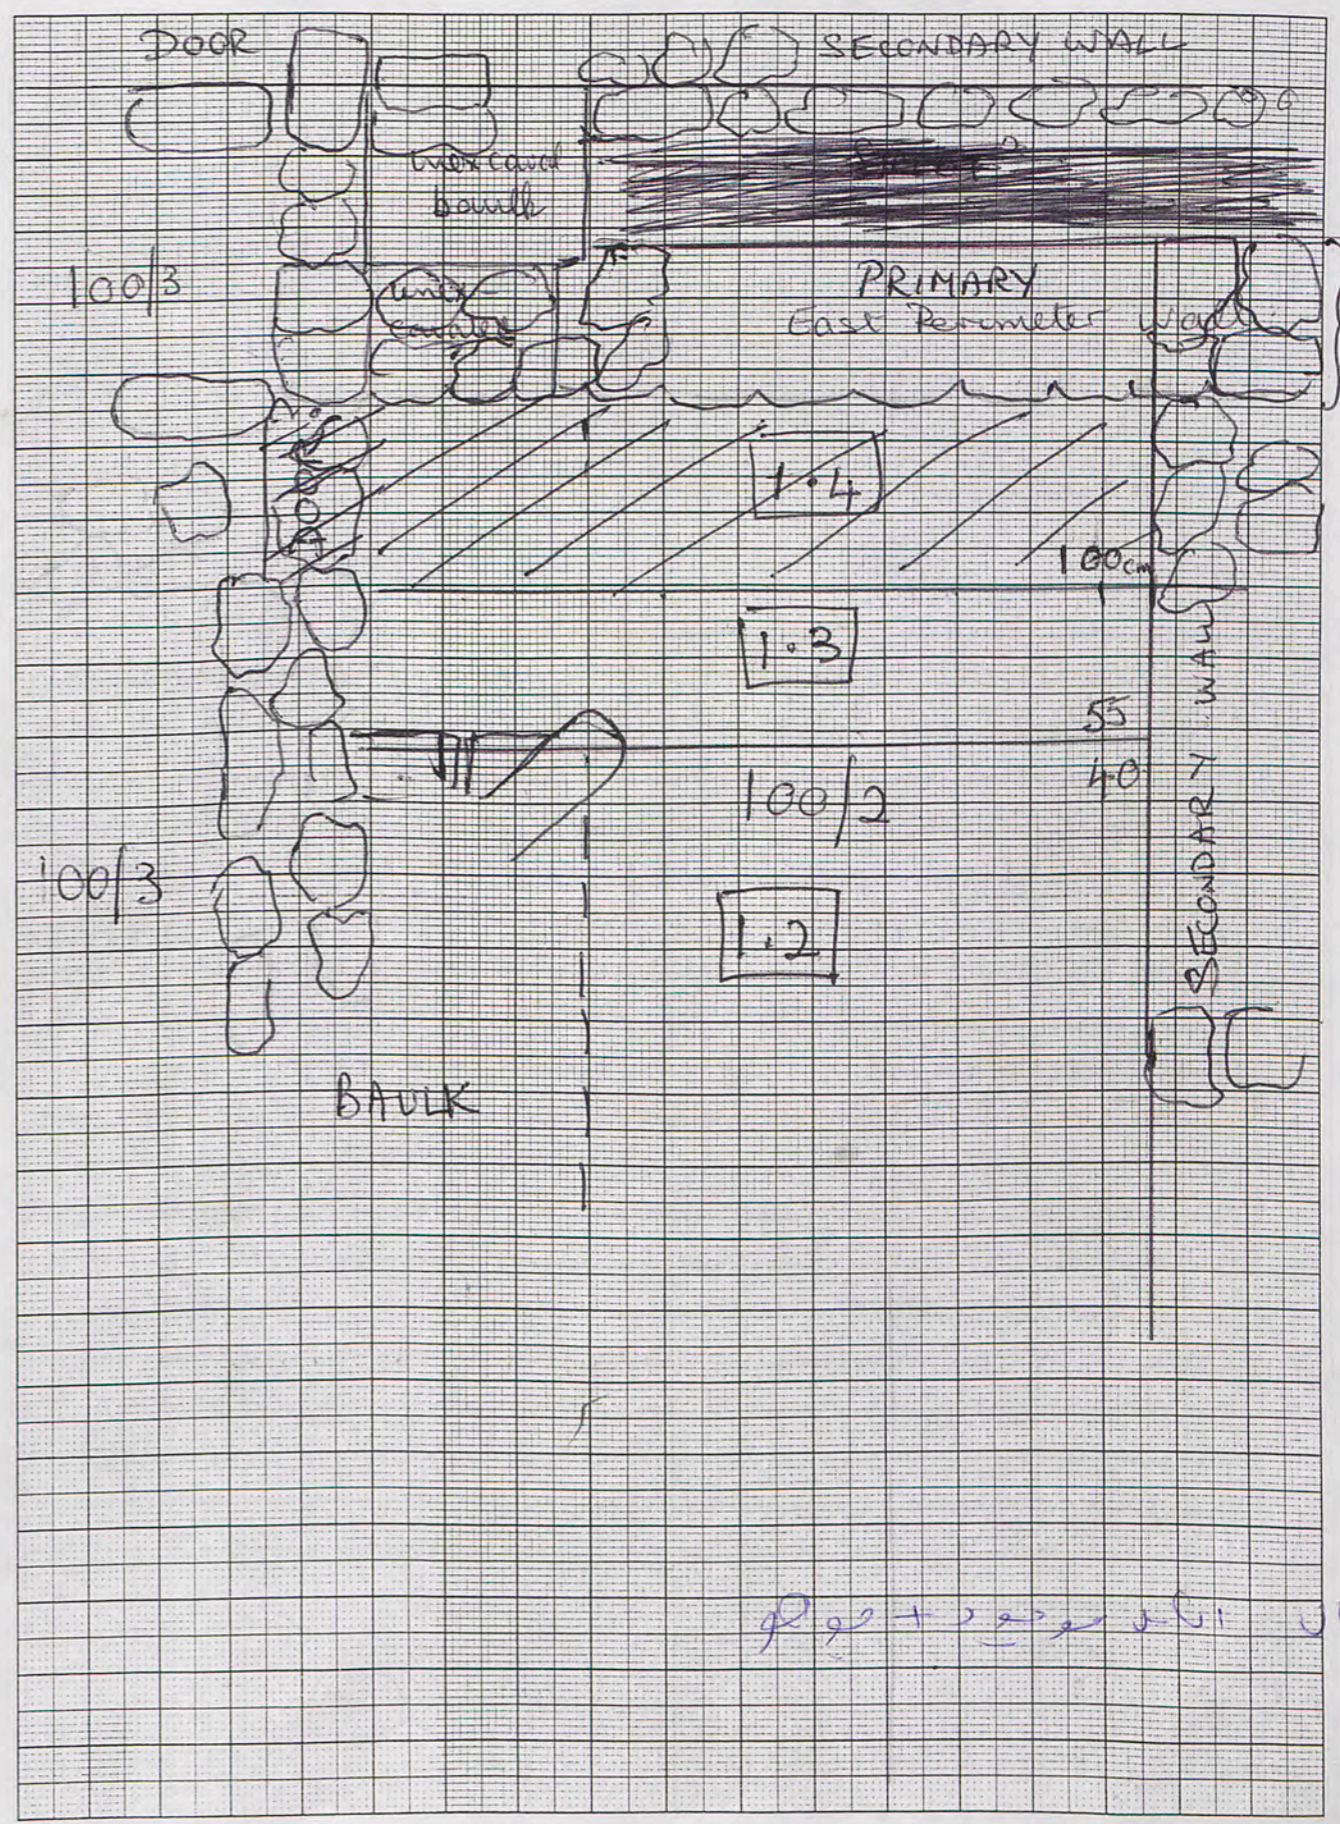

Context Report

1.3	Extended this locus North to include the full "doorway" area up to the E/W wall in 100/3
1.4	Narrow spit excavated N/S along west face of primary perimeter wall, lower than 1.3. Reached bedrock at 100 cm from surface 60 cm from sec floor
* 1.	Bronze fragment
2.	Round stone, possibly worked ring bezel? found on bedrock to south of 1.4 spit, near perimeter wall
1.4	extended a little west to straighten the spit
* 3	Lamp frag found just below 1.3 - moulded with rosette base
* 4	2 very small bronze fragments from stone above bedrock.

Context Report

Context	Report
1.4	Continued
*5	Object (5) is a fragment of the same lamp found previously - the top of the nozzle with an amphora in relief. This was found below 1.3 in the same context as obj (3)
*6	Bronze hook
*7	Small shell
	From the number of objects at this level in a small locus, one would expect a floor but there is no sign of a surface. In fact the soil is a loose, och brown for some depth.
	Note: the E/W wall dividing 100/2-3 (in 100/3) is definitely secondary. This means the doorway into this is also secondary.

1	Worked Basalt	2/3	
2	bronze coin	2/3	01.149

Context Report

2/3	Continuing to have tumbled from the third spits
2.3	Examining the structure previously thought to be a wall, found along the EW axis - bottom of the spit full of pottery and comprised of sedimentary material and fill to be a proper wall. Unsure about a possible floor so have divided the spit into two rather than removing it without a cross-section to confirm/deny. Worked basalt block found in 2/3 at a depth of 85cm - worked edges, too narrow to be a handle, maybe a stand. A small bronze coin was found on the floor - appears to have a figure on one side and a small hole, if centre on the other.
1.2	Starting to clear the remaining portion of the long trench running NS. - I have labelled the pottery (not much) under Trench Spit 1/2 as I have no the way of knowing the loci numbers.
2.3	Bottom layer of the EW wall made of very small stones and rubble - which this is a very wall.

Context	Report
1.2	Starting depth this morning in 65-90cm at the North end of the Trench continuing to clear rubbish from this point with the idea of clearing another level.
	Found a large Pythos base at a depth of 80cm - probably indicating floor beneath due to the size of the fragment.
	A doorway has appeared in the clearing of the walls of 1.2 with the bottom ledge at a depth of 70mm.
	Have found a beautiful jar which appears to be intact - we haven't revealed the bottom yet though. All round this are pieces of and possibly other large vessels, suggesting this was a storage area.

Context

Report

	Excavation continued along north side of trench
	Area levelled out. Trench reached in NE corner.
	Heights for excavated section NE-61 SE - 26 NW - 44cm
	Excavation of trench completed - further excavation possible later to determine depth of walls.
	Bank to the south to be worked on in order to gain a clear indication of wall position.
	Part of perimeter wall exposed. Bank to the south of the trench being partially removed in search of walls.

Context

Report

East Working in SE corner, East of perimeter wall (primary). Searching for signs of the extended wall seen in 100/3. There is no trace of this, so the corner of the extension must be in the bulk.
 Loom reports as indicated.
 Large stone removed from the top of the tumble (see picture at bottom). Appears to have two purposely created grooves on one side. A door stone?
 Excavation continuing on the tumble. Soil clumpy reddish/brown.
 Metal blob found in east excavation - NE corner 56cm - surface level.
 Glass spatula(?) found along east wall (noted on plan) at a depth of 62cm.
 Heights at the end of the day NE - 54cm
 SE - 25cm NW - 35cm SW - 70cm
 East section of trench levelled out. Now on roughly the same level as that section already excavated in NE
