STAN - ستان

ADVICE to TRENCH SUPERVISORS

1. Take a **new page** for each day. (Each day may take several pages).
2. Draw a **scale plan** of the trench **each day** on the graph paper (essential), with North at the top (if this is not convenient, mark North direction clearly).  
Mark depth from surface at the beginning of each day, at designated points.  
When starting a square, this plan may be nearly empty but draw it all the same and mark in emerging tumble.
3. Draw arrows on your plan to indicate **direction** in which you are excavating.
4. Every time you designate a new context, (on the occasion of a new spit, a new feature, a new soil colour) fill in the **Context Record Sheet** for that trench, as well as describing it in your report. Store the accumulated context record sheets in the plastic sleeve in your record book.
5. **Structures** . Measure carefully any structure (wall, doorway, threshold, ovens, pit, any large dressed stones or columns) and record exact location, height, width in your report as well as on the scale plan.
6. **Floors** - marked by very hard tough surface or layer of white crushed limestone. May be softer adjacent to wall. Record thickness of floor, if we decide to dig through it.  
If your floor is particularly good, collect a few bags of surface material - there may be seeds.
7. **Objects**. e.g. glass, figurine or lamp fragments, metal, stucco, loomweights, spindle whorls, beads, graffito-ed sherds, coins, gold jewellery ( some hope). Mark in the location and depth of any objects clearly and accurately. If necessary, draw another sketch plan as the day progresses. A quick sketch of the object in the report would be helpful, if it is too mysterious to name e.g. Mattie's metal blobs.
8. **Pottery**: label bags clearly in waterproof pen, with one label inside the bag and one outside. **Record daily the number of bags per context** . Be very careful to separate pottery from different contexts.  
**It is absolutely essential to double-bag the pottery. A broken bag of pottery without context is useless.**
9. **Bone**: Collect all bone and label as for pottery. Record number of bags per context daily.
10. **Charcoal**: Collect all charcoal and label as for pottery. Record number of bags per context daily.
11. **Tile**: it is important to record the location and amount of tile.
12. **Very important**: at the completion of a trench, draw to scale:
  - i Draw a section of the exposed baulk, with details of stratigraphy clearly marked.
  - ii Draw a top plan of the completed trench, with contexts clearly marked.
  - iii Write a short summary with your interpretation of the trench.

Photographs: JT0438 - 0454 - full context plus detailed images of loci either side of E-W wall.

| Context | Report   |
|---------|--|
| 1:2     | Team has cleared into the floor to RL 93.13<br>ceased work in 1:2  |
| 1:3     | The trench has been subdivided 1 1/2m from end parallel to Western edge of baulk.  |
|         | In the spit a coin <u>18</u> has been fd at RL 92.34   |
|         | Definite wall in SE corner.  |
|         | All fill has been removed in 5th trench<br>Plaster remains fd between the two major E-W walls  |
|         | + The northern trench after cleaning looks as though the eastern wall is just tumble and not a wall at all. To pull it down though would probably collapse <del>the</del> a greater part of the NE corner. Cleaning also revealed some plaster wall - a level has been taken at the top of the wall - RL 94.08 |

The end.  
S.F.
